Packing List

Before you begin operating your PC, please make sure that the following materials are enclosed:

- 1 FES-5120
- 1 CD-ROM for manual (in PDF format) and drivers
- 1 60W AC-DC Power Adapter
- 1 Wallmount Kit

If any of these items should be missing or damaged, please contact your distributor or sales representative immediately.

Safety & Warranty

- 1. Read these safety instructions carefully.
- 2. Keep this user's manual for later reference.
- 3. Disconnect this equipment from any AC outlet before cleaning. Do not use liquid or spray detergents for cleaning. Use a damp cloth.
- 4. For pluggable equipment, the power outlet must be installed near the equipment and must be easily accessible.
- 5. Keep this equipment away from humidity.
- 6. Put this equipment on a firm surface during installation. Dropping it or letting it fall could cause damage.
- 7. The openings on the enclosure are for air convection. Protect the equipment from overheating. DO NOT COVER THE OPENINGS.
- 8. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
- 9. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
- 10. All cautions and warnings on the equipment should be noted.
- 11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient over-voltage.
- 12. Never pour any liquid into an opening. This could cause fire or electrical shock.
- 13. Never open the equipment. For safety reasons, only qualified service personnel should open the equipment.
- 14. If any of the following situations arises, get the equipment checked by service personnel:
 - a. The power cord or plug is damaged.
 - b. Liquid has penetrated into the equipment.
 - c. The equipment has been exposed to moisture.

Flexible Embedded FES-5120

- d. The equipment does not work well, or you cannot get it to work according to the user's manual.
- e. The equipment has been dropped and damaged.
- f. The equipment has obvious signs of breakage.
- DO NOT LEAVE THIS EQUIPMENT IN AN ENVIRONMENT WHERE THE STORAGE TEMPERATURE IS BELOW -20°C (-4°F) OR ABOVE 65°C (149°F). IT MAY DAMAGE THE EQUIPMENT.

FCC

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

Caution:

There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions and your local government's recycling or disposal directives.

Chapter

General Information

Chapter 1 General Information 1-1

1.1 Introduction

FES-5120 adopts the Intel[®] Atom[™] N270 Processor, up to 1.6GHz. The chipset is equipped with Intel[®] 945GSE & ICH7M. Moreover, the system memory features 200-pin DDRII 400/533 SODIMM socket up to 2GB. It deploys one RJ-45 port that features 10/100/1000Base-TX Ethernet LAN. FES-5120 condensed appearance features desktop and wallmount form factor that fits nicely into a space-limited environment.

This compact FES-5120 equipped with one internal 2.5" Hard Disk Drive with SATA interface. In addition, it features three RS-232/ one RS-232/422/485 COM ports and six USB2.0 ports. Furthermore, the VIA HD VT-1708B supports optional 5.1 audio channel and 2W amplifier for speaker out.

1.2 Features

- Intel[®] Atom[™] N270 1.6 GHz
- Intel[®] 945GSE + ICH7M Chipset
- 200-Pin Non-ECC DDRII 400/533 SODIMM x 1, Up To 2 GB
- VGA Single View
- Realtek PCI-Express 10/100/1000Base-TX Ethernet x 1
- 2.5" SATA Hard Disk Drive Bay x 1
- USB 2.0 x 6, COM x 4, CompactFlash™ x 1, 8-bit Digital I/O
- Cost-Effective and Fanless Solution

Chapter 2 Hardware Installation 2-3

2.3 List of Jumpers

The board has a number of jumpers that allow you to configure your system to suit your application.

| Label | Function |
|---------|--------------------------------|
| JP1 | Clear CMOS |
| JP3 | LVDS Power Selection |
| JP4 | LVDS Inverter Power Selection |
| JP5 | CFD Voltage 3.3V/5V Selection |
| JP6 | Auto Power on Selection |
| JP10 | COM1 Port Power/Ring Selection |
| JP11 | COM2 Port Power/Ring Selection |
| COMV1~2 | COM1, 2 Port Power Selection |

The table below shows the function of each of the board's jumpers:

2.4 List of Connectors

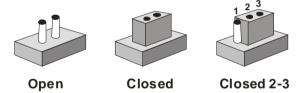

The board has a number of connectors that allow you to configure your system to suit your application. The table below shows the function of each board's connectors:

| Function |
|--|
| Front Panel Connector 1 |
| VGA Display Connector |
| RS-232 Serial Port Connector |
| RS-232/422/485 Serial Port Connector |
| Compact Flash Slot (Master) |
| LPT Port Connector |
| USB Connector |
| 10/100 or 100/1000Base-TX Ethernet Connector |
| DDRII SODIMM Slot |
| LVDS Inverter Power Connector |
| LVDS Connector |
| Audio Pin Header (right channel) |
| Audio Pin Header (left channel) |
| USB Pin Header |
| Digital I/O Connector |
| PS2 Keyboard/Mouse Connector |
| +12V Power Connector |
| SATA POWER Connector |
| Serial ATA Connector |
| Audio Connector |
| |

2.5 Setting Jumpers

You configure your card to match the needs of your application by setting jumpers. A jumper is the simplest kind of electric switch. It consists of two metal pins and a small metal clip (often protected by a plastic cover) that slides over the pins to connect them. To "close" a jumper you connect the pins with the clip.

To "open" a jumper you remove the clip. Sometimes a jumper will have three pins, labeled 1, 2 and 3. In this case you would connect either pins 1 and 2 or 2 and 3.

A pair of needle-nose pliers may be helpful when working with jumpers.

If you have any doubts about the best hardware configuration for your application, contact your local distributor or sales representative before you make any change.

Generally, you simply need a standard cable to make most connections.

2.6 Clear CMOS (JP1)

| JP1 | Function |
|-----|------------------|
| 1-2 | Normal (Default) |
| 2-3 | Clear CMOS |

2.7 LVDS Power Selection (JP3)

| JP3 | Function | |
|-----|---------------|--|
| 1-2 | +5V | |
| 2-3 | +3V (Default) | |

2.8 LVDS Inverter Voltage Selection (JP4)

| JP4 | Function | |
|-----|----------------|--|
| 1-2 | +5V | |
| 2-3 | +12V (Default) | |

2.9 CFD Voltage 3.3V/5V Selection (JP5)

| JP5 | Signal | |
|-----|---------------|--|
| 1-2 | +3.3V | |
| 2-3 | +5V (Default) | |

2.10 Auto Power Selection (JP6)

| JP6 | Function |
|-----------|-------------------|
| Close 1-2 | Enable |
| Close 2-3 | Disable (Default) |

2.11 COM1 Port Power/Ring Selection (JP10)

| JP10 | Function |
|-----------|--------------------------------|
| Close 1-2 | COM1 Power Selection (Default) |
| Close 2-3 | RI1 |

2.12 COM2 Port Power/Ring Selection (JP11)

| JP11 | Function |
|-----------|--------------------------------|
| Close 1-2 | COM2 Power Selection (Default) |
| Close 2-3 | RI1 |

2.13 COM2 Port Power Selection (COMV1)

| COMV1 | Function |
|-----------|----------------|
| Close 1-2 | +12V (Default) |
| Close 2-3 | +5V |

2.14 COM1 Port Power Selection (COMV2)

| COMV2 | Function |
|-----------|----------------|
| Close 1-2 | +12V (Default) |
| Close 2-3 | +5V |

2.15 Front Panel Connector (FP1)

2.28 Installing the Hard Disk Drive

Step 1: Unfasten the five screws on the bottom case of FES-5120.

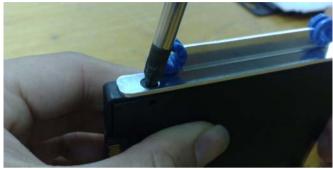

Step 2 : Fasten the four HDD rubbers(Blue) on the HDD bracket

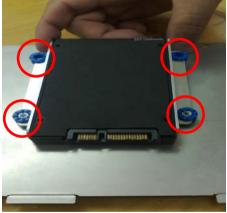

Step3 : Fasten the 4 screws to connect HDD bracket and HDD

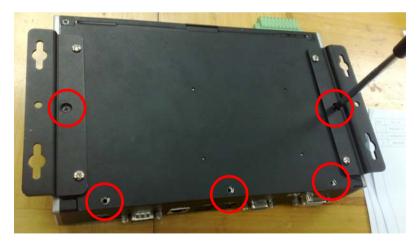

Step 4 : Put HDD on the bottom case of FES-5120 and then fasten 4 screws to fix on it.

Step 5: Put the bottom case back to the system and plug in SATA cable and power cable.

Step 6: Close and screw the bottom case of the FES-5120

Flexible Embedded System

Chapter 3

Award BIOS Setup

Chapter 3 Award BIOS Setup 3-1

3.1 System Test and Initialization

These routines test and initialize board hardware. If the routines encounter an error during the tests, you will either hear a few short beeps or see an error message on the screen. There are two kinds of errors: fatal and non-fatal. The system can usually continue the boot up sequence with non-fatal errors. Non-fatal error messages usually appear on the screen along with the following instructions:

Press <F1> to RESUME

Write down the message and press the F1 key to continue the boot up sequence.

System configuration verification

These routines check the current system configuration against the values stored in the CMOS memory. If they do not match, the program outputs an error message. You will then need to run the BIOS setup program to set the configuration information in memory.

There are three situations in which you will need to change the CMOS settings:

- 1. You are starting your system for the first time
- 2. You have changed the hardware attached to your system
- 3. The CMOS memory has lost power and the configuration information has been erased.

The FES-5120 CMOS memory has an integral lithium battery backup for data retention. However, you will need to replace the complete unit when it finally runs down.

3.2 Award BIOS Setup

Awards BIOS ROM has a built-in Setup program that allows users to modify the basic system configuration. This type of information is stored in battery-backed CMOS RAM so that it retains the Setup information when the power is turned off.

Entering Setup

Power on the computer and press immediately. This will allow you to enter Setup.

Standard CMOS Features

Use this menu for basic system configuration. (Date, time, IDE, etc.)

Advanced BIOS Features

Use this menu to set the advanced features available on your system.

Advanced Chipset Features

Use this menu to change the values in the chipset registers and optimize your system performance.

Integrated Peripherals

Use this menu to specify your settings for integrated peripherals. (Primary slave, secondary slave, keyboard, mouse etc.)

Power Management Setup

Use this menu to specify your settings for power management. (HDD power down, power on by ring, KB wake up, etc.)

PnP/PCI Configurations

This entry appears if your system supports PnP/PCI.

Flexible Embedded System

PC Health Status

This menu allows you to set the shutdown temperature for your system.

Frequency/Voltage Control

Use this menu to specify your settings for auto detect DIMM/PCI clock and spread spectrum.

Load Fail-Safe Defaults

Use this menu to load the BIOS default values for the minimal/stable performance for your system to operate.

Load Optimized Defaults

Use this menu to load the BIOS default values that are factory settings for optimal performance system operations. While AWARD has designated the custom BIOS to maximize performance, the factory has the right to change these defaults to meet their needs.

Set Supervisor/User Password

Use this menu to set Supervisor/User Passwords.

Save and Exit Setup

Save CMOS value changes to CMOS and exit setup.

Exit Without Saving

Abandon all CMOS value changes and exit setup.

You can refer to the "AAEON BIOS Item Description.pdf" file in the CD for the meaning of each setting in this chapter.

Flexible Embedded System

Chapter

Driver Installation

Chapter 4 Driver Installation 4-1

The FES-5120 comes with an AutoRun CD-ROM that contains all drivers and utilities that can help you to install the driver automatically.

Insert the driver CD, the driver CD-title will auto start and show the installation guide. If not, please follow the sequence below to install the drivers.

Follow the sequence below to install the drivers:

Step 1 – Install INF Driver Step 2 – Install VGA Driver Step 3 – Install Audio Driver Step 4 – Install LAN Driver

USB 2.0 Drivers are available for download using Windows[®] Update for both Windows[®] XP and Windows[®] 2000. For additional information regarding USB 2.0 support in Windows[®] XP and Windows[®] 2000, please visit www.microsoft.com/hwdev/usb/.

Please read instructions below for further detailed installations.

4.1 Installation:

Insert the FES-5120 CD-ROM into the CD-ROM drive and install the drivers from Step 1 to Step 4 in order.

Step 1 – Install INF Driver

- 1. Click on the *Step 1-INF* folder and double click on the *Setup.exe*
- 2. Follow the instructions that the window shows
- 3. The system will help you install the driver automatically
- Step 2 Install VGA Driver
 - Click on the Step 2 –VGA folder and select the OS your system is
 - 2. Double click on Setup.exe located in each OS folder
 - 3. Follow the instructions that the window shows
 - 4. The system will help you install the driver automatically
- Step 3 Install Audio Driver
 - 1. Click on the *Step 3-Audio* folder and double click on the *SETUP.exe*
 - 2. Follow the instructions that the window shows
 - 3. The system will help you install the driver automatically

Step 4 – Install LAN Driver

1. Click on the Step 4 – LAN folder and select the OS your

system is

- 2. Double click on *setup.exe* located in each OS folder
- 3. Follow the instructions that the window shows
- 4. The system will help you install the driver automatically

Appendix A

Programming the Watchdog Timer

Appendix A Programming the Watchdog Timer A-1

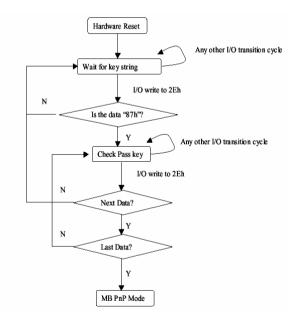

A.1 Programming

FES-5120 utilizes ITE 8718 chipset as its watchdog timer controller. (K version)

Below are the procedures to complete its configuration and the AAEON initial watchdog timer program is also attached based on which you can develop customized program to fit your application.

Configuring Sequence Description

After the hardware reset or power-on reset, the ITE 8718 enters the normal mode with all logical devices disabled except KBC.

There are three steps to complete the configuration setup: (1) Enter the MB PnP Mode; (2) Modify the data of configuration registers; (3) Exit the MB PnP Mode. Undesired result may occur if the MB PnP Mode is not exited normally.

Appendix A Programming the Watchdog Timer A-2

(1) Enter the MB PnP Mode

To enter the MB PnP Mode, four special I/O write operations are to be performed during Wait for Key state. To ensure the initial state of the key-check logic, it is necessary to perform four write opera-tions to the Special Address port (2EH). Two different enter keys are provided to select configuration ports (2Eh/2Fh) of the next step.

| | Address Port | Data Port | |
|---------------------|--------------|-----------|--|
| 87h, 01h, 55h, 55h: | 2Eh | 2Fh | |

(2) Modify the Data of the Registers

All configuration registers can be accessed after entering the MB PnP Mode. Before accessing a selected register, the content of Index 07h must be changed to the LDN to which the register belongs, except some Global registers.

(3) Exit the MB PnP Mode

Set bit 1 of the configure control register (Index=02h) to 1 to exit the MB PnP Mode.

| LDN | Index | R/W | Reset | Configuration Register or Action |
|-----|-------|-----|-------|---|
| All | 02H | W | N/A | Configuration Control |
| 07H | 71H | R/W | 00H | WatchDog Timer Control Register |
| 07H | 72H | R/W | 00H | WatchDog Timer Configuration Register |
| 07H | 73H | R/W | 00H | WatchDog Timer Time-out Value (LSB) |
| | | | | Register |
| 07H | 74H | R/W | 00H | WatchDog Timer Time-out Value (MSB) Register |

WatchDog Timer Configuration Registers

Configure Control (Index=02h)

This register is write only. Its values are not sticky; that is to say, a hardware reset will automatically clear the bits, and does not require the software to clear them.

Bit Description 7-2 Reserved 1 Returns to the Wait for Key state. This bit is used when the configuration sequence is completed. 0 Resets all logical devices and restores configuration registers to their power-on states.

WatchDog Timer Control Register (Index=71h, Default=00h)

| Bit | Description |
|-----|--|
| 7 | WDT is reset upon a CIR interrupt |
| 6 | WDT is reset upon a KBC (Mouse) interrupt |
| 5 | WDT is reset upon a KBC (Keyboard) interrupt |
| 4 | Reserved |
| 3-2 | Reserved |
| 1 | Force Time-out. This bit is self-clearing |
| 0 | WDT status |
| | 1: WDT value reaches 0 |
| | 0: WDT value is not 0 |
| | |

WatchDog Timer Configuration Register (Index=72h, Default=00h)

| Bit | Description |
|-----|--|
| 7 | WDT Time-out value select |
| | 1: Second |
| | 0: Minute |
| 6 | WDT output through KRST (pulse) enable |
| 5 | WDT Time-out value Extra select 1: 4s. 0: Determine by WDT Time-out value select (bit7 of this |
| | register) |
| 4 | WDT output through PWROK1/PWROK2 (pulse) enable |
| 3 | Select the interrupt level ^{note} for WDT |

WatchDog Timer Time-out Value (LSB) Register (Index=73h,

Default=00h)

| Bit | Description |
|-----|------------------------|
| 7-0 | WDT Time-out value 7-0 |

WatchDog Timer Time-out Value (MSB) Register (Index=74h,

Default=00h)

BitDescription7-0WDT Time-out value 15-8

| |
| [00000A79 - 00000A79] ISAPNP Read Data Port |
| |
| [0000D000 - 0000DFFF] Intel(R) 82801G (ICH7 Family) PCI Express Root Port - 27D0 [0000D550, 0000D555] Baaltal DCIa CEF Family Controller |
| [0000DE00 - 0000DEFF] Realtek PCIe GBE Family Controller [0000F500 - 0000F50F] Intel(R) 82801GBM/GHM (ICH7-M Family) Serial ATA Storage Controller - 27C4 |
| ☐ [0000F600 - 0000F603] Intel(R) 82801GBM/GHM (ICH7-M Panily) Serial ATA Storage Controller - 27C4 |
| [0000F700 - 0000F707] Intel(R) 82801GBM/GHM (ICH7-M Family) Serial ATA Storage Controller - 27C4 |
| [0000F800 - 0000F803] Intel(R) 82801GBM/GHM (ICH7-M Family) Serial ATA Storage Controller - 27C4 [0000F800 - 0000F803] Intel(R) 82801GBM/GHM (ICH7-M Family) Serial ATA Storage Controller - 27C4 |
| - [0000F900 - 0000F907] Intel(R) 82801GBM/GHM (ICH7-M Family) Serial ATA Storage Controller - 27C4 |
| [0000FA00 - 0000FA0F] Intel(R) 82801G (ICH7 Family) Ultra ATA Storage Controllers - 270F |
| G000FB00 - 0000FB1F] Intel(R) 82801G (ICH7 Family) USB Universal Host Controller - 27CB |
| Colore Dob - Color Dial - 27CB - Colore (Critical Annual) CDD Children and State Controller - 27CB - Colore (Critical Annual) CDD Children and State Controller - 27CA |
| Cooperational and the second s |
| € [0000FE00 - 0000FE1F] Intel(R) 82801G (ICH7 Family) USB Universal Host Controller - 27C8 |
| [0000FF00 - 0000FF07] Mobile Intel(R) 945 Express Chipset Family |
| |

Appendix B I/O Information B-2

Flexible Embedded System

FES-5120

B.2 Memory Address Map

| Mei | 00000000 - 0009FFFF] System board |
|-----|---|
| | 000A0000 - 000BFFFF] Mobile Intel(R) 945 Express Chipset Family |
| | 000A0000 - 000BFFFF1 PCI bus |
| | 000C0000 - 000DFFFF] PCI bus |
| | 000E0000 - 000EFFFF] System board |
| | 000F0000 - 000FFFFF] System board |
| | 00100000 - 3F6DFFFF] System board |
| | [3F6E0000 - 3F6FFFFF] System board |
| | [3F700000 - FEBFFFFF] PCI bus |
| | [D0000000 - DFFFFFFF] Mobile Intel(R) 945 Express Chipset Family |
| | [E0000000 - EFFFFFF] Motherboard resources |
| | [FDB00000 - FDBFFFFF] Intel(R) 82801G (ICH7 Family) PCI Express Root Port - 27D0 |
| | [FDBF0000 - FDBFFFFF] Realtek PCIe GBE Family Controller |
| | [FDE00000 - FDEFFFFF] Intel(R) 82801G (ICH7 Family) PCI Express Root Port - 27D0 |
| | [FDEFF000 - FDEFFFFF] Realtek PCIe GBE Family Controller |
| | [FDF00000 - FDF7FFFF] Mobile Intel(R) 945 Express Chipset Family |
| | [FDF80000 - FDFBFFFF] Mobile Intel(R) 945 Express Chipset Family |
| | [FDFF8000 - FDFFBFFF] Microsoft UAA Bus Driver for High Definition Audio |
| 6 | [FDFFE000 - FDFFE3FF] Intel(R) 82801GBM/GHM (ICH7-M Family) Serial ATA Storage Controller - 27C |
| - | [FDFFF000 - FDFFF3FF] Intel(R) 82801G (ICH7 Family) USB2 Enhanced Host Controller - 27CC |
| | [FEC00000 - FEC00FFF] System board |
| | [FED13000 - FED1DFFF] System board |
| | [FED20000 - FED8FFFF] System board |
| | [FEE00000 - FEE00FFF] System board |
| | [FFB00000 - FFB7FFFF] System board |
| | [FFB80000 - FFBFFFFF] Intel(R) 82802 Firmware Hub Device |
| | [FFF00000 - FFFFFFFF] System board |

B.3 IRQ Mapping Chart

| 🖻 🛄 Interrup | t requ | est (IRQ) |
|--------------|--------|--|
| ISA 🔜 🗌 |) 0 (| System timer |
| |) 1 | Standard 101/102-Key or Microsoft Natural PS/2 Keyboard |
| ISA 🦪 🖉 |) 3 | Communications Port (COM2) |
| ISA |) 4 | Communications Port (COM1) |
| ISA |) 8 (| System CMOS/real time clock |
| ISA |) 9 | Microsoft ACPI-Compliant System |
| |) 10 | Communications Port (COM4) |
| ISA |) 11 | Communications Port (COM3) |
| ISA |) 13 | Numeric data processor |
| - 📇 (ISA |) 14 | Primary IDE Channel |
| PCI |) 15 | Intel(R) 82801G (ICH7 Family) SMBus Controller - 27DA |
| PCI |) 16 | Intel(R) 82801G (ICH7 Family) PCI Express Root Port - 27D0 |
| PCI |) 16 | Intel(R) 82801G (ICH7 Family) USB Universal Host Controller - 27CB |
| PCI |) 16 | Microsoft UAA Bus Driver for High Definition Audio |
| PCI |) 16 | Mobile Intel(R) 945 Express Chipset Family |
| PCI |) 16 | Realtek PCIe GBE Family Controller |
| PCI |) 18 | Intel(R) 82801G (ICH7 Family) USB Universal Host Controller - 27CA |
| PCI |) 19 | Intel(R) 82801G (ICH7 Family) USB Universal Host Controller - 27C9 |
| PCI |) 19 | Intel(R) 82801GBM/GHM (ICH7-M Family) Serial ATA Storage Controller - 27C4 |
| PCI |) 23 | Intel(R) 82801G (ICH7 Family) USB Universal Host Controller - 27C8 |
| PCI |) 23 | Intel(R) 82801G (ICH7 Family) USB2 Enhanced Host Controller - 27CC |

B.4 DMA Channel Assignments

Direct memory access (DMA)
