Packing List

Before you begin installing your card, please make sure that the following materials have been shipped:

- 1 DVD-ROM for Manual (in PDF Format) and Drivers
- 1 TKS-G21-QM77B

If any of these items should be missing or damaged, please contact your distributor or sales representative immediately.

General Information

1.1 Introduction

The newest EmBox series TKS-G21-QM77B has been introduced by AAEON and it utilizes Intel® 3rd Generation Core™ processor. In this era of information explosion, the advertising of consumer products will not be confined to the family television, but will also be spread to high-traffic public areas, like department stores, the bus, transportation station, the supermarket etc. The advertising marketing industry will resort to every conceivable means to transmit product information to consumers. System integrators will need a multifunction device to satisfy commercial needs for such public advertising.

The TKS-G21-QM77B is designed for indoor environments due to the following reasons; first, the TKS-G21-QM77B offers high performance system that while operating in ambient temperatures ranging from 0° to 50°C. The TKS-G21-QM77B is a standalone high performance controller designed for long-life operation and with high reliability. It can replace traditional methods and become the mainstream controller for the multimedia entertainment market.

1.2 Features

- Intel® Core™ i7/Celeron® Processor
- Intel® QM77/HM76
- 204-pin DDR3 1600 MHz SODIMM x 1, Up to 8 GB
- Gigabit Ethernet x 2
- HDMI X 1, VGA x 1
- Line-Out, Mic-In
- SATA 3.0Gb/s x 2 (Optional RAID), CFast™ x 1
- USB3.0 x 2, USB2.0 x 2, COM x 3, 8-Bit Digital I/O
- Mini Card x 1
- +12V Only Operation
- Supports iAMT with Intel® QM77 and Core™ i7 Processors
Only

1.3 Specifications

CPU		Onboard Intel® Core™ i7-3555LE/Celeron® 847E BGA Processors less than 25W
Chipset		Intel® QM77/HM76 PCH
System Memory		204-pin DDR3 1333/1600 MHz SODIMM x 1, Max. 8 GB
Display Interface	VGA	D-SUB 15 x 1
	HDMI	HDMI x 1
Storage Device	SSD	CFast™ x 1
	SATA	SATA 3.0Gb/s x 2 (Optional RAID)
Network	LAN	Intel 82579LM Gigabit PHY x1 & Realtek RTL-8111E Gigabit x 1, RJ-45 x 2
	Wireless	—
Front I/O	USB Host	USB Type A x 2
	Serial Port	COM x 1
	Audio	Line-out, Mic-in
Rear I/O	USB Host	USB3.0 Type A x 2
	LAN	RJ-45 x 2
	Serial Port	COM x 2
	DIO	8-bit (Programmable) x 1
	KB/MS	Through USB port
Expansion	Mini Card	Mini Card x 1 (Internal)
Indicator	Front	Power LED x 1, HDD LED x 1
Power Requirement		+12V DC Input, ATX type

Thermal Solution	Fanless
Mounting	Wallmount (optional)
Operating Temperature	32°F ~ 122°F (0°C ~ 50°C)
Storage Temperature	-40°F ~ 176°F (-40°C ~ 80°C)
Anti-Vibration	5 g rms/ 5 ~ 500Hz/ random operation (CFast™) 1 g rms/ 5 ~ 500Hz/ random operation (Internal Hard Disk Drive active Module)
Anti-Shock	50 G peak acceleration (11 msec. duration) (CFast™) 20 G peak acceleration (11 msec. duration) (Hard Disk Drive Module)
Certification EMC	CE/FCC Class A
Dimension	7.79" x 7.08" x 2.48" (198mm x 180mm x 63mm)
Gross Weight	4.85 lb (2.2 kg) (Heavy duty steel)
OS Support	Windows® XP Pro, Windows® 7, Windows® 8, Linux Fedora

Chapter

2

**Quick
Installation
Guide**

2.1 Safety Precautions

Warning!

Always completely disconnect the power cord from your board whenever you are working on it. Do not make connections while the power is on, because a sudden rush of power can damage sensitive electronic components.

Caution!

Always ground yourself to remove any static charge before touching the board. Modern electronic devices are very sensitive to static electric charges. Use a grounding wrist strap at all times. Place all electronic components on a static-dissipative surface or in a static-shielded bag when they are not in the chassis

2.2 Mechanical Drawing of TKS-G21-QM77B

2.3 A Quick Tour of the TKS-G21-QM77B

Before you start to set up the TKS-G21-QM77B, take a moment to become familiar with the locations and purposes of the controls, drives, connections and ports, which are illustrated in the figures (Figure 2.1 to Figure 2.4) below.

Figure 2.1 Front View of the TKS-G21-QM77B

Figure 2.2 Rear View of the TKS-G21-QM77B

Figure 2.3 Top View of the TKS-G21-QM77B

Figure 2.4 Bottom View of the TKS-G21-QM77B

2.4 Hard Disk Installation

Step 1: Unfasten the screws on the top of cover.

Step 2: Fasten the four HDD screws and black damper, and then you can put the HDD on the opposite side for screwing

Step 3: Putting the HDD with the HDD bracket in by 45 degree height and make sure the bracket holes are matched with the chassis stand.

Step 4: Fasten the four screws of the HDD bracket and connect the HDD and power cables to the motherboard (GENE-GM77).

2.5 Accessory Installation

Step 1: Unfasten the 5 screws of I/O cover which is on the bottom of the chassis.

Step 2: Remove the I/O cover and you can see the inside placements of RAM, CFast card, Mini Card (Mini PCIe) slot for installation.

Step: 2-1: Insert the memory module to the Memory slot and push the module down until it has been locked by the two latches on the sides firmly.

Step 2-2: Insert the Mini Card module to the Mini Card slot. Push the module down until the module has been locked by two latches on the sides firmly.

Step 2-3: Insert the Compact-Fast card to CFast slot. Put the card bracket and fasten the screws.

Step 3: Put I/O cover back to the bottom of the chassis and fasten 5 screws

2.6 Wallmount Kit Installation

Get the brackets ready and fasten appropriate four screws on brackets. After fastening the two brackets on the bottom lid, the wallmount kit installation has been finished.

Note: the wallmount kit is optional.

2.7 List of Jumpers

The board has a number of jumpers that allow you to configure your system to suit your application.

The table below shows the function of each of the board's jumpers:

Label	Function
JP8	COM2 Pin8 Function Selection
JP9	Front Panel Connector
JP11	Clear CMOS Jumper
JP12	AT/ATX Power Supply Mode Selection

2.8 List of Connectors

The board has a number of connectors that allow you to configure your system to suit your application. The table below shows the function of each board's connectors:

Label	Function
CN2	External +12V Input
CN3	USB 2.0 Ports 7 and 8
CN6	External +5VSB Input
CN8	Audio I/O Port
CN11	COM Port 2
CN12	LPT / Digital I/O Port
CN13	COM Port 3
CN14	LPC Port
CN15	COM Port 4
CN18	+5VSB Output w/SMBus
CN20	CPU FAN
CN21	HDMI Port
CN22	+5V Output for SATA HDD
CN23	Realtek LAN (RJ-45) Port
CN24	Intel LAN (RJ-45) Port
CN25	USB Ports 1 and 2
CN26	VGA / DVI Ports (depend on hardware configuration)
CN28	CFast Slot
CN29	DDR3 SODIMM Slot

CN30	Mini Card Slot
SATA1	SATA Port1 Connector
SATA2	SATA Port 2 Connector

2.9 Setting Jumpers

You configure your card to match the needs of your application by setting jumpers. A jumper is the simplest kind of electric switch. It consists of two metal pins and a small metal clip (often protected by a plastic cover) that slides over the pins to connect them. To “close” a jumper you connect the pins with the clip.

To “open” a jumper you remove the clip. Sometimes a jumper will have three pins, labeled 1, 2 and 3. In this case you would connect either pins 1 and 2 or 2 and 3.

A pair of needle-nose pliers may be helpful when working with jumpers.

If you have any doubts about the best hardware configuration for your application, contact your local distributor or sales representative before you make any change.

Generally, you simply need a standard cable to make most connections.

2.10 Front Panel Connector (JP9)

Pin	Signal
1	PWR_BTN-
2	PWR_BTN+
3	HDD_LED-
4	HDD_LED+
5	SPEAKER-
6	SPEAKER+
7	PWR_LED-
8	PWR_LED+
9	H/W RESET-
10	H/W RESET+

2.11 Clear CMOS (JP11)

JP11	Function
1-2	Normal (Default)
2-3	Clear CMOS

2.12 COM Port #2 RS-232/422/485 Selection (CN11)

COM2 RS-232/422/485 selection for AAEON TKS series is set in BIOS setting as following:

Entering BIOS Setting Menu: Choose "Advanced→ Super IO Configuration → Serial Port 2 Configuration". (Default setting is at "RS-232")

Different devices implement the RS-232/422/485 standard in different ways. If you have problems with a serial device, check the pin assignments below for the connector.

RS-232 Mode

Pin	Signal	Pin	Signal
1	DCDB	2	DSRB
3	RXB	4	RTSB
5	TXB	6	CTSB
7	DTRB	8	RIB
9	Ground	10	N/C

RS-422 Mode

Pin	Signal	Pin	Signal
1	TXD-	2	N/C

3	RXD+	4	N/C
5	TXD+	6	N/C
7	RXD-	8	N/C
9	Ground	10	N/C

RS-485 Mode

Pin	Signal	Pin	Signal
1	TXD-	2	N/C
3	N/C	4	N/C
5	TXD+	6	N/C
7	N/C	8	N/C
9	Ground	10	N/C

Note:

Issue: COM port limitation for the speed test during the communication.

Root Cause:

In serial communication, data bits received at the serial port are bundled into a byte and transmitted into the serial port hardware buffer. From the buffer, the byte is sent into the CPU. If a new byte arrives before the byte in the buffer is moved into the CPU, a Hardware Overrun Error occurs.

Solution:

1. Try hardware handshaking.
2. See if the UART is an older un-buffered version or a new buffered UART (such as a 16550A or 16750). You should use a buffered UART for the reasons discussed above.
3. Change the Receive (Rx Trigger) buffer to 8, 4, or 1 (1 is a last resort).
4. For the product, the speed setting of Series Port (COM) is under 9600bps.

2.13 Digital I/O Connector (CN12)

This connector offers 4-pair of digital I/O function.

BIOS using the I2C Bus to read/write internal DIO registers and the Serial Bus address is 0xA06.

The pin definitions are illustrated below:

Pin	Signal	Pin	Signal
1	DIO_IN0	2	DIO_IN1
3	DIO_IN2	4	DIO_IN3
5	DIO_OUT0	6	DIO_OUT1
7	DIO_OUT2	8	DIO_OUT3
9	+5 Volt.	10	Ground

Note: The max. rating of Pin 1 ~ Pin 8 is 5V@8mA
The max. rating of Pin 9 is 5V@0.5A

BIOS Setting	Connector Definition	Address (Register)	IT8728 GPIO Setting
GPIO1/DIO_IN0	Pin 1	Bit 0@A06h	U18 Pin 109 (GPIO 70)
GPIO2/DIO_IN1	Pin 2	Bit 1@A06h	U18 Pin 110 (GPIO 71)
GPIO3/DIO_IN2	Pin 3	Bit 2@A06h	U18 Pin 111 (GPIO 72)
GPIO4/DIO_IN3	Pin 4	Bit 3@A06h	U18 Pin 112 (GPIO 73)
GPIO5/DIO_OUT0	Pin 5	Bit 0@A07h	U18 Pin 113 (GPIO 74)
GPIO6/DIO_OUT1	Pin 6	Bit 1@A07h	U18 Pin 114 (GPIO 75)
GPIO7/DIO_OUT2	Pin 7	Bit 2@A07h	U18 Pin 115 (GPIO 76)
GPIO8/DIO_OUT3	Pin 8	Bit 3@A07h	U18 Pin 116 (GPIO 77)

Below Table for China RoHS Requirements

产品中有毒有害物质或元素名称及含量

AAEON Main Board/ Daughter Board/ Backplane

部件名称	有毒有害物质或元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
印刷电路板 及其电子组件	×	○	○	○	○	○
外部信号 连接器及线材	×	○	○	○	○	○
<p>O: 表示该有毒有害物质在该部件所有均质材料中的含量均在 SJ/T 11363-2006 标准规定的限量要求以下。</p> <p>X: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T 11363-2006 标准规定的限量要求。</p> <p>备注：此产品所标示之环保使用期限，系指在一般正常使用状况下。</p>						

Chapter

3

**AMI
BIOS Setup**

3.1 System Test and Initialization

These routines test and initialize board hardware. If the routines encounter an error during the tests, you will either hear a few short beeps or see an error message on the screen. There are two kinds of errors: fatal and non-fatal. The system can usually continue the boot up sequence with non-fatal errors.

System configuration verification

These routines check the current system configuration against the values stored in the CMOS memory. If they do not match, the program outputs an error message. You will then need to run the BIOS setup program to set the configuration information in memory.

There are three situations in which you will need to change the CMOS settings:

1. You are starting your system for the first time
2. You have changed the hardware attached to your system
3. The CMOS memory has lost power and the configuration information has been erased.

The TKS-G21-QM77B CMOS memory has an integral lithium battery backup for data retention. However, you will need to replace the complete unit when it finally runs down.

3.2 AMI BIOS Setup

AMI BIOS ROM has a built-in Setup program that allows users to modify the basic system configuration. This type of information is stored in battery-backed CMOS RAM so that it retains the Setup information when the power is turned off.

Entering Setup

Power on the computer and press or <F2> immediately. This will allow you to enter Setup.

Main

Set the date, use tab to switch between date elements.

Advanced

Advanced BIOS Features Setup including TPM, ACPI, etc.

Chipset

Host bridge parameters.

Boot

Enables/disable quiet boot option.

Security

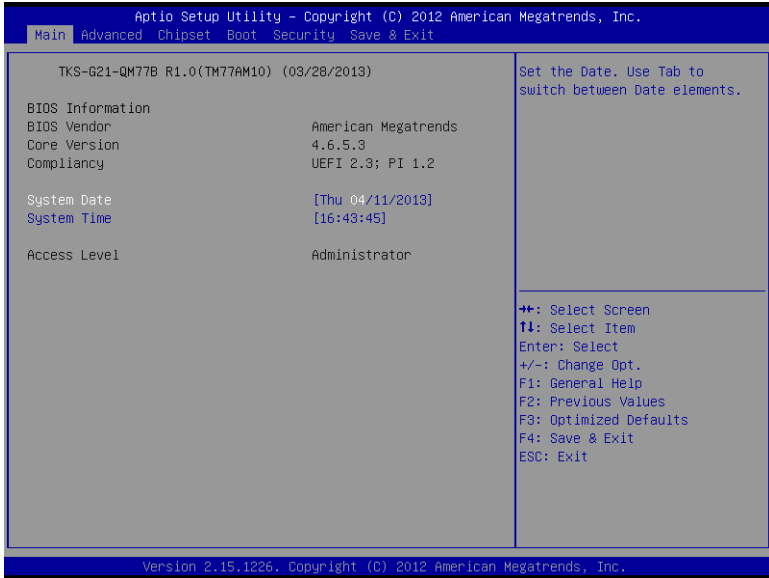

Set setup administrator password.

Save&Exit

Exit system setup after saving the changes.

Setup Menu

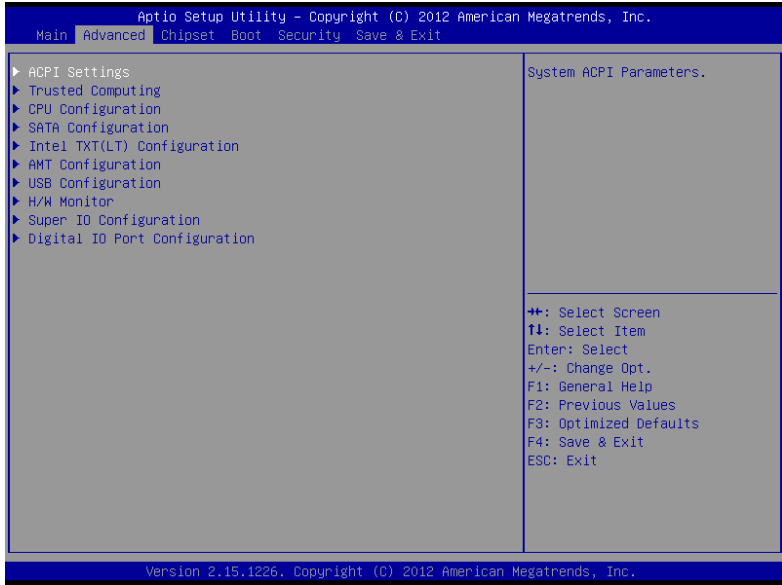

Setup submenu: Main

Options summary: (**default setting**)

System Date	Day MM:DD:YYYY	
Change the month, year and century. The 'Day' is changed automatically.		
System Time	HH : MM : SS	
Change the clock of the system.

Administrator	Not set	
Password/ User Password		

You can install a Supervisor password, and if you install a supervisor password, you can then install a user password. A user password does not provide access to many of the features in the Setup utility.

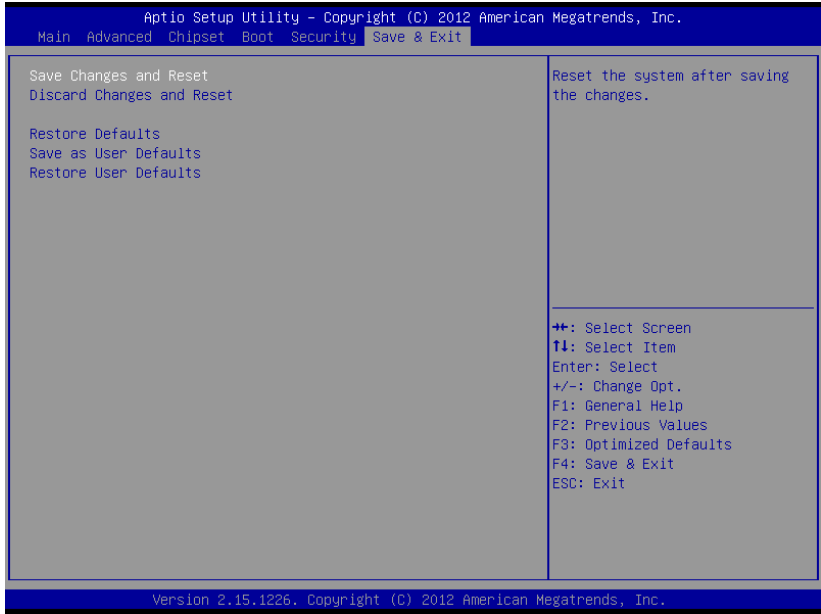

Install the Password:

Press Enter on this item, a dialog box appears which lets you enter a password. You can enter no more than six letters or numbers. Press Enter after you have typed in the password. A second dialog box asks you to retype the password for confirmation. Press Enter after you have retyped it correctly. The password is required at boot time, or when the user enters the Setup utility.

Removing the Password:

Highlight this item and type in the current password. At the next dialog box press Enter to disable password protection.

Setup submenu: Exit

**Driver
Installation**

The TKS-G21-QM77B comes with an AutoRun DVD-ROM that contains all drivers and utilities that can help you to install the driver automatically.

Insert the driver DVD, the driver DVD-title will auto start and show the installation guide. If not, please follow the sequence below to install the drivers.

Follow the sequence below to install the drivers:

- Step 1 – Install Chipset Driver
- Step 2 – Install VGA Driver
- Step 3 – Install LAN1 Driver (Intel® LAN Chip)
- Step 4 – Install LAN2 Driver (Realtek LAN Chip)
- Step 5 – Install Audio Driver
- Step 6 – Install ME Driver
- Step 7 – Install RAID & AHCI Driver
- Step 8 – Install TPM Driver
- Step 9 – Install USB3.0 Driver

Please read instructions below for further detailed installations.

4.1 Installation:

Insert the TKS-G21-QM77B DVD-ROM into the DVD-ROM drive.
And install the drivers from Step 1 to Step 10 in order.

Step 1 – Install Chipset Driver

1. Click on the **STEP 1-CHIPSET** folder and select the OS folder your system is
2. Double click on the **infinst_autol.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Step 2 – Install VGA Driver

1. Click on the **STEP2-VGA** folder and select the OS folder your system is
2. Double click on the **Setup.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Note 1:

- This motherboard supports VGA and LVDS display devices. In Single Display mode, use the hot keys to switch between VGA to LVDS device or vice versa. By default, press **<Ctrl>+<Alt>+<F1>** to switch to VGA device and press **<Ctrl>+<Alt>+<F3>** to switch to LVDS device.
- Before removing the current display device, connect the display device that you want to use, and then press the hot keys to switch to that device.

Note 2: If the OS is Windows® XP, you have to install the driver of

dotNet Framework first. Simply click on **dotnetfx35.exe** located in **dotNet Framework** folder.

Step 3 –Install LAN1 Driver (Intel® LAN Chip)

1. Click on the **STEP3-LAN1(Intel)** folder and select the OS folder your system is
2. Double click on the **.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Step 4 –Install LAN2 Driver (Realtek LAN Chip)

1. Click on the **STEP4-LAN2(Realtek)** folder and select the OS folder your system is
2. Double click on the **setup.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Step 5 –Install Audio Driver

1. Click on the **STEP5-AUDIO** folder and select the OS folder your system is
2. Double click on the **Setup.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Step 6 – Install ME Driver

1. Click on the **STEP6-ME SW** folder and select the OS

- folder your system is
2. Double click on the **Setup.exe** file located in each OS folder
 3. Follow the instructions that the window shows
 4. The system will help you install the driver automatically

Step 7 – Install RAID & AHCI Driver

Please refer to the **Appendix D RAID & AHCI Setting**

Step 8 – Install TPM Driver

1. Click on the **STEP8-TPM** folder and select the OS folder your system is
2. Double click on the **Setup.exe** file located in each OS folder
3. Follow the instructions that the window shows

The system will help you install the driver automatically

Step 9 –Install USB3.0 Driver

1. Click on the **STEP9-USB 3.0** folder and select the OS folder your system is
2. Double click on the **Setup.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Appendix

A

Programming the Watchdog Timer

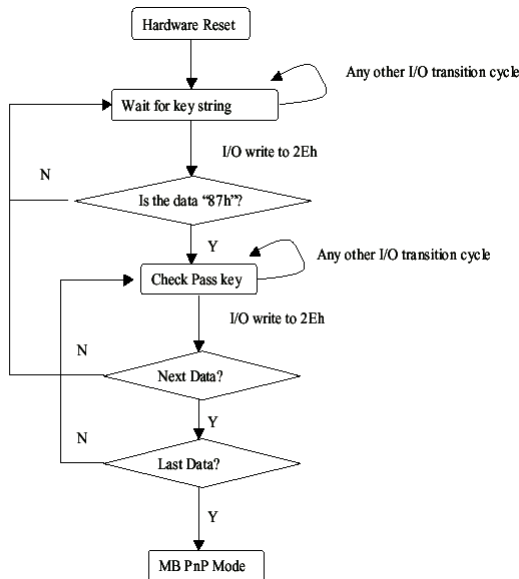

A.1 Programming

TKS-G21-QM77B utilizes ITE IT8728F chipset as its watchdog timer controller.

Below are the procedures to complete its configuration and the AAeon initial watchdog timer program is also attached based on which you can develop customized program to fit your application.

Configuring Sequence Description

After the hardware reset or power-on reset, the ITE 8728F enters the normal mode with all logical devices disabled except KBC. The initial state (enable bit) of this logical device (KBC) is determined by the state of pin 121 (DTR1#) at the falling edge of the system reset during power-on reset.

There are three steps to complete the configuration setup: (1) Enter the MB PnP Mode; (2) Modify the data of configuration registers; (3) Exit the MB PnP Mode. Undesired result may occur if the MB PnP Mode is not exited normally.

(1) Enter the MB PnP Mode

To enter the MB PnP Mode, four special I/O write operations are to be performed during Wait for Key state. To ensure the initial state of the key-check logic, it is necessary to perform four write operations to the Special Address port (2EH). Two different enter keys are provided to select configuration ports (2Eh/2Fh) of the next step.

	Address Port	Data Port
87h, 01h, 55h, 55h:	2Eh	2Fh

(2) Modify the Data of the Registers

All configuration registers can be accessed after entering the MB PnP Mode. Before accessing a selected register, the content of Index 07h must be changed to the LDN to which the register belongs, except some Global registers.

(3) Exit the MB PnP Mode

Set bit 1 of the configure control register (Index=02h) to 1 to exit the MB PnP Mode.

WatchDog Timer Configuration Registers

LDN Index R/W Reset Configuration Register or Action				
All	02H	W	N/A	Configure Control
07H	71H	R/W	00H	WatchDog Timer Control Register
07H	72H	R/W	00H	WatchDog Timer Configuration Register
07H	73H	R/W	00H	WatchDog Timer Time-out Value Register

Configure Control (Index=02h)

This register is write only. Its values are not sticky; that is to say, a hardware reset will automatically clear the bits, and does not require the software to clear them.

Bit	Description
7-2	Reserved
1	Returns to the Wait for Key state. This bit is used when the configuration sequence is completed
0	Resets all logical devices and restores configuration registers to their power-on states.

WatchDog Timer Control Register (Index=71h, Default=00h)

Bit	Description
7	WDT is reset upon a CIR interrupt
6	WDT is reset upon a KBC (mouse) interrupt
5	WDT is reset upon a KBC (keyboard) interrupt
4	WDT is reset upon a read or a write to the Game Port base address
3-2	Reserved
1	Force Time-out. This bit is self-clearing
0	WDT Status
	1: WDT value reaches 0.
	0: WDT value is not 0

WatchDog Timer Configuration Register (Index=72h, Default=00h)

Bit	Description
7	WDT Time-out value select
	1: Second
	0: Minute
6	WDT output through KRST (pulse) enable
5-4	Reserved
3-0	Select the interrupt level ^{Note} for WDT

WatchDog Timer Time-out Value Register (Index=73h, Default=00h)

Bit	Description
7-0	WDT Time-out value 7-0

B.2 Memory Address Map

Address Range	Device Name
[000A0000 - 000BFFFF]	Intel(R) HD Graphics 4000
[000A0000 - 000BFFFF]	PCI bus
[000D0000 - 000D3FFF]	PCI bus
[000D4000 - 000D7FFF]	PCI bus
[000D8000 - 000DBFFF]	PCI bus
[000DC000 - 000DFFFF]	PCI bus
[000E0000 - 000E3FFF]	PCI bus
[000E4000 - 000E7FFF]	PCI bus
[20000000 - 201FFFFFF]	System board
[40004000 - 40004FFF]	System board
[DFA00000 - DFA00FFF]	Motherboard resources
[DFA00000 - FEFFFFFF]	PCI bus
[E0000000 - EFFFFFFF]	Intel(R) HD Graphics 4000
[F0000000 - F0003FFF]	Realtek PCIe GBE Family Controller
[F0000000 - F00FFFFFF]	Intel(R) 7 Series/C216 Chipset Family PCI Express Root Port 2 - 1E12
[F7800000 - F7BFFFFF]	Intel(R) HD Graphics 4000
[F7C00000 - F7C00FFF]	Realtek PCIe GBE Family Controller
[F7C00000 - F7CFFFFFF]	Intel(R) 7 Series/C216 Chipset Family PCI Express Root Port 2 - 1E12
[F7D00000 - F7D1FFFF]	Intel(R) 82579LM Gigabit Network Connection
[F7D20000 - F7D2FFFF]	Intel(R) USB 3.0 eXtensible Host Controller
[F7D30000 - F7D33FFF]	High Definition Audio Controller
[F7D35000 - F7D350FF]	Intel(R) 7 Series/C216 Chipset Family SMBus Host Controller - 1E22
[F7D36000 - F7D363FF]	Intel(R) 7 Series/C216 Chipset Family USB Enhanced Host Controller - 1E26
[F7D37000 - F7D373FF]	Intel(R) 7 Series/C216 Chipset Family USB Enhanced Host Controller - 1E2D
[F7D38000 - F7D38FFF]	Intel(R) 82579LM Gigabit Network Connection
[F7D39000 - F7D39FFF]	Intel(R) Active Management Technology - SOL (COM5)
[F7D3B000 - F7D3B0FF]	Intel(R) Management Engine Interface
[F8000000 - FBFFFFFF]	Motherboard resources
[FED00000 - FED003FF]	High precision event timer
[FED10000 - FED17FFF]	Motherboard resources
[FED18000 - FED18FFF]	Motherboard resources
[FED19000 - FED19FFF]	Motherboard resources
[FED19000 - FED19FFF]	Motherboard resources
[FED1C000 - FED1FFFF]	Motherboard resources
[FED20000 - FED3FFFF]	Motherboard resources
[FED40000 - FED44FFF]	System board
[FED45000 - FED8FFFF]	Motherboard resources
[FED90000 - FED93FFF]	Motherboard resources
[FEE00000 - FEEFFFFFF]	Motherboard resources
[FF000000 - FFFFFFFF]	Intel(R) 82802 Firmware Hub Device
[FF000000 - FFFFFFFF]	Motherboard resources

B.3 IRQ Mapping Chart

B.4 DMA Channel Assignments

-  Direct memory access (DMA)
-  4 Direct memory access controller

Appendix

C

Mating Connector

C.1 List of Mating Connectors and Cables

The table notes mating connectors and available cables.

Connector Label	Function	Mating Connector		Available Cable	Cable P/N
		Vendor	Model number		
CN1	LVDS#1 Inverter Connector	JST	PHR-5	N/A	N/A
CN2	+12V Vin Connector	N/A	N/A	Power Cable	1702002010
CN3	USB Port #7, #8 Connector	Molex	51110-1050	USB Cable	1709100201
CN4	USB Port #5, #6 Connector	Molex	51110-1050	USB Cable	1709100201
CN5	USB Port #3, #4 Connector	Molex	51110-1050	USB Cable	1709100201
CN6	External +5VSB Power Input and PS_ON#	JST	XHP-3	ATX Cable	170220020B
CN7	LVDS#2 Inverter Connector	JST	PHR-5	N/A	N/A
CN8	Audio Connector	Molex	51021-1000	Audio Cable	1709100254
CN9	LVDS#1 Connector	HIROSE	DF13-30DS-1.25C	N/A	N/A
CN10	LVDS#2 Connector	HIROSE	DF13-30DS-1.25C	N/A	N/A
CN11	COM Port 2 Connector	Molex	51021-0900	Serial Port Cable	1701090150
CN12	LPT / Digital IO Port	Molex	51110-2650	Parallel Port Cable	1701260200
CN13	COM Port 3 Connector	Molex	51021-0900	Serial Port Cable	1701090150

CN14	LPC Port	JST	SHR-12V-S-B	AAEON LPC Cable	1703120130
CN15	COM Port 4 Connector	Molex	51021-0900	Serial Port Cable	1701090150
CN16	UIM Connector	Molex	51021-0600	N/A	N/A
CN17	P/S2 KB/MS Connector	JST	PHDR-06VS	P/S2 KB/MS Cable	1700060152
CN18	External AUX Power and PS_ON#	JST	PHR-6	N/A	N/A
CN19	Touch Screen Connector	JST	SHR-9V-S-B	N/A	N/A
CN20	CPU Fan Connector	Molex	22-01-2035	N/A	N/A
CN22	+5Vout Connector	JST	PHR-2	2 Pins For HDD Power	1702150155
BAT1	External RTC Connector	Molex	51021-0200	Battery Cable	175011901C

Appendix

D

RAID & AHCI Settings

D.1 Setting RAID

OS installation to setup RAID mode

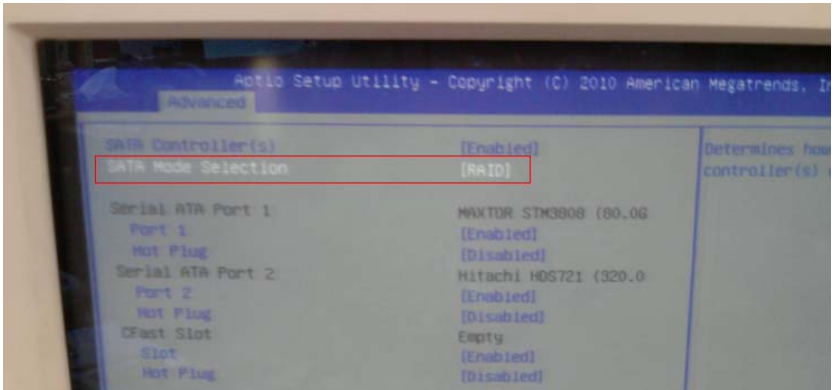

Step 1: Copy the files below from the Driver CD:

STEP7-RAID&AHCI\WINXP_32 to Disk.

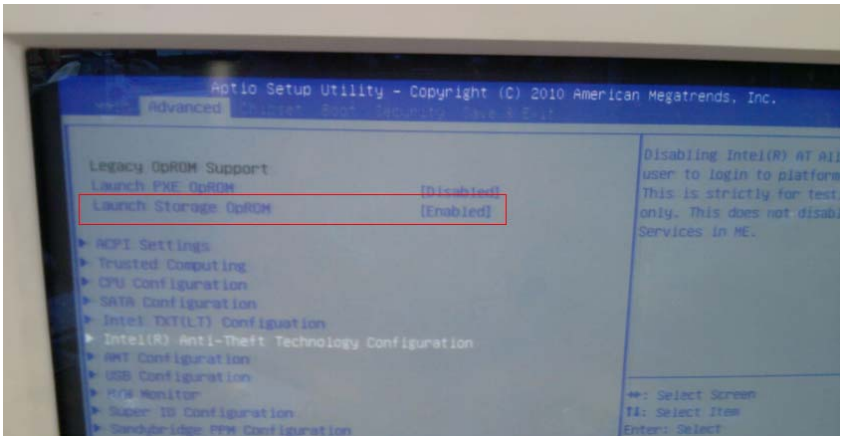

Step 2: Connect the USB Floppy (Disk with the RAID&AHCI files) to the board.

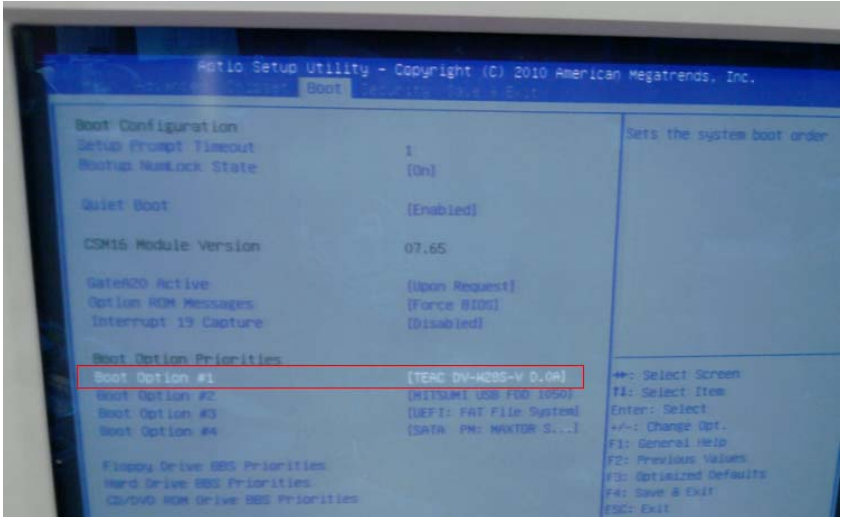

Step 3: The setting procedures “In BIOS Setup Menu”: Select **Advanced -> SATA Configuration -> SATA Mode Selection -> RAID**

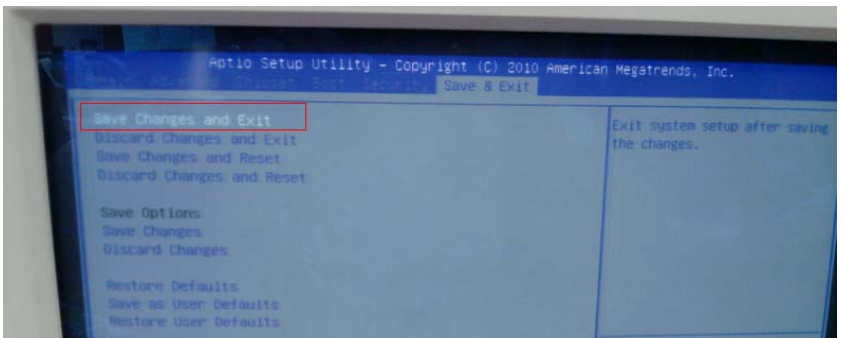

Step 4: Select **Advanced -> Launch Storage OpROM -> Enabled**

Step 5: Select **Boot** -> **Boot Option #1** -> **DVD ROM Type**

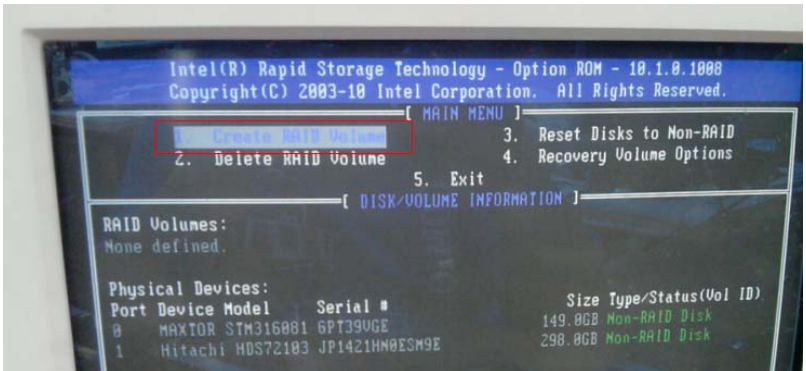

Step 6: Select **Save & Exit** -> **Save Changes and Exit**

Step 7: Press “**Ctrl-I**” to enter MAIN MENU

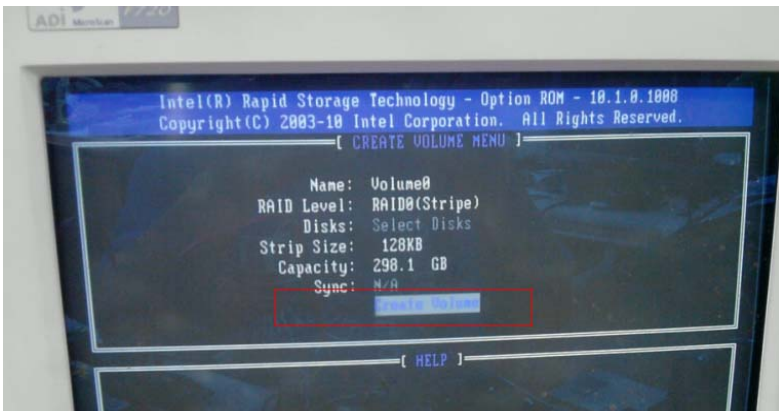

Step 8: Select “**1. Create RAID Volume**”

Step 9: Select **RAID Level** -> **RAID0(Stripe)**

Step 10: Select **"Create Volume"**

Step 11: Type “Y” for confirmation

Step 12: Select “5. Exit”

Step 13: Choose "Y"

Step 14: Setup OS

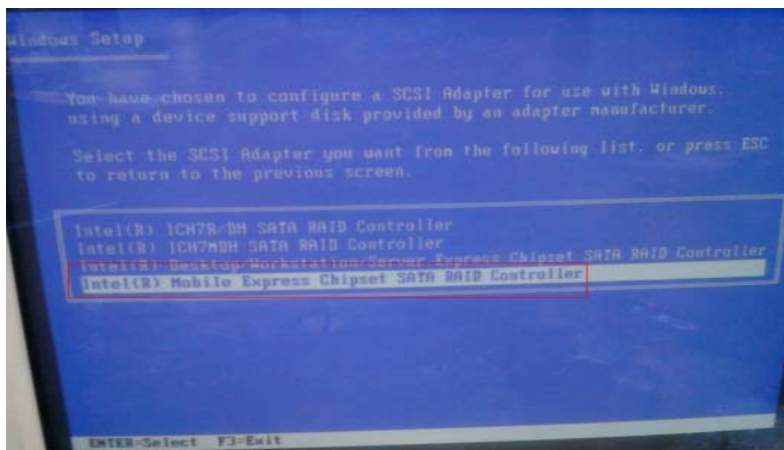

Step 15: Press "F6"

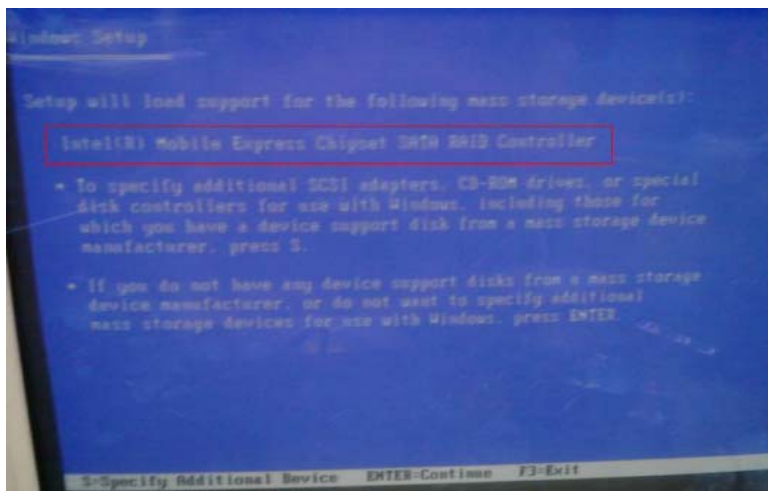

Step 16: Choose "S"

Step 17: Select the “Intel® Mobile Express Chipset SATA RAID Controller”

Step 18: Select “ENTER” after choosing the model number.

Step 19: Setup is loading files.

D.2 Setting AHCI

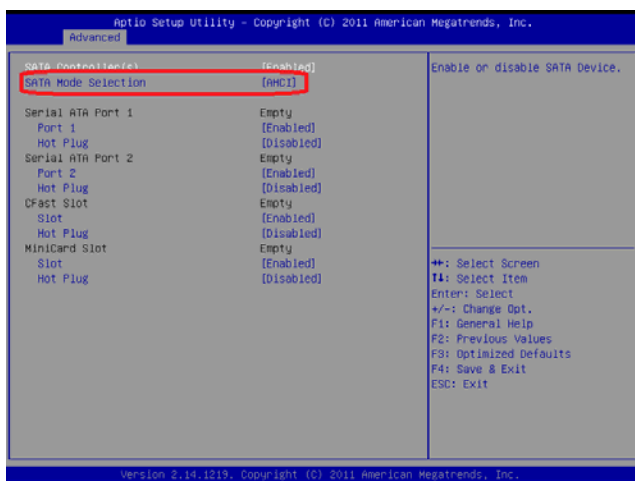

OS installation to SETUP AHCI Mode

Step 1: Copy below files from “Driver CD -> STEP7 - AHCI\WinXP_32” and to diskette.

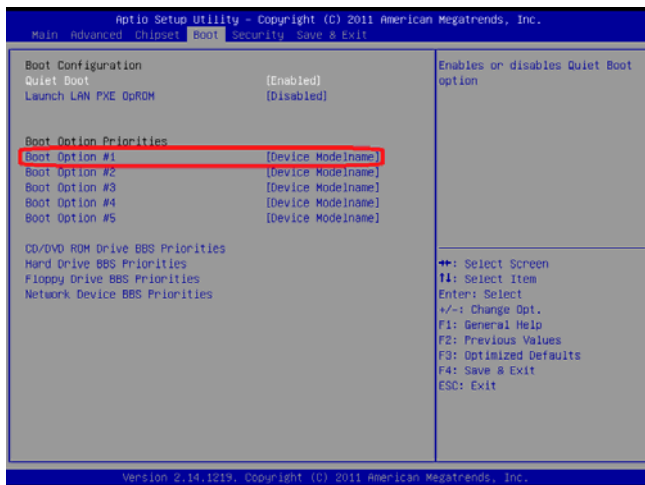

Step 2: Connect the USB Floppy drive to the system and insert the diskette from previous step.

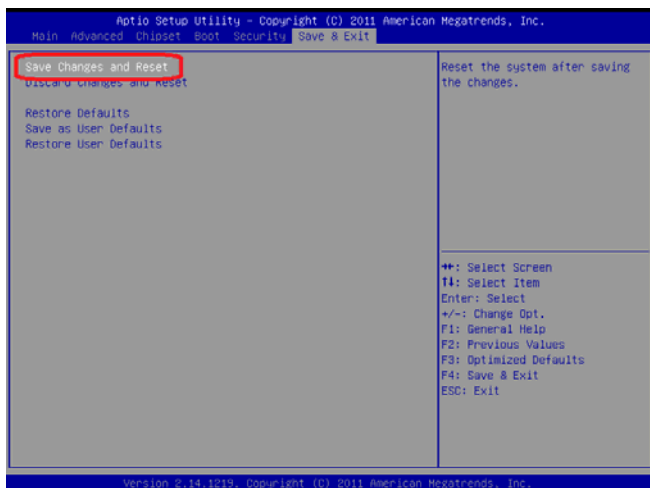

Step 3: Configure SATA Controller to AHCI mode in **BIOS SETUP Menu: Advanced -> SATA Configuration -> SATA Mode Selection-> AHCI Mode**

Step 4: Configure DVD/CD-ROM drive as the first boot device.

Step 5: Save changes and exit BIOS SETUP

Step 6 – Boot to DVD/CD-ROM device to install OS

Step 7 – Press “F6” to install AHCI driver

Step 8 – Press “S” to install AHCI driver

Step 9 – Choose “**Intel(R) 7 Series Chipset Family SATA AHCI Controller**”

Step 10 – Windows Setup will display the controller name you selected in previous step and continue to install OS when “**ENTER**” pressed.

Appendix

E

Digital I/O Ports

E.1 Electrical Specifications for Digital I/O Ports

Table 1 : Digital Input/Output Pin Electrical Specification						
Pin	Type	Input Threshold Voltage		Output Voltage		Note
		Low	High	Low	High	
DIO1	I/O	0.8	2.2	0	3.3	
DIO2	I/O	0.8	2.2	0	3.3	
DIO3	I/O	0.8	2.2	0	3.3	
DIO4	I/O	0.8	2.2	0	3.3	
DIO5	I/O	0.8	2.2	0	3.3	
DIO6	I/O	0.8	2.2	0	3.3	
DIO7	I/O	0.8	2.2	0	3.3	
DIO8	I/O	0.8	2.2	0	3.3	

Note: All DIO pins are **not** 5V tolerance in input mode.

E.2 DIO Programming

TKS-G21-QM77B utilizes ITE IT8728F chipset as its Digital I/O controller. Below are the procedures to complete its configuration and the AAEON initial DIO program is also attached based on which you can develop customized program to fit your application. There are three steps to complete the configuration setup: (1) Enter the MB PnP Mode; (2) Modify the data of configuration registers; (3) Exit the MB PnP Mode. Undesired result may occur if the MB PnP Mode is not exited normally.

E.3 Digital I/O Register

Table 2 : SuperIO relative register table		
	Default Value	Note
Index	0x2E	SIO MB PnP Mode Index Register 0x2E or 0x4E
Data	0x2F	SIO MB PnP Mode Data Register 0x2F or 0x4F

Table 3 : Digital Input/Output relative register table				
	LDN	Register	BitNum	Note
GPIO1 Direction	0x07	0xCE	0	0:input, 1: output
GPIO2 Direction	0x07	0xCE	1	
GPIO3 Direction	0x07	0xCE	2	
GPIO4 Direction	0x07	0xCE	3	
GPIO5 Direction	0x07	0xCF	0	
GPIO6 Direction	0x07	0xCF	1	
GPIO7 Direction	0x07	0xCF	2	
GPIO8 Direction	0x07	0xCF	3	

Table 4: Digital Input/Output relative IO address table			
	IO Address	BitNum	Note
GPIO1 State	0x0A06	0	0:input, 1: output
GPIO2 State	0x0A06	1	
GPIO3 State	0x0A06	2	
GPIO4 State	0x0A06	3	
GPIO5 State	0x0A07	0	
GPIO6 State	0x0A07	1	
GPIO7 State	0x0A07	2	
GPIO8 State	0x0A07	3
