## Packing List

---

Before setting up your product, please make sure the following items have been shipped:

Item	Quantity
● VPC-5600S	1
● Wall mount bracket	2
● SATA cable	2
● Power cable (for SATA)	2
● Product CD	1

If any of these items are missing or damaged, please contact your distributor or sales representative immediately.

## About this Document

---

This User's Manual contains all the essential information, such as detailed descriptions and explanations on the product's hardware and software features (if any), its specifications, dimensions, jumper/connector settings/definitions, and driver installation instructions (if any), to facilitate users in setting up their product.

Users may refer to the [AAEON.com](http://AAEON.com) for the latest version of this document.

## Safety Precautions

---

Please read the following safety instructions carefully. It is advised that you keep this manual for future references

1. All cautions and warnings on the device should be noted.
2. All cables and adapters supplied by AAEON are certified and in accordance with the material safety laws and regulations of the country of sale. Do not use any cables or adapters not supplied by AAEON to prevent system malfunction or fires.
3. Make sure the power source matches the power rating of the device.
4. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
5. Always completely disconnect the power before working on the system's hardware.
6. No connections should be made when the system is powered as a sudden rush of power may damage sensitive electronic components.
7. If the device is not to be used for a long time, disconnect it from the power supply to avoid damage by transient over-voltage.
8. Always disconnect this device from any AC supply before cleaning.
9. While cleaning, use a damp cloth instead of liquid or spray detergents.
10. Make sure the device is installed near a power outlet and is easily accessible.
11. Keep this device away from humidity.
12. Place the device on a solid surface during installation to prevent falls
13. Do not cover the openings on the device to ensure optimal heat dissipation.
14. Watch out for high temperatures when the system is running.
15. Do not touch the heat sink or heat spreader when the system is running
16. Never pour any liquid into the openings. This could cause fire or electric shock.

17. As most electronic components are sensitive to static electrical charge, be sure to ground yourself to prevent static charge when installing the internal components. Use a grounding wrist strap and contain all electronic components in any static-shielded containers.
18. If any of the following situations arises, please contact our service personnel:
  - i. Damaged power cord or plug
  - ii. Liquid intrusion to the device
  - iii. Exposure to moisture
  - iv. Device is not working as expected or in a manner as described in this manual
  - v. The device is dropped or damaged
  - vi. Any obvious signs of damage displayed on the device
19. **DO NOT LEAVE THIS DEVICE IN AN UNCONTROLLED ENVIRONMENT WITH TEMPERATURES BEYOND THE DEVICE'S PERMITTED STORAGE TEMPERATURES (SEE CHAPTER 1) TO PREVENT DAMAGE.**

### **Warning!**

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

### **Caution:**

*There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions and your local government's recycling or disposal directives.*

### **Attention:**

*Il y a un risque d'explosion si la batterie est remplacée de façon incorrecte. Ne la remplacer qu'avec le même modèle ou équivalent recommandé par le constructeur. Recycler les batteries usées en accord avec les instructions du fabricant et les directives gouvernementales de recyclage.*

### System

Form Factor	In-Vehicle NVR
Processor	Intel® 7th Gen. Core™ i3/i5/i7 Processor (Default: i3-7100U; Project base: i5-7300U, i7-7600U)
Chipset	—
Main Memory	Up to 32GB, DDR4 260-pin SODIMM
Display	HDMI x 1, DP x 1
Ethernet	LAN x 2 + 4 PoE Ports (Up to 8 PoE ports), RTL8111E 10/100/1000 Base
PoE Ethernet Port	4 ports (Max. 8 ports), sharing 60W of power budget for every four PoE ports.
RAID support	0/1
Expansion Slot	Mini-Card slot x 3 (USB2.0 x 2 + PCIe & USB 2.0 x 1) Built-in CAN 2.0B x 1
GPS, G-Sensor	On board (GPS/GLONASS), G Sensor Power Button x 1 3G/4G/WIFI LED x 3 USB3.0
Front I/O Panel	x 4 GbE port (RJ-45) x 2 PoE LAN x 4 (IEEE 802.3 at/af), Max. 8 ports DP x 1 Reset Button x 1

## System

<b>Rear I/O Panel</b>	<p>DC-In power x 1 Remote Power x 1</p> <p>8-bit DIO x 1, 4-ch digital input (Wet/dry contact with Isolation Protection 3,000 VDC) ,</p> <p>4-ch digital output (Compatible 5 V/TTL, 31 mA max. per channel) DC 12V/1A Output x 1</p> <p>RS-232/422/485 x 2</p> <p>HDMI x 1</p> <p>CanBus connector x 1, Audio Line-out x 1, Mic-In x 1 SIM slot x 2</p>

## Storage

<b>HDD Tray</b>	2.5" SSD x 2
<b>CF/CFast/mSATA Slot</b>	mSATA Slot x 1 (If mSATA x 1 used, then only one SATA available)

## Environmental

<b>Operating Temperature</b>	-4°F ~ 158°F (-20°C ~ 70°C); Project base, -40°C ~ 85°C
<b>Storage Temperature</b>	-40°F ~ 185°F (-40°C ~ 85°C)
<b>Storage Humidity</b>	10%~80% @40°C, non-condensing
<b>Vibration/Shock</b>	MIL-STD-810G
<b>Certification</b>	CE & FCC Class A, EMARK

## Power Requirement

<b>Power Supply</b>	DC 10-36V, with ignition pin
---------------------	------------------------------

## Mechanical

Removable HDD Tray	Hot swappable 2.5" SSD x 2 (Project base) via extension module
Internal System HDD Bay	2.5" HDD x 2
Dimension	6.85" x 7.87" x 2.52" (174mm x 200mm x 64mm)

## 2.5 2.5" HDD Installation

1. Loosen the screws and remove the bottom cover

2. Attach the brackets to the HDD.

3. Install the HDD onto the bottom cover

4. Attach the cables to the motherboard

5. Replace the bottom cover and tighten the screws.

## 2.6 mSATA Drive Installation

---

1. Loosen the screws and remove the bottom cover

2. Remove the screws from 6 locations

3. Remove the top cover

4. Install the mSATA drive onto the motherboard and tighten the screw

5. Replace the top cover and tighten the screws
6. Replace the bottom cover and tighten the screws

## 2.7 GPS & RAM Installation

---

1. Unscrew the bottom cover.

2. Remove the bottom cover.

3. Remove these six screws.

4. Lift up the case.

5. Pick up the case.

6. Install the GPS cable and WiFi Screw.

7. Install the RAM and thermal pad.

AMI BIOS Setup

## 3.1 System Test and Initialization

---

The system uses certain routines to perform testing and initialization. If an error, fatal or non-fatal, is encountered, a few short beeps or an error message will be outputted. The board can usually continue the boot up sequence with non-fatal errors.

The system configuration verification routines check the current system configuration against the values stored in the CMOS memory. If they do not match, an error message will be outputted, in which case you will need to run the BIOS setup program to set the configuration information in memory.

There are three situations in which you will need to change the CMOS settings:

- You are starting your system for the first time
- You have changed your system's hardware
- The CMOS memory has lost power and the configuration information is erased

The system's CMOS memory uses a backup battery for data retention, which is to be replaced once emptied.

## 3.2 AMI BIOS Setup

---

The AMI BIOS ROM has a pre-installed Setup program that allows users to modify basic system configurations, which is stored in the battery-backed CMOS RAM and BIOS NVRAM so that the information is retained when the power is turned off.

To enter BIOS Setup, press <Del> or <F2> immediately while your computer is powering up.

The function for each interface can be found below.

**Main** – Date and time can be set here. Press <Tab> to switch between date elements

**Advanced** – Enable/ Disable boot option for legacy network devices

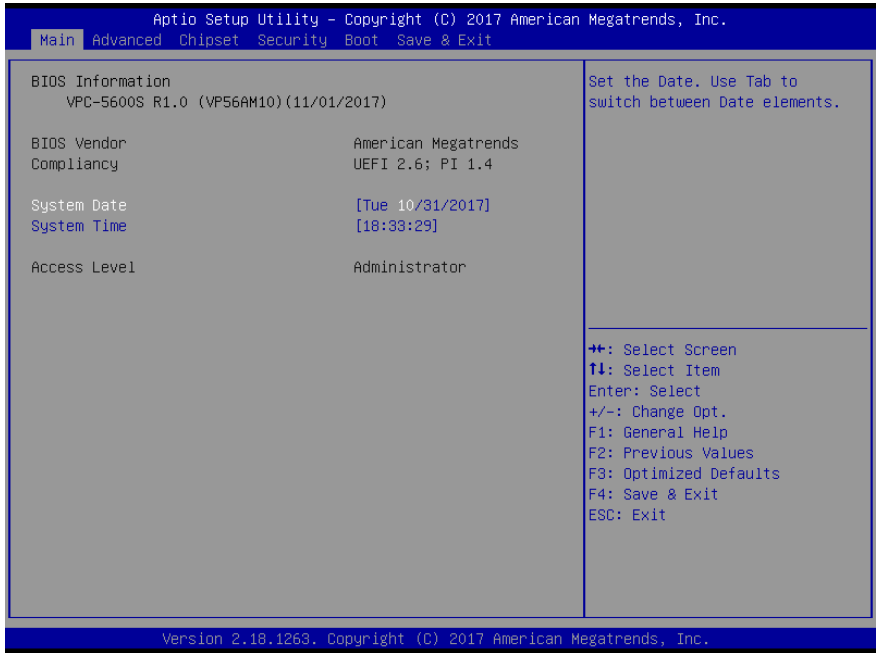

**Chipset** – For hosting bridge parameters

**Security** – The setup administrator password can be set here

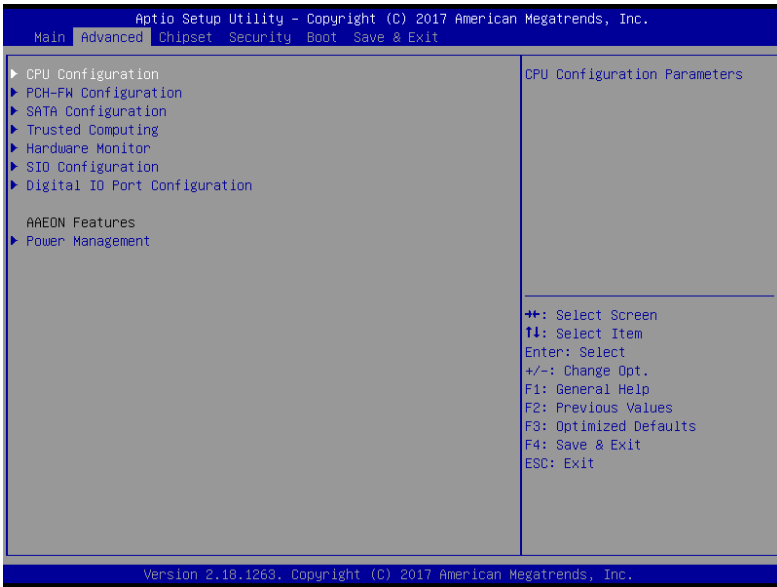

**Boot** – Enable/ Disable quiet Boot Option

**Save & Exit** – Save your changes and exit the program

### 3.4.6.1 SIO Configuration: Serial Port Configuration

The screenshot shows the 'Advanced' menu of the Aptio Setup Utility. The title bar reads 'Aptio Setup Utility - Copyright (C) 2017 American Megatrends, Inc.' and the sub-menu is 'Advanced'. The main content area is split into two columns. The left column displays 'AMI SIO Driver Version : A5.07.03' and 'Super IO Chip Logical Device(s) Configuration'. Under this, there is a list of six serial ports, each preceded by a right-pointing triangle and the text '[\*Active\*]'. A warning message follows: 'WARNING: Logical Devices state on the left side of the control, reflects the current Logical Device state. Changes made during Setup Session will be shown after you restart the system.' The right column contains the text: 'View and Set Basic properties of the SIO Logical device. Like IO Base, IRQ Range, DMA Channel and Device Mode.' Below this, a legend lists navigation keys: '+': Select Screen, ↑: Select Item, Enter: Select, +/-: Change Opt., F1: General Help, F2: Previous Values, F3: Optimized Defaults, F4: Save & Exit, and ESC: Exit. The bottom status bar shows 'Version 2.18.1263. Copyright (C) 2017 American Megatrends, Inc.'

DIO Port5~8	Output
	Input
Set DIO as Input or Output.	
Output Level	Low
	High
Set output level when DIO pin is output.	

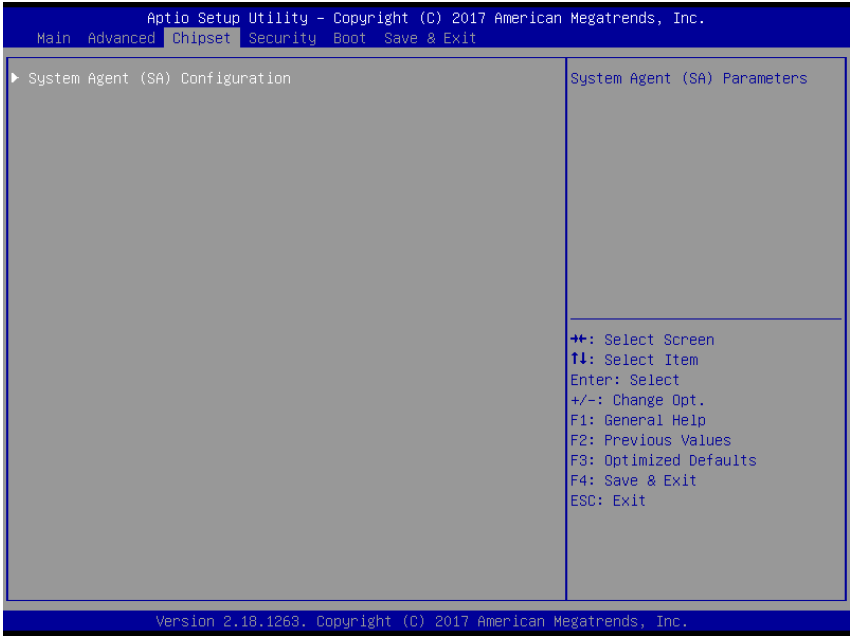

### 3.4.8 Advanced: Power Management

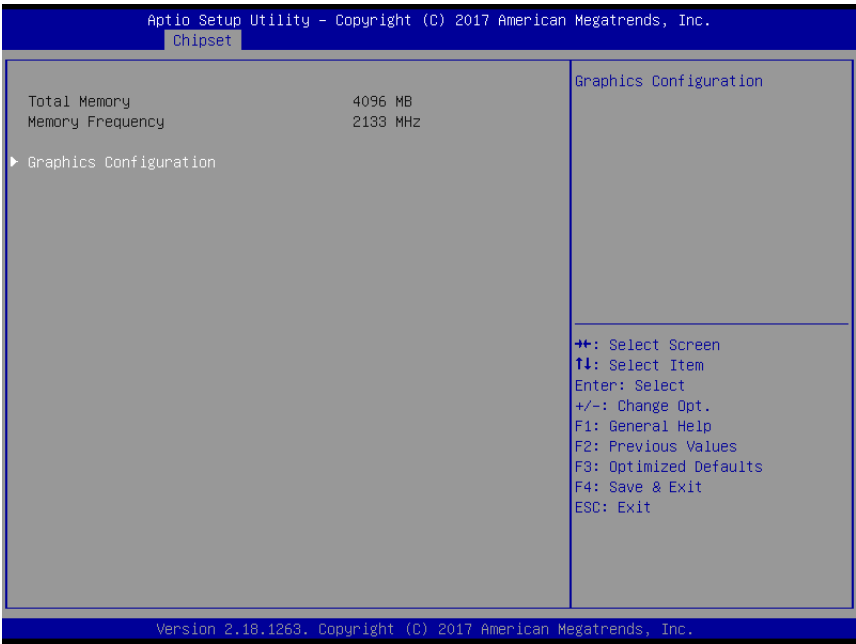

Options summary:

Power Mode	<b>ATX Type</b>
	AT Type
Select Power Supply Mode.	
Restore AC Power Loss	Power Off
	Power On
	<b>Last State</b>
Select AC power state when power is re-applied after a power failure.	

### 3.5 Setup submenu: Chipset

### 3.5.1 Chipset: System Agent (SA) Configuration

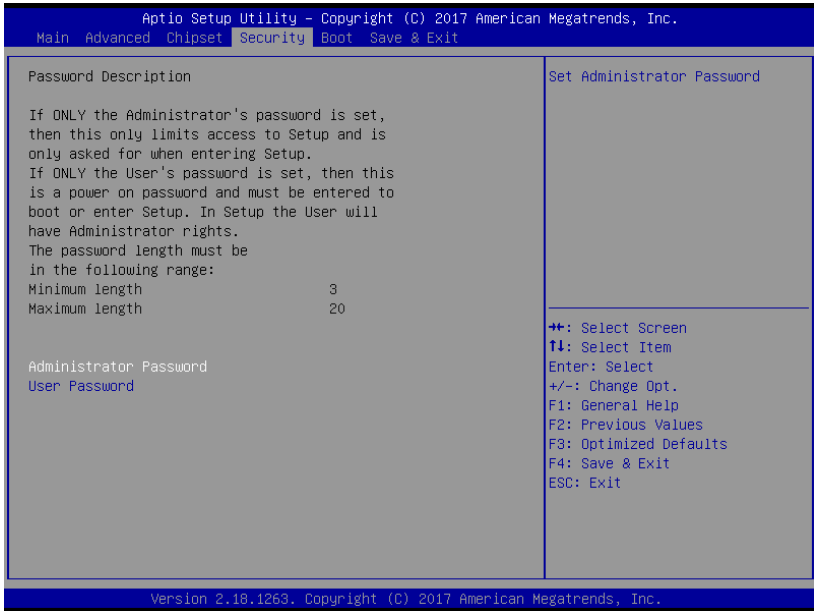

### 3.5.1.1 System Agent (SA) Configuration: Graphics Configuration

Options summary:

VT-d	<b>Enabled</b>
	Disabled
VT-d capability.	
Primary Display	<b>Auto</b>
	IGFX
	PEG
Select which of IGFX/PEG/PCI Graphics device should be Primary Display Or select SG for Switchable Gfx.	
Primary IGFX Boot Display	<b>VBIOS Default</b>
	HDMI
	DP
Select the Video Device which will be activated during POST. This has no effect if external graphics present. Secondary boot display selection will appear based on your selection. VGA modes will be supported only on primary display	

## 3.6 Setup submenu: Security

### Change User/Supervisor Password

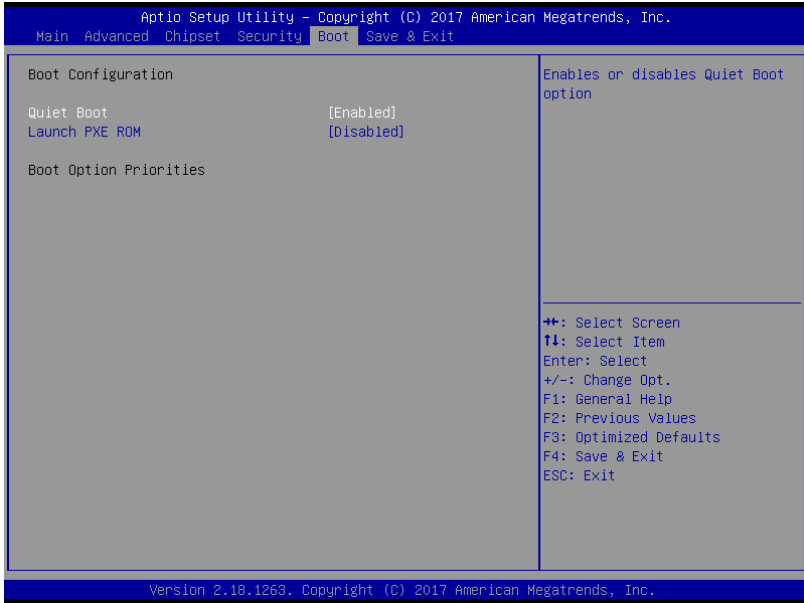

You can set a User Password once an Administrator Password is set. The password will be required during boot up, or when the user enters the Setup utility. Please Note that a User Password does not provide access to many of the features in the Setup utility.

Select the password you wish to set, press Enter to open a dialog box to enter your password (you can enter no more than six letters or numbers). Press Enter to confirm your entry, after which you will be prompted to retype your password for a final confirmation. Press Enter again after you have retyped it correctly.

### Removing the Password

Highlight this item and type in the current password. At the next dialog box press Enter to disable password protection.

### 3.7 Setup submenu: Boot

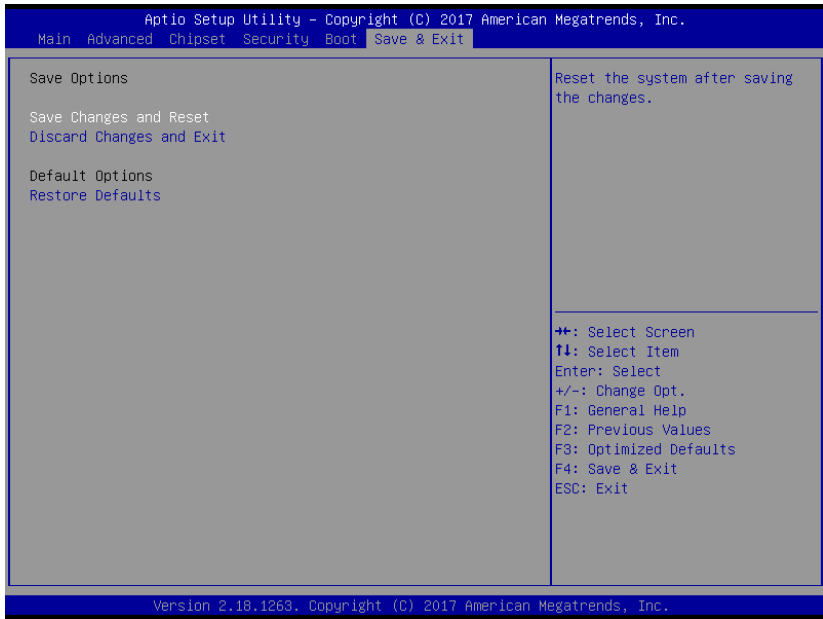

Options summary:

Quiet Boot	Disabled
	Enabled
Enables or disables Quiet Boot option.	
Launch PXE ROM	Disabled
	Enabled
Controls the execution of UEFI and Legacy PXE OpROM

Drivers Installation

## 4.1 Product CD/DVD

---

The VPC-5600S comes with a product DVD that contains all the drivers and utilities you need to setup your product. Insert the DVD and follow the steps in the autorun program to install the drivers.

In case the program does not start, follow the sequence below to install the drivers.

### Step 1 – Install Chipset Drivers

1. Open the **Step 1 - Chipset** folder followed by **SetupChipset.exe**
2. Follow the instructions
3. Drivers will be installed automatically

### Step 2 – Install Graphics Driver

1. Open the **Step 2 - Graphic** folder and select your OS
2. Open the **.exe** file in the folder
3. Follow the instructions
4. Drivers will be installed automatically

### Step 3 – Install LAN Drivers

1. Open the **Step 3 – LAN** folder and select your OS
2. Open the **setup.exe** file in the folder
3. Follow the instructions
4. Drivers will be installed automatically

### Step 4 – Install Audio Driver

1. Open the **Step 4 - Audio** folder and select your OS
2. Open the **.exe** file in the folder

3. Follow the instructions
4. Drivers will be installed automatically

#### Step 5 – Install USB 3.0 Driver

1. Open the **Step 5 – USB3.0** folder and select your OS
2. Open the **.exe** file in the folder
3. Follow the instructions
4. Drivers will be installed automatically

#### Step 6 – Install ME Driver

1. Open the **Step 6 - ME** folder followed by **MEISetup.exe**
2. Follow the instructions
3. Drivers will be installed automatically

#### Step 9 – Install Serial Port Driver (Optional)

1. Open the **Step 7 - Serial Port Driver (Optional)** folder and select your OS
2. Open the **.exe** or **.bat** file in the folder
3. Follow the instructions
4. Drivers will be installed automatically

Digital I/O Ports

## C.1 DI/O Programming

---

VPC-5600S utilizes FINTEK F81866 chipset as its Digital I/O controller. Below are the procedures to complete its configuration. AAEON initial DI/O program is also attached for developing customized program for your application.

There are three steps to complete the configuration setup:

- (1) Enter the MB PnP Mode
- (2) Modify the data of configuration registers
- (3) Exit the MB PnP Mode. Undesired result may occur if the MB PnP Mode is not exited normally.

## C.2 Digital I/O Register
