Packing List

Before setting up your product, please make sure the following items have been shipped:

Item	Quantity
● UP-APL03 (UP 4000) with heatsink	1

If any of these items are missing or damaged, please contact your distributor or sales representative immediately.

About this Document

This User’s Manual contains all the essential information, such as detailed descriptions and explanations on the product’s hardware and software features (if any), its specifications, dimensions, jumper/connector settings/definitions, and driver installation instructions (if any), to facilitate users in setting up their product.

Users may refer to the product page at AAEON.com for the latest version of this document.

Safety Precautions

Please read the following safety instructions carefully. It is advised that you keep this manual for future references

1. All cautions and warnings on the device should be noted.
2. Make sure the power source matches the power rating of the device.
3. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
4. Always completely disconnect the power before working on the system's hardware.
5. No connections should be made when the system is powered as a sudden rush of power may damage sensitive electronic components.
6. If the device is not to be used for a long time, disconnect it from the power supply to avoid damage by transient over-voltage.
7. Always disconnect this device from any AC supply before cleaning.
8. While cleaning, use a damp cloth instead of liquid or spray detergents.
9. Make sure the device is installed near a power outlet and is easily accessible.
10. Keep this device away from humidity.
11. Place the device on a solid surface during installation to prevent falls
12. Do not cover the openings on the device to ensure optimal heat dissipation.
13. Watch out for high temperatures when the system is running.
14. Do not touch the heat sink or heat spreader when the system is running
15. Never pour any liquid into the openings. This could cause fire or electric shock.
16. As most electronic components are sensitive to static electrical charge, be sure to ground yourself to prevent static charge when installing the internal components. Use a grounding wrist strap and contain all electronic components in any static-shielded containers.

17. If any of the following situations arises, please the contact our service personnel:
 - i. Damaged power cord or plug
 - ii. Liquid intrusion to the device
 - iii. Exposure to moisture
 - iv. Device is not working as expected or in a manner as described in this manual
 - v. The device is dropped or damaged
 - vi. Any obvious signs of damage displayed on the device
18. **DO NOT LEAVE THIS DEVICE IN AN UNCONTROLLED ENVIRONMENT WITH TEMPERATURES BEYOND THE DEVICE'S PERMITTED STORAGE TEMPERATURES (SEE CHAPTER 1) TO PREVENT DAMAGE.**

Warning!

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

Caution:

There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions and your local government's recycling or disposal directives.

Attention:

Il y a un risque d'explosion si la batterie est remplacée de façon incorrecte. Ne la remplacer qu'avec le même modèle ou équivalent recommandé par le constructeur. Recycler les batteries usées en accord avec les instructions du fabricant et les directives gouvernementales de recyclage.

China RoHS Requirements (CN)

产品中有毒有害物质或元素名称及含量

AAEON 主板/子板/背板

QQ4-381 Rev.A2

部件名称	有毒有害物质或元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
印刷电路板 及其电子组件	×	○	○	○	○	○
外部信号 连接器及线材	×	○	○	○	○	○
本表格依据 SJ/T 11364 的规定编制。 ○：表示该有毒有害物质在该部件所有均质材料中的含量均在GB/T 26572标准规定的限量要求以下。 ×：表示该有害物质的某一均质材料超出了GB/T 26572的限量要求, 然而该部件仍符合欧盟指令2011/65/EU 的规范。 环保使用期限(EFUP (Environmental Friendly Use Period)) : 10年 备注：此产品所标示之环保使用期限，系指在一般正常使用状况下。						

China RoHS Requirement (EN)

Name and content of hazardous substances in product

AAEON Main Board/Daughter Board/Backplane

QO4-381 Rev.A2

Part Name	Hazardous Substances					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
PCB Assemblies	×	○	○	○	○	○
Connector and Cable	×	○	○	○	○	○
The table is prepared in accordance with the provisions of SJ/T 11364. ○: Indicates that said hazardous substance contained in all of the homogenous materials for this product is below the limit requirement of GB/T 26572. ×: Indicates that said hazardous substance contained in at least one of the homogenous materials used for this part is above the limit requirement of GB/T 26572. But this product still be compliance with 2011/65/EU Directive (allowed with 2011/65/EU Annex III of RoHS exemption with number 6(c),7(a),7(c)-1). EFUP (Environment Friendly Use Period) value: 10 years Notes: This product defined period of use is under normal condition.

Product Specifications

1.1 Specifications

System

Processor	Intel® Celeron® N3350/ Intel® Pentium® N4200/ Intel Atom® x7-E3950 Processor SoC
Graphics	Intel® Gen 9 HD, supporting 4K Codec Decode and Encode for HEVC4, H.264, VP8
I/O	HDMI x 1 2-pin wafer for Fan (12V) x 1 2-pin wafer for RTC Battery x 1 6-pin wafer for Audio (Line out + MIC) x 1 10-pin wafer for 2 USB2.0 + 1 HSUART x 1 HAT 40-pin header x 1 4-pin wafer for front panel x 1 FPC connector x 1
Camera	—
USB	USB 3.2 Gen 1 (Type-A) x 3 USB 2.0 pin header x 2 USB 3.2 Gen 1 (Type-C) x 1
Expansion	40-pin GPIO x 1 Via Carrier Board: M.2 2230/2242/2280 x 1 M.2 3052 x 1
RTC	Yes
Power	12V DC-in @5A (Phoenix Terminal optional)
Dimension	3.34" x 2.20" (85mm x 56mm)
Memory	On-board LPDDR4 max to 8GB
Storage	eMMC 16GB/ 32GB/ 64GB

System

Display Interface	HDMI 1.4b x 1
	DP 1.2 via USB Type C Connector
Ethernet	1 Gigabit Ethernet RJ-45 x 1 (full speed)
OS Support	Microsoft Windows 10 (full), Windows IOT Core
	Yocto project 3.1 (Kernel 5.4)
	Ubuntu 18.04
Operating Temperature	32°F ~ 140°F (0°C ~ 60°C) with 0.5m/s airflow
Operation Humidity	10% ~ 80% relative humidity, non-condensing
Certification	CE/FCC Class A, RoHS Compliant

2.3 List of Connectors

Please refer to the table below for all of the board's connectors that you can configure for your application

Label	Function
CN1	HAT40
CN2	Programing Connector
CN4	Dual USB3.0
CN5	USB3.0 + HDMI
CN6	RJ45
CN9	RTC Connector
CN10	USB Type-C 3.0 (with DP Alt Mode)
CN11	DC Jack
CN15	USB Pin Header
CN16	Audio Connector.
CN18	Power / Reset button
CN19	FAN Connector
CN21	High Speed Expend Connector
SW1	Power Button

2.3.1 HAT 40 (CN1)

Pin	Signal	Pin	Signal
1	3.3V@0.5A	2	5V@0.5A
3	I2C1_SDA (GPIO 1)	4	5V@0.5A
5	I2C1_SCL (GPIO 2)	6	GND
7	GPIO_ADC (GPIO 3)	8	UART_TXD (GPIO 16)
9	GND	10	UART_RXD (GPIO 17)
11	UART_RTS (GPIO 4)	12	I2S_BCLK (GPIO 18)
13	GPIO 5	14	GND
15	GPIO 6	16	GPIO 19

Chapter 3

Drivers Installation

3.1 Driver Download and Installation

Please access <https://www.up-community.org> and go to the Downloads section > UP 4000 to find the relevant drivers.

3.2 Unknown Device Troubleshooting

After installing the drivers on Windows 10, you may see five unknown devices in the device manager. Follow the steps below to resolve each issue:

Multimedia Audio Controller

Go into the device BIOS Settings. Navigate the menus as follows:

Chipset -> South Bridge -> HD-Audio Configuration

Find **HD-Audio DSP** and change the setting to “disable.”

PCI Device (8086&DEV_5AC8), Unknown Device (AANT0F01), and
VEN_AANT&DEV_1280

Go into the device BIOS Settings. Navigate to the **Boot** menu. Change **OS Selection** to "Windows."

PCI Device: The unknown PCI device is the PWM signal. It is provided directly from the Apollo Lake chipset, but Intel has not released a Windows driver for this device. This PCI device is not available for Windows 10, it is only supported by Linux.

VEN_AANT&DEV_1280: This is the ADC for Linux, there is no Windows driver. This can be ignored. (Note: error only occurs with Atom E3950 processor SoC)

AANT0F04: This is the FPGA device for Linux.

USB OTG (Linux Only)

This refers to the USB OTG functionality on the USB Type-C port. There is no driver available for Windows 10. The function is only available on Linux.

- Go into the device BIOS Settings. Navigate the menus as follows:
Chipset -> South Bridge -> USB Configuration
- Find USB VBUS and change setting to "Off", and change the XDCI Support setting to "PCI Mode".
- When the OTG function is enabled, Windows will have an unknown USB control (VEN_8086&DEV5AAA).

3.3 Dummy Driver Information

3.3.1 Dummy Driver Installation

The following instructions detail how to install the dummy driver for your UP 4000 (UP-APL03).

Step 1 – Download UPNullDrv.msi.

 UPNullDrv.msi	10/17/2022 2:18 AM	Windows Installer Pa...	200 KB
---	--------------------	-------------------------	--------

Step 2 – Click UPNullDrv.msi and follow the steps as per the below images to install Driver.

Once you have successfully installed the dummy driver, you will be able to locate it via your system's Device Manager, as shown below.

3.3.2 Uninstalling the Dummy Driver

Click **UPNullDrv.msi** to uninstall driver, then select **Remove UPNullDrv**.

Appendix A

UP Framework SDK Installation

A.1 Introduction

This section provides instructions for the installation of the UP Framework SDK. Instructions are provided for Windows 10 and Windows IoT Core. You can download the latest version of UP Framework SDK from the UP community:

<https://downloads.up-community.org/download/up-sdk-for-windows-10-and-windows-iot/>

A.2 Installation for Windows 10

Step 1

Locate the downloaded file UpFrameworkSetup.msi and run the installer. Press "Next" to begin the setup process.

Step 2

Select the installation folder. Default destination path is C:\Program Files(x86)\AAEON\

You may also choose to install the UP Framework SDK for all users or only the current user. Press “Next” to continue installation.

Step 3

Press “Next” to confirm the installation.

Step 4

Press "Close" to exit once setup is complete.

A.3 Installation for Windows IoT Core

Before you begin, make sure you have downloaded and installed the latest version of the Windows IoT Core image from the UP community.

Installation requires using a connected PC with the UP Framework SDK software downloaded and saved. **Note:** Make sure the UP IoT Core device is connected to the same network as the PC you are using to install the software from.

Step 1

Turn on your UP IoT Core device and note the IP address at the home screen.

Step 2

Download the UP Framework SDK to your PC and unzip the files.

Open PowerShell as an Administrator. Run the command

RemoteInstallation.ps1 to install the UP Framework SDK.

Enter the IP address of the UP IoT Core device when prompted.

```

系統管理員: Windows PowerShell
PS D:\UpFramework\VV19.08.27\iot> .\RemoteInstallation.ps1
The requested service has already been started.

More help is available by typing NET HELPMMSG 2182.

Enter IP address: 192.168.11.11

CMDKEY: Credential added successfully.
No devices were removed.
***** WARNING *****
This Devcon command should only be used for development/testing purposes.

Driver package INF files should be added/updated into the offline OS image
using the supported offline package deployment process in order to ensure
that they are properly configured and integrated into the Windows OS state.

Updating driver package INF files from within the runtime environment of
this OS product may lead to unexpected OS state conflicts, resulting in the
inability to apply future updates to core OS components and/or drivers on
retail/consumer systems.

***** WARNING *****
Device node created. Install is complete when drivers are installed...

Updating drivers for root\upframework from c:\windows\system32\upframework.inf.
```

A.4 Windows IOT Audio Setting

To set up Windows IOT Audio Setting on your device, perform the instructions as follows.

- Open Command.
- Enter "IoTCoreAudioControlTool l" to see all Audio devices.
- Enter "IoTCoreAudioControlTool d {device number}" to switch devices.
- Here is an example of switching to HDMI.
- Enter "IoTCoreAudioControlTool d {0,0,0,00000000}.{615fab44-fe40-4829-b91f-d67f07cfb98e}".
- Audio Line out will switch to HDMI

```
