## Packing List

---

Before you begin installing your Panel PC, please make sure that the following items have been shipped:

- ACP-5217 Infotainment Multi-Touch Panel PC
- Power Adapter x 1
- Product DVD

Contains User's Manual (in PDF format), Drivers and Utilities

If any of these items are missing or damaged, you should contact your distributor or sales representative immediately.

## Safety & Warranty

---

1. Read these safety instructions carefully.
2. Keep this user's manual for later reference.
3. Disconnect this equipment from any AC outlet before cleaning. Do not use liquid or spray detergents for cleaning. Use a damp cloth.
4. For pluggable equipment, the power outlet must be installed near the equipment and must be easily accessible.
5. Keep this equipment away from humidity.
6. Put this equipment on a reliable surface during installation. Dropping it or letting it fall could cause damage.
7. The openings on the enclosure are for air convection. Protect the equipment from overheating. **DO NOT COVER THE OPENINGS.**
- 8. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.**
9. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
10. All cautions and warnings on the equipment should be noted.
11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient over-voltage.
12. Never pour any liquid into an opening. This could cause fire or electrical shock.
13. Never open the equipment. For safety reasons, only qualified service personnel should open the equipment.

**14. If any of the following situations arises, get the equipment checked by service personnel:**

- a. The power cord or plug is damaged.
- b. Liquid has penetrated into the equipment.
- c. The equipment has been exposed to moisture.
- d. The equipment does not work well, or you cannot get it to work according to the user's manual.
- e. The equipment has been dropped and damaged.
- f. The equipment has obvious signs of breakage.

**15. DO NOT LEAVE THIS EQUIPMENT IN AN UNCONTROLLED ENVIRONMENT WHERE THE STORAGE TEMPERATURE IS BELOW -20° C (-4°F) OR ABOVE 70° C (158° F). IT MAY DAMAGE THE EQUIPMENT.**

16. External equipment intended for connection to signal input/output or other connectors, shall comply with relevant UL / IEC standard (e.g. UL 1950 for IT equipment and UL 60601-1 / IEC 60601 series for systems – shall comply with the standard IEC 60601-1-1, Safety requirements for medical electrical systems. Equipment not complying with UL 60601-1 shall be kept outside the patient environment, as defined in the standard.
17. When the temperature of CPU is higher than 35°C, the frequency of CPU will be adjusted automatically. For example, if the temperature of Intel Core i7 is 40°C, the frequency of the CPU will be between 1.8~1.3 GHz.

*Caution:*

*It may cause the danger of explosion if battery is incorrectly replaced. Replace only with same or equivalent type recommended by the manufacturer.*

## **Classification**

---

1. Degree of protection against electric shock: not classified
2. Degree of protection against the ingress of water: IPX1
3. Equipment not suitable for use in the presence of a flammable anesthetic mixture with air or with oxygen or nitrous oxide.
4. Mode of operation: Continuous
5. Type of protection against electric shock: Class I equipment

## FCC

---

***Warning!***

This device complies with Part 15 FCC Rules.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

## UL Module Description

---

 The logo consists of a central circle containing the letters 'UL'. Above the circle, the word 'CLASSIFIED' is written in a semi-circle. To the left of the circle is the letter 'C' and to the right is the letter 'US'.	<p><i>ACP-5217 AC modules are developed to suitable for the Classification Mark requirement</i></p>
--	---

## Safety Symbol Description

---

The following safety symbols are further explanations for your reference.

	<p><i>Medical equipment with respect to electric shock, fire and mechanical hazards only in accordance with UL 60601-1, and CAN/CSA C22.2 NO. 601.1</i></p>
	<p><i>Attention, consult ACCOMPANYING DOCUMENTS.</i></p>
	<p><i>Ground wire Protective Ground wire.</i></p>
	<p><i>Medical equipment with respect to electric shock, fire and mechanical hazards only in accordance with UL 60601-1, and CAN/CSA C22.2 NO. 601.1</i></p>

Information**

## 1.1 Introduction

---

The ACP-5217 is a Multi-Touch Infotainment Panel PC with superior onboard Intel® Core™ i7/Core™ i5/Celeron® processor-based computer. It is a PC-based system with 21.5" Full HD (1920x1080) Fanless TFT LCD display, integrated multimedia functions make them the perfect platforms to build comprehensive lifestyle computing applications.

The ACP-5217 includes all the features of a powerful computer into a slim and attractive chassis. The ACP-5217 has 250 nits TFT display with 1920x1080 resolution. This model equips two-point Multi-Touch Window design and is easy to clean. Moreover, it is IPX1 100% water-proof that can be installed in harsh environments. Its front bezel is IP-65/NEMA4 for auxiliary water-proof protection. In addition, the ACP-5217 deploys 7H hardness Anti-Scratch Surface to avoid accidental damage.

The ACP-5217 supports one 2.5" SATA Hard Disk Drive and one CFast™ slot for the storage functions, and one Mini Card expansion. Moreover, it supports Smart Card Reader, RFID, MSR, Skype phone, and camera to fulfill the demands of versatile applications.

## **1.2 Features**

---

- 21.5" Full HD (1920x1080) Fanless TFT LCD Display
- Easy-To-Clean: Multi-Touch Window Design (Two-Point)
- Superior Intel® Core™ i7-3610QE/Core™ i5-3510ME/Celeron® 1020E Processor
- IP65 Front Bezel & IPx1 Back Chassis
- Fanless Design
- Anti-Scratch Surface (7H Hardness)
- USB x 6, COM x 1, DVI-I x 1, LAN x 2, Mini PCIe Card x 1
- Front Access LCD ON/OFF, Brightness UP/DOWN, Volume UP/DOWN

## 1.3 Specification

---

### System

- Processor Intel® Core™ i7-3610QE/  
Core™i5-3510ME/ Celeron® 1020E  
Processor
- System Memory DDR3 SODIMM x 1, Max. 8 GB (Default  
2GB)
- LCD / CRT Controller Integrated graphics in Intel® QM77
- Ethernet 10/100/1000Base-TX, RJ-45 x 2
- I/O Port USB x 6 (USB2.0 x 2 on side; USB2.0 x  
2 and USB3.0 x 2 on bottom)  
RS-232 x 1  
Line-out x 1  
DVI-I x 1  
2W Speaker x 2  
Power Input x 1  
ATX power button
- Storage Disk Drive 2.5" SATA Hard Disk Drive Bay x 1/  
CFast™ slot x 1
- Expansion Mini PCIe Card x 1
- OS Support Windows® XP (T/S: Single point), Linux  
Fedora (T/S: Multi-point), Windows®7  
(T/S: Multi-point), Windows®8

## Mechanical

- Construction IP65/ NEMA4 for plastic front bezel, IPX1 for top plastic chassis
- Mounting VESA 100
- Dimension 21.5"(W) x 13.7"(H) x 2.2"(D) (546mm x 348.1mm x 56mm)
- Net Weight 19.8 lb (9 kg)
- Gross Weight 24.2 lb (11 kg)

## Environmental

- Operating Temperature 32°F~104°F (0°C~40°C)
- Storage Temperature -4°F~158°F (-20°C~70°C)
- Storage Humidity 5%~90% @ 40°C, non-condensing
- Vibration 1 g rms/ 5-500Hz/ Random Operation (HDD)
- Shock 20 G peak acceleration (11 msec. duration) (HDD)
- EMC CE/FCC Class A

## Power Supply

- DC Input 70W DC 12V, with AC power adapter with lock in package

## LCD

- Display Type 21.5" TFT-LCD, LED

- Max. Resolution 1920 x 1080
- Max. Colors 16.7 M colors (6/8-bit for R, G, B)
- Luminance (cd/m<sup>2</sup>) 250 cd/m<sup>2</sup>
- Contrast Ratio 1000:1
- Viewing Angle 85° (H), 80° (V)
- Backlight LED
- Backlight MTBF (Hours) 30,000

### **Touchscreen**

- Type Projected Capacitive Multi-Touch (two points)
- Resolution 2048x2048
- Light Transmission >90%

### 1.4 General Information

---

Chapter

2

**Hardware  
Installation**

## 2.1 Safety Precautions

---

**Warning!**

*Always completely disconnect the power cord from your board whenever you are working on it. Do not make connections while the power is on, because a sudden rush of power can damage sensitive electronic components.*

**Caution!**

*Always ground yourself to remove any static charge before touching the board. Modern electronic devices are very sensitive to static electric charges. Use a grounding wrist strap at all times. Place all electronic components on a static-dissipative surface or in a static-shielded bag when they are not in the chassis*

## 2.2 A Quick Tour of the ACP-5217

### Mechanical Drawings

ACP-5217  
UNITS:mm

### Front

Rear

I/O

Cable Cover (Optional)

**Note 1:** You may turn on the power by cutting and destroying the protective cover as it shows below.

**Note 2:** The “Anti-Drop Kit” can help on preventing the cable drop from the connector

### 2.3 2.5" Hard Disk Drive (HDD) Installation

---

Step 1: Unscrew the rear cover screws (15 screws)

Step 2: Remove EMI Cover (4 screws)

Step 3: Remove HDD Bracket (4 screws)

Step 4: Get the HDD and HDD Bracket ready

Step 5: Fasten the four screws to fix HDD Bracket and HDD

Step 6: Connect the SATA and power cables to the HDD and fasten the four screws to fix the HDD Bracket

Chapter

3

**AMI  
BIOS Setup**

### 3.1 System Test and Initialization

---

These routines test and initialize board hardware. If the routines encounter an error during the tests, you will either hear a few short beeps or see an error message on the screen. There are two kinds of errors: fatal and non-fatal. The system can usually continue the boot up sequence with non-fatal errors.

#### **System configuration verification**

These routines check the current system configuration against the values stored in the CMOS memory. If they do not match, the program outputs an error message. You will then need to run the BIOS setup program to set the configuration information in memory.

There are three situations in which you will need to change the CMOS settings:

1. You are starting your system for the first time
2. You have changed the hardware attached to your system
3. The CMOS memory has lost power and the configuration information has been erased.

The ACP-5217 CMOS memory has an integral lithium battery backup for data retention. However, you will need to replace the complete unit when it finally runs down.

## 3.2 AMI BIOS Setup

---

AMI BIOS ROM has a built-in Setup program that allows users to modify the basic system configuration. This type of information is stored in battery-backed CMOS RAM so that it retains the Setup information when the power is turned off.

### Entering Setup

Power on the computer and press <Del> or <F2> immediately. This will allow you to enter Setup.

### Main

Set the date, use tab to switch between date elements.

### Advanced

Enable/disable boot option for legacy network devices.

### Chipset

host bridge parameters.

### Boot

Enables/disables quiet boot option.

### Security

Set setup administrator password.

### Save&Exit

Exit system setup after saving the changes.

## Setup Menu

	Disabled	
	Auto	
Enables BIOS Support for Legacy USB Support. When enabled, USB can be functional in legacy environment like DOS. AUTO option disables legacy support if no USB devices are connected. DISABLE option will keep USB devices available only for EFI application		
USB3.0 Support	<b>Enabled</b>	
	Disabled	

Enables BIOS Support for USB3.0 (XHCI). When disabled, PCH USB3.0 controller will also be disabled.

Device Name

Auto

(Emulation Type)

Floppy

Forced FDD

Hard Disk

CD-ROM

If Auto. USB devices less than 530MB will be emulated as Floppy and remaining as Floppy and remaining as hard drive. Forced FDD option can be used to force a HDD formatted drive to boot as FDD(Ex. ZIP drive)

## Setup submenu: Security

Options summary: (**default setting**)

Administrator	<b>Not set</b>	
Password/		
User Password		

You can install a Supervisor password, and if you install a supervisor password, you can then install a user password. A user password does not provide access to many of the features in the Setup utility.

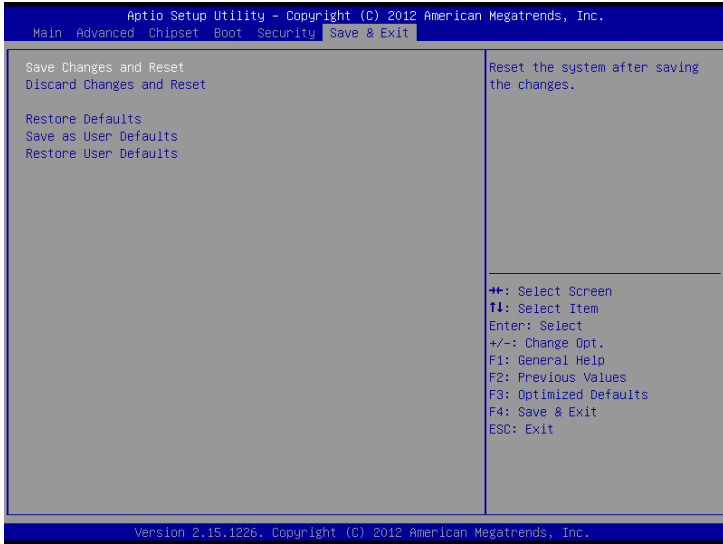

*Install the Password:*

Press Enter on this item, a dialog box appears which lets you enter a password. You can enter no more than six letters or numbers. Press Enter after you have typed in the password. A second dialog box asks you to retype the password for confirmation. Press Enter after you have retyped it correctly. The password is required at boot time, or when the user enters the Setup utility.

*Removing the Password:*

Highlight this item and type in the current password. At the next dialog box press Enter to disable password protection.

## Setup submenu: Exit

Options summary: (**default setting**)

Save Changes and Reset		
Reset the system after saving the changes		
Discard Changes and Reset		
Reset system setup without saving any changes		
Restore Defaults		
Restore/Load Default values for all the setup options.		
Save as User Defaults		
Save the changes done so far as User Defaults		
Restore User Defaults		

Restore the User Defaults to all the setup options

# Driver Installation

The ACP-5217 comes with an AutoRun DVD-ROM that contains all drivers and utilities that can help you to install the driver automatically.

Insert the driver DVD, the driver DVD-title will auto start and show the installation guide. If not, please follow the sequence below to install the drivers.

***Follow the sequence below to install the drivers:***

Step 1 – Install Chipset Driver

Step 2 – Install VGA Driver

Step 3 – Install LAN1 Driver (Intel® LAN Chip)

Step 4 – Install LAN2 Driver (Realtek LAN Chip)

Step 5 – Install Audio Driver

Step 6 – Install ME Driver

Step 7 – Install RAID & AHCI Driver

Step 8 – Install TPM Driver

Step 9 – Install Touch Driver

Step 10 – Install USB3.0 Driver (Windows® 7 only)

Please read instructions below for further detailed installations.

## 4.1 Installation:

---

Insert the ACP-5217 DVD-ROM into the DVD-ROM drive. And install the drivers from Step 1 to Step 10 in order.

### Step 1 – Install Chipset Driver

1. Click on the **STEP 1-CHIPSET** folder and select the OS folder your system is
2. Double click on the **infinst\_autol.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

### Step 2 – Install VGA Driver

1. Click on the **STEP2-VGA** folder and select the OS folder your system is
2. Double click on the **Setup.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

#### **Note 1:**

- This motherboard supports VGA and LVDS display devices. In Single Display mode, use the hot keys to switch between VGA to LVDS device or vice versa. By default, press **<Ctrl>+<Alt>+<F1>** to switch to VGA device and press **<Ctrl>+<Alt>+<F3>** to switch to LVDS device.
- Before removing the current display

device, connect the display device that you want to use, and then press the hot keys to switch to that device.

**Note 2:** If the OS is Windows® XP, you have to install the driver of dotNet Framework first. Simply click on **dotnetfx35.exe** located in **dotNet Framework** folder.

#### Step 3 –Install LAN 1 Driver (Intel® LAN Chip)

1. Click on the **STEP3-LAN1** folder and select the OS folder your system is
2. Double click on the **.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

#### Step 4 –Install LAN2 Driver (Realtek LAN Chip)

1. Click on the **STEP4-LAN2** folder and select the OS folder your system is
2. Double click on the **setup.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

#### Step 5 –Install Audio Driver

1. Click on the **STEP5-AUDIO** folder and select the OS folder your system is
2. Double click on the **.exe** file located in each OS folder
3. Follow the instructions that the window shows

4. The system will help you install the driver automatically

#### Step 6 – Install ME Driver

1. Click on the **STEP6-ME SW** folder and select the OS folder your system is
2. Double click on the **Setup.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

#### Step 7 – Install RAID & AHCI Driver

Please refer to the **Appendix D RAID & AHCI Settings**

#### Step 8 – Install TPM Driver

1. Click on the **STEP8-TPM** folder and select the OS folder your system is
2. Double click on the **Setup.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

#### Step 9 –Install Touch Driver

1. Click on the **STEP9-TOUCH** folder and select the folder of

**WINXP\_32**

2. Double click on the **ModifyDBArea**
  3. Follow the instructions that the window shows
  4. The system will help you install the driver automatically

**Step 10 –Install USB3.0 Driver**

1. Click on the **STEP10-USB3.0** folder and select the OS folder your system is
2. Double click on the **Setup.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Appendix

**A**

# **Programming the Watchdog Timer**

## A.1 Programming

ACP-5217 utilizes ITE IT8728F chipset as its watchdog timer controller.

Below are the procedures to complete its configuration and the AAeon initial watchdog timer program is also attached based on which you can develop customized program to fit your application.

### Configuring Sequence Description

After the hardware reset or power-on reset, the ITE 8728F enters the normal mode with all logical devices disabled except KBC. The initial state (enable bit) of this logical device (KBC) is determined by the state of pin 121 (DTR1#) at the falling edge of the system reset during power-on reset.

There are three steps to complete the configuration setup: (1) Enter the MB PnP Mode; (2) Modify the data of configuration registers; (3) Exit the MB PnP Mode. Undesired result may occur if the MB PnP Mode is not exited normally.

### (1) Enter the MB PnP Mode

To enter the MB PnP Mode, four special I/O write operations are to be performed during Wait for Key state. To ensure the initial state of the key-check logic, it is necessary to perform four write operations to the Special Address port (2EH). Two different enter keys are provided to select configuration ports (2Eh/2Fh) of the next step.

	Address Port	Data Port
87h, 01h, 55h, 55h:	2Eh	2Fh

### (2) Modify the Data of the Registers

All configuration registers can be accessed after entering the MB PnP Mode. Before accessing a selected register, the content of Index 07h must be changed to the LDN to which the register belongs, except some Global registers.

### (3) Exit the MB PnP Mode

Set bit 1 of the configure control register (Index=02h) to 1 to exit the MB PnP Mode.

**WatchDog Timer Configuration Registers**

LDN	Index	R/W	Reset	Configuration Register or Action
All	02H	W	N/A	Configure Control
07H	71H	R/W	00H	WatchDog Timer Control Register
07H	72H	R/W	00H	WatchDog Timer Configuration Register
07H	73H	R/W	00H	WatchDog Timer Time-out Value Register

**Configure Control (Index=02h)**

This register is write only. Its values are not sticky; that is to say, a hardware reset will automatically clear the bits, and does not require the software to clear them.

Bit	Description
7-2	Reserved
1	Returns to the Wait for Key state. This bit is used when the configuration sequence is completed
0	Resets all logical devices and restores configuration registers to their power-on states.

**WatchDog Timer Control Register (Index=71h, Default=00h)**

Bit	Description
7	WDT is reset upon a CIR interrupt
6	WDT is reset upon a KBC (mouse) interrupt
5	WDT is reset upon a KBC (keyboard) interrupt
4	WDT is reset upon a read or a write to the Game Port base address
3-2	Reserved
1	Force Time-out. This bit is self-clearing
0	WDT Status
	1: WDT value reaches 0.
	0: WDT value is not 0

**WatchDog Timer Configuration Register (Index=72h, Default=00h)**

Bit	Description
7	WDT Time-out value select
	1: Second
	0: Minute
6	WDT output through KRST (pulse) enable
5-4	Reserved
3-0	Select the interrupt level <sup>Note</sup> for WDT

**WatchDog Timer Time-out Value Register (Index=73h, Default=00h)**

Bit	Description
7-0	WDT Time-out value 7-0

	[00000680 - 0000069F] Motherboard resources
	[00000A00 - 00000A1F] Motherboard resources
	[00000A20 - 00000A2F] Motherboard resources
	[00000A30 - 00000A3F] Motherboard resources
	[00000D00 - 0000FFFF] PCI Bus
	[00001000 - 00001003] Motherboard resources
	[0000164E - 0000164F] Motherboard resources
	[0000E000 - 0000E0FF] Realtek PCIe GBE Family Controller
	[0000E000 - 0000EFFF] Intel(R) 7 Series/C216 Chipset Family PCI Express Root Port 2 - 1E12
	[0000F000 - 0000F03F] Intel(R) HD Graphics 4000
	[0000F040 - 0000F05F] Intel(R) 7 Series/C216 Chipset Family SMBus Host Controller - 1E22
	[0000F060 - 0000F07F] Intel(R) 7 Series Chipset Family SATA AHCI Controller
	[0000F0A0 - 0000F0A3] Intel(R) 7 Series Chipset Family SATA AHCI Controller
	[0000F0B0 - 0000F0B7] Intel(R) 7 Series Chipset Family SATA AHCI Controller
	[0000F0C0 - 0000F0C3] Intel(R) 7 Series Chipset Family SATA AHCI Controller
	[0000F0D0 - 0000F0D7] Intel(R) 7 Series Chipset Family SATA AHCI Controller
	[0000F0E0 - 0000F0E7] Intel(R) Active Management Technology - SOL (COM5)
	[0000FFFF - 0000FFFF] Motherboard resources

## B.2 Memory Address Map

Memory	
[000A0000 - 000BFFFF]	Intel(R) HD Graphics 4000
[000A0000 - 000BFFFF]	PCI Bus
[000D0000 - 000D3FFF]	PCI Bus
[000D4000 - 000D7FFF]	PCI Bus
[000D8000 - 000DBFFF]	PCI Bus
[000DC000 - 000DFFFF]	PCI Bus
[000E0000 - 000E3FFF]	PCI Bus
[000E4000 - 000E7FFF]	PCI Bus
[20000000 - 201FFFFFF]	System board
[40004000 - 40004FFF]	System board
[DFA00000 - DFA00FFF]	Motherboard resources
[DFA00000 - FEAF0FFF]	PCI Bus
[E0000000 - EFFFFFFF]	Intel(R) HD Graphics 4000
[F0000000 - F003FFF]	Realtek PCIe GBE Family Controller
[F0000000 - F00FFFF]	Intel(R) 7 Series/C216 Chipset Family PCI Express Root Port 2 - 1E12
[F7800000 - F7BFFFF]	Intel(R) HD Graphics 4000
[F7C00000 - F7C0FFF]	Realtek PCIe GBE Family Controller
[F7C00000 - F7CFFFF]	Intel(R) 7 Series/C216 Chipset Family PCI Express Root Port 2 - 1E12
[F7D00000 - F7D1FFF]	Intel(R) 82579LM Gigabit Network Connection
[F7D20000 - F7D2FFF]	Intel(R) USB 3.0 eXtensible Host Controller
[F7D30000 - F7D33FFF]	High Definition Audio Controller
[F7D35000 - F7D350FF]	Intel(R) 7 Series/C216 Chipset Family SMBus Host Controller - 1E22
[F7D36000 - F7D367FF]	Intel(R) 7 Series Chipset Family SATA AHCI Controller
[F7D37000 - F7D373FF]	Intel(R) 7 Series/C216 Chipset Family USB Enhanced Host Controller - 1E26
[F7D38000 - F7D383FF]	Intel(R) 7 Series/C216 Chipset Family USB Enhanced Host Controller - 1E2D
[F7D39000 - F7D39FFF]	Intel(R) 82579LM Gigabit Network Connection
[F7D3A000 - F7D3AFFF]	Intel(R) Active Management Technology - SOL (COM5)
[F7D3C000 - F7D3C00F]	Intel(R) Management Engine Interface
[F8000000 - FBFFFFFF]	Motherboard resources
[FED00000 - FED003FF]	High precision event timer
[FED10000 - FED17FFF]	Motherboard resources
[FED18000 - FED18FFF]	Motherboard resources
[FED19000 - FED19FFF]	Motherboard resources
[FED1C000 - FED1FFFF]	Motherboard resources
[FED20000 - FED3FFFF]	Motherboard resources
[FED40000 - FED44FFF]	Trusted Platform Module 1.2
[FED45000 - FED8FFFF]	Motherboard resources
[FED90000 - FED93FFF]	Motherboard resources
[FEE00000 - FEEFFFFF]	Motherboard resources
[FF000000 - FFFFFFFF]	Intel(R) 82802 Firmware Hub Device
[FF000000 - FFFFFFFF]	Motherboard resources

### B.3 IRQ Mapping Chart

	(PCI) 0xFFFFFFF6 (-6) Realtek PCIe GBE Family Controller
	(PCI) 0xFFFFFFF5 (-5) Intel(R) 82579LM Gigabit Network Connection
	(PCI) 0xFFFFFFF4 (-4) Intel(R) USB 3.0 eXtensible Host Controller
	(PCI) 0xFFFFFFF3 (-3) Intel(R) HD Graphics 4000
	(PCI) 0xFFFFFFF2 (-2) Intel(R) 7 Series Chipset Family SATA AHCI Controller

### B.4 DMA Channel Assignments

---

Direct memory access (DMA)	
	4 Direct memory access controller

Appendix

C

## Miscellanea

## C.1 General Cleaning Tips

---

You may need the following precautions before you begin to clean the computer. When you clean any single part or component for the computer, please read and understand the details below fully.

1. Never spray or squirt the liquids directly onto any computer component. If you need to clean the device, please rub it with a piece of dry cloth.
2. Be cautious of the tiny removable components when you use a vacuum cleaner to absorb the dirt on the floor.
3. Turn the system off before you start to clean up the component or computer.
4. Never drop the components inside the computer or get circuit board damp or wet.
5. Be cautious of all kinds of cleaning solvents or chemicals when you use it for the sake of cleaning. Some individuals may be allergic to the ingredients.
6. Try not to put any food, drinks or cigarettes around the computer.

## C.2 Cleaning tools

---

Although many companies have created products to help improve the process of cleaning your computer and peripherals users can also use household items to clean their computers and peripherals. Below is a listing of items you may need or want to use while cleaning your computer or computer peripherals.

Keep in mind that some components in your computer may only be able to be cleaned using a product designed for cleaning that component, if this is the case it will be mentioned in the cleaning tips.

- **Cloth** - A piece of cloth is the best tool to use when rubbing up a component. Although paper towels or tissues can be used on most hardware as well, we still recommend you to rub it with a piece of cloth.
- **Water or rubbing alcohol** – You may moisten a piece of cloth a bit with some water or rubbing alcohol and rub it on the computer. Unknown solvents may be harmful to the plastics parts.
- **Vacuum cleaner** - Absorb the dust, dirt, hair, cigarette particles, and other particles out of a computer can be one of the best methods of cleaning a computer. Over time these items can restrict the airflow in a computer and cause circuitry to corrode.

- **Cotton swabs** - Cotton swabs moistened with rubbing alcohol or water are excellent tools for wiping hard to reach areas in your keyboard, mouse, and other locations.
- **Foam swabs** - Whenever possible it is better to use lint free swabs such as foam swabs.

**Note:**

We strongly recommended that you should shut down the system before you start to clean any single components.

**Please follow the steps below.**

1. Close all application programs
2. Close operating software
3. Turn off power switch
4. Remove all device
5. Pull out power cable

### C.3 Scrap Computer Recycling

---

If the computer equipments need the maintenance or are beyond repair, we strongly recommended that you should inform us as soon as possible for the suitable solution. For the computers that are no longer useful or work well, please contact with worldwide distributors for recycling.

The worldwide distributors show on the following website:

<http://www.aaeon.com/?TabIndex=Contact&TabID=Distributors>

**Note:**

Follow the national requirements to dispose unit

## C.4 Installing Accessories

---

### Skype Phone Installation

Step 1: Fasten the two screws(2-SELF TAPPING SCREWS) to fix the Skype Bracket with the ACP-5217

MSR Installation

Step 1: Fasten the two screws (2-SELF TAPPING SCREWS) to fix the MSR Bracket with the ACP-5217

Bar Code Scanner Installation

Step 1: Fasten the three screws to fix the Bar Code Scanner with the bracket

Step 2: Fasten the two screws (2-SELF TAPPING SCREWS) to fix the Bar Code Scanner with the ACP-5217

Appendix

**D**

# **RAID & AHCI Settings**

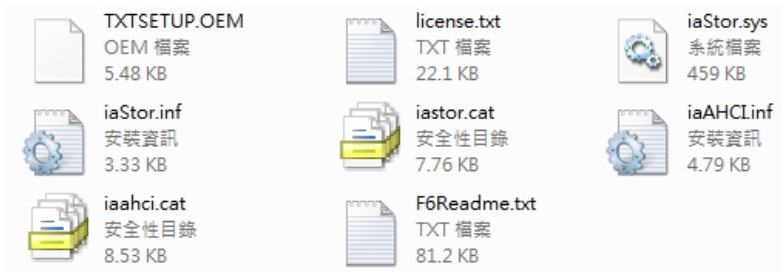

## D.1 Setting RAID

---

OS installation to SETUP RAID Mode

Step 1: Extract the **f6fly-x86.zip** from “Driver CD ->

STEP7-RAID&AHCI\WinXP\_32” and copy below files to diskette.

Step 2: Connect the USB Floppy drive to the board and insert the diskette from previous step.

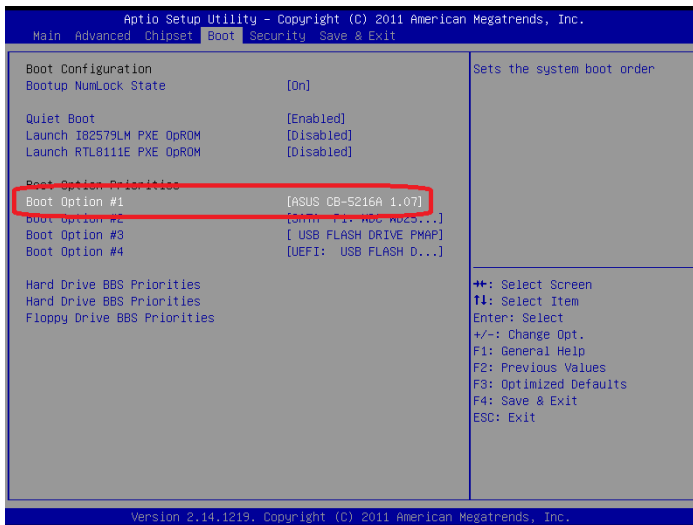

Step 3: Configure SATA Controller to RAID mode in **BIOS SETUP Menu**:

**Advanced -> SATA Configuration -> SATA Mode -> RAID Mode**

Step 4: Configure DVD/CD-ROM drive as the first boot device.

## Step 5: Save changes and exit BIOS SETUP

## Step 6: Press CTRL-I to enter RAID Configuration Utility

Step 9 – Choose “Create Volume” and confirmed in next warning message.

```

[**]Change [TAB]-Next [ESC]-Previous Menu [ENTER]-Select
```

Step 10 – Exit RAID Configuration Utility and Reboot to DVD/CD-ROM device to install OS

Step 11 – Press “F6” to install RAID driver

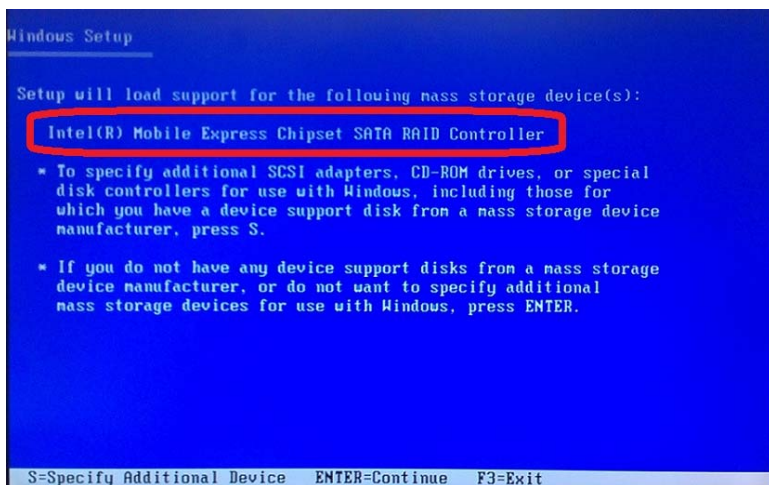

Step 12 – Press “S” to install RAID driver

### Step 13 – Choose “Intel(R) Mobile Express Chipset SATA RAID Controller”

Step 14 – It will show the model you selected and then press “ENTER”. Windows Setup will continue to install OS.

## D.2 Setting AHCI

---

OS installation to SETUP AHCI Mode

Step 1: Extract the **f6fly-x86.zip** from “Driver CD -> STEP7 - RAID&AHCI\WinXP\_32” and copy below files to diskette.

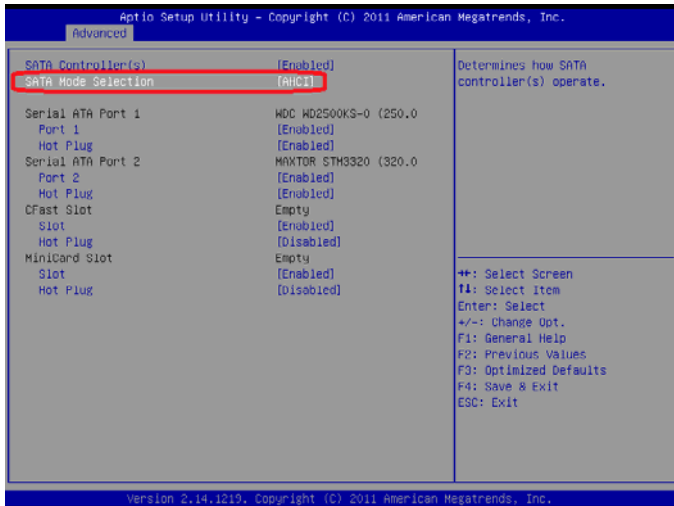

Step 2: Connect the USB Floppy drive to the board and insert the diskette from previous step.

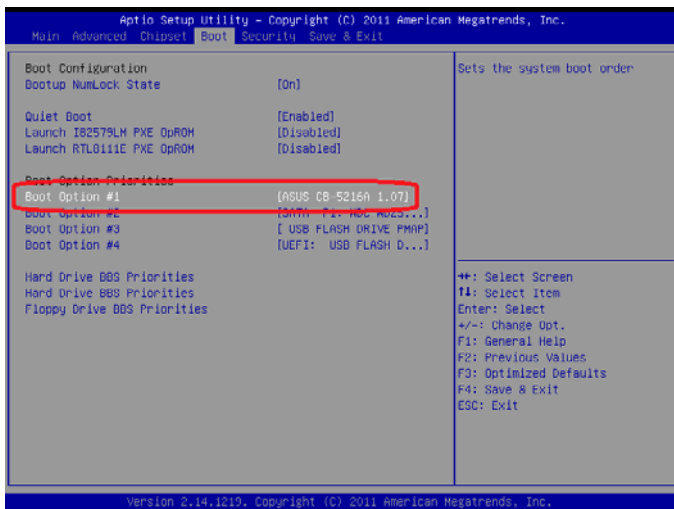

Step 3: Configure SATA Controller to RAID mode in **BIOS SETUP Menu**:

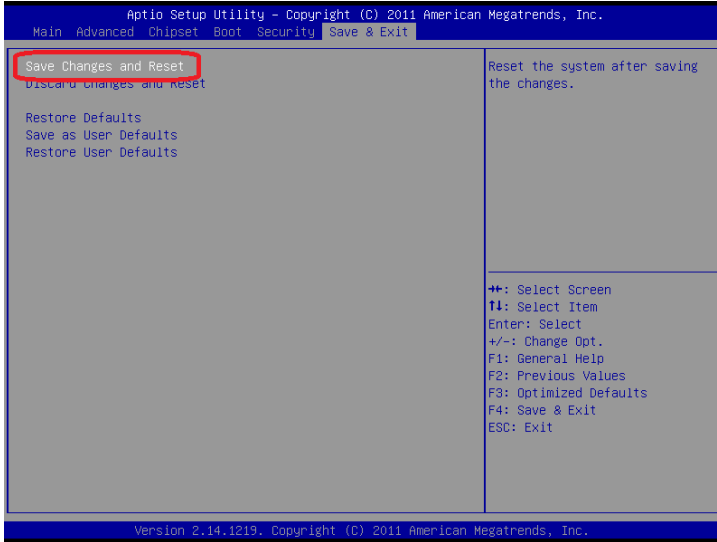

**Advanced -> SATA Configuration -> SATA Mode -> AHCI Mode**

Step 4: Configure DVD/CD-ROM drive as the first boot device.

## Step 5: Save changes and exit BIOS SETUP

Step 6 – Boot to DVD/CD-ROM device to install OS

Step 7 – Press “**F6**” to install AHCI driver

Step 8 – Press “S” to install AHCI driver

Step 9 – Choose “Intel(R) 7 Series Chipset Family SATA AHCI Controller”

Step 10 – It will show the model you selected and then press "ENTER".

Windows Setup will continue to install OS.
