Packing List

Before setting up your product, please make sure the following items have been shipped:

Item	Quantity
de next-V2K8	1
Copper Stud.M2.5	4

If any of these items are missing or damaged, please contact your distributor or sales representative immediately.

About this Document

This User's Manual contains all the essential information, such as detailed descriptions and explanations on the product's hardware and software features (if any), its specifications, dimensions, jumper/connector settings/definitions, and driver installation instructions (if any), to facilitate users in setting up their product.

Users may refer to the product page at AAEON.com for the latest version of this document.

Safety Precautions

Please read the following safety instructions carefully. It is advised that you keep this manual for future references

1. All cautions and warnings on the device should be noted.
2. Make sure the power source matches the power rating of the device.
3. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
4. Always completely disconnect the power before working on the system's hardware.
5. No connections should be made when the system is powered as a sudden rush of power may damage sensitive electronic components.
6. If the device is not to be used for a long time, disconnect it from the power supply to avoid damage by transient over-voltage.
7. Always disconnect this device from any AC supply before cleaning.
8. While cleaning, use a damp cloth instead of liquid or spray detergents.
9. Make sure the device is installed near a power outlet and is easily accessible.
10. Keep this device away from humidity.
11. Place the device on a solid surface during installation to prevent falls
12. Do not cover the openings on the device to ensure optimal heat dissipation.
13. Watch out for high temperatures when the system is running.
14. Do not touch the heat sink or heat spreader when the system is running
15. Never pour any liquid into the openings. This could cause fire or electric shock.
16. As most electronic components are sensitive to static electrical charge, be sure to ground yourself to prevent static charge when installing the internal components. Use a grounding wrist strap and contain all electronic components in any static-shielded containers.

17. If any of the following situations arises, please the contact our service personnel:
 - i. Damaged power cord or plug
 - ii. Liquid intrusion to the device
 - iii. Exposure to moisture
 - iv. Device is not working as expected or in a manner as described in this manual
 - v. The device is dropped or damaged
 - vi. Any obvious signs of damage displayed on the device
18. **DO NOT LEAVE THIS DEVICE IN AN UNCONTROLLED ENVIRONMENT WITH TEMPERATURES BEYOND THE DEVICE'S PERMITTED STORAGE TEMPERATURES (SEE CHAPTER 1) TO PREVENT DAMAGE.**

Warning!

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

Caution:

There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions and your local government's recycling or disposal directives.

Attention:

Il y a un risque d'explosion si la batterie est remplacée de façon incorrecte. Ne la remplacer qu'avec le même modèle ou équivalent recommandé par le constructeur. Recycler les batteries usées en accord avec les instructions du fabricant et les directives gouvernementales de recyclage.

China RoHS Requirements (CN)

产品中有毒有害物质或元素名称及含量

AAEON Main Board/ Daughter Board/ Backplane

部件名称	有毒有害物质或元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
印刷电路板 及其电子组件	x	x	○	○	○	○
外部信号 连接器及线材	x	X	○	○	○	○
<p>O: 表示该有毒有害物质在该部件所有均质材料中的含量均在 SJ/T 11363-2006 标准规定的限量要求以下。</p> <p>X: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T 11363-2006 标准规定的限量要求。</p> <p>备注: 此产品所标示之环保使用期限, 系指在一般正常使用状况下。</p>						

China RoHS Requirement (EN)

Poisonous or Hazardous Substances or Elements in Products

AAEON Main Board/ Daughter Board/ Backplane

Component	Poisonous or Hazardous Substances or Elements					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr(VI))	Polybrominated Biphenyls (PBB)	Polybrominated Diphenyl Ethers (PBDE)
PCB & Other Components	x	x	○	○	○	○
Wires & Connectors for External Connections	x	x	○	○	○	○
<p>O: The quantity of poisonous or hazardous substances or elements found in each of the component's parts is below the SJ/T 11363-2006-stipulated requirement.</p> <p>X: The quantity of poisonous or hazardous substances or elements found in at least one of the component's parts is beyond the SJ/T 11363-2006-stipulated requirement.</p> <p>Note: The Environment Friendly Use Period as labeled on this product is applicable under normal usage only</p>

Chapter 1

Product Specifications

1.1 Specifications

System

Form Factor	86mm x 55mm, Single board computer
CPU	AMD Ryzen™ Embedded V2718 with Radeon™ Graphics AMD Ryzen™ Embedded V2516 with Radeon™ Graphics
CPU TDP	10W, TDP up to 25W: V2718/V2516
Chipset	Integrated with AMD Ryzen™ Embedded SoC
Memory Type	Onboard LPDDR4x 3200MHz, up to 16GB
BIOS	UEFI
Wake on LAN	Yes
Watchdog Timer	255 Levels
Security	fTPM
RTC Battery	Lithium Battery 3V/240mAh
Dimension	3.38" x 2.17" (86mm x 55mm)

Power

Power Requirement	+12V DC-in
Power Supply Type	AT/ATX (Default: AT Mode)
Connector	DC Jack (Optional: 2 Pin Phoenix Connector)
Power Consumption	AMD Ryzen™ V2718 Processor, LPDDR4 3200MHz 16GB, 3.92A@12V, 47.04W during full loading test (Peak) AMD Ryzen™ V2718 Processor, LPDDR4 3200MHz 16GB, 3.07A@12V, 36.84W during full loading test (Steady)

Display

Controller	AMD Radeon™ Graphics
LVDS/EDP	eDP only, up to 3840 X 2160 Resolution
Display Interface	eDP x 1 HDMI 1.4b x 1
Multiple Display	Up to 2 Simultaneous Displays

Audio

Codec	—
Audio Interface	—
Speaker	—

External I/O

Ethernet	Realtek RTL8111H, 10/100/1000Base, RJ-45 x 1 Intel® i225LM, 10/100/2500Base, RJ-45 x 1
USB	USB 3.2 Gen 2 x 2 (Type-A)
Serial Port	—
Video	HDMI 1.4b x 1

Internal I/O

USB	USB 2.0 x 4 (Pin Header)
Serial Port	COM Port x 2 (RS-232/422/485 Pin Header)
Video	eDP x 1
SATA	SATA III x 1 +5V SATA Power Connector x 1
Audio	—
DIO/GPIO	8-Bit (Pin Header)

Internal I/O

SMBus/I2C	Optional
Touch	—
FAN	Smart Fan x 1
SIM	—
Front Panel	HDD LED, PWR LED, Power Button, Buzzer, Reset

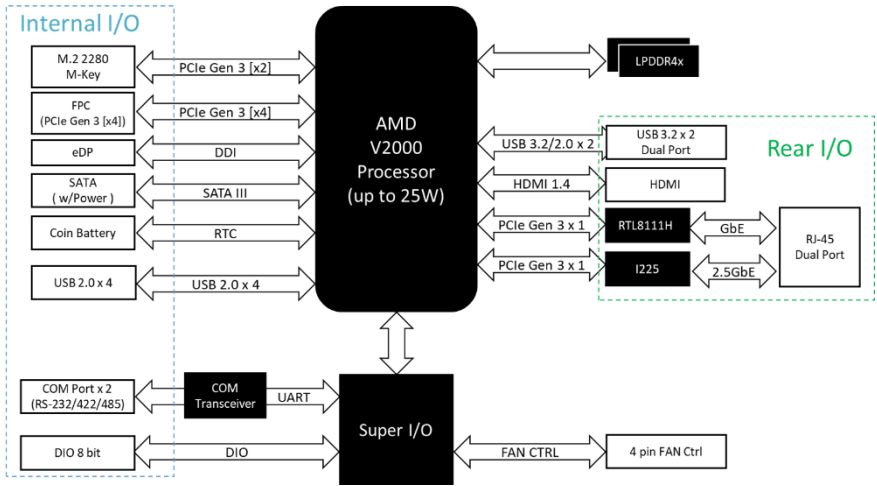

Expansion

Mini PCIe/MSATA	—
M.2	M.2 2280 M-Key x 1 (PCIe [x2])
Others	—

Environment & Certification

Operating Temperature	32°F ~ 140°F (0°C ~ 60°C)
Storage Temperature	-40°F ~ 176°F (-40°C ~ 80°C)
Operating Humidity	0% ~ 90% relative humidity, non-condensing
MTBF (Hours)	609,263
EMC	CE/FCC Class A

Hardware Information

2.1 Dimensions

With CPU Cooler:

2.2 Jumpers and Connectors

2.3 List of Connectors

Please refer to the table below for all of the board's connectors that you can configure for your application

Label	Function
JCOM1	COM, USB 2.0, DIO
JDCIN2	DC In
JEDP1	eDP
JESPI1	I2C, SMBus
JFAN1	FAN
JFP1	Front Panel
JHDMI1	HDMI
JLAN1	LAN
JM2M1	M.2 2280 M-Key
JPCIE_FPC1	PCIe
JRTC1	RTC Battery
JSATA1	SATA
JSATAP1	SATA Power
JUSB1	USB 3.2 Gen 2

2.3.1 COM, USB 2.0, DIO (JCOM1)

Chapter 3

AMI BIOS Setup

3.1 System Test and Initialization

The board uses certain routines to perform testing and initialization. If an error, fatal or non-fatal, is encountered, a few short beeps or an error message will be outputted. The board can usually continue the boot up sequence with non-fatal errors.

The system configuration verification routines check the current system configuration against the values stored in the CMOS memory. If they do not match, an error message will be outputted, in which case you will need to run the BIOS setup program to set the configuration information in memory.

There are three situations in which you will need to change the CMOS settings:

- You are starting your system for the first time
- You have changed your system's hardware
- The CMOS memory has lost power and the configuration information is erased

The system's CMOS memory uses a backup battery for data retention, which is to be replaced once emptied.

3.2 AMI BIOS Setup

The AMI BIOS ROM has a pre-installed Setup program that allows users to modify basic system configurations, which is stored in the battery-backed CMOS RAM and BIOS NVRAM so that the information is retained when the power is turned off.

To enter BIOS Setup, press or <F2> immediately while your computer is powering up.

The function for each interface can be found below.

Main – Date and time can be set here. Press <Tab> to switch between date elements

Advanced – Enable/ Disable boot option for legacy network devices

System I/O – Enable/ Disable System input and output port

Security – The setup administrator password can be set here

Boot – Enable/ Disable quiet Boot Option

Save & Exit – Save your changes and exit the program

Sends watch dog before booting OS	[Disabled]	
OS Timer (minute)	3	
Delayed POST (PEI phase)	[Disabled]	
Delayed time (second)	10	
Delayed POST (DXE phase)	[Disabled]	
Delayed time (second)	10	
Reset system once	[Disabled]	
Soft or hard reset	[Soft reset]	
▶ Device detecting configuration		

Ver. 2.21.1277 Copyright (C) 2022 American Megatrends International, LLC.

Options Summary		
Sends watch dog before BIOS POST	Disabled	Optimal Default
	Enabled	
Robot set Watch Dog Timer (WDT) right after power on, before BIOS start POST process. And then Robot will clear WDT on completion of POST. WDT will reset system automatically if it is not cleared before its timer counts down to zero.		
Sends watch dog before booting OS	Disabled	Optimal Default
	Enabled	
Robot set Watch Dog Timer (WDT) after POST completion, before BIOS transfer control to OS. WARNING: Before enabling this function, a program in OS must be in responsible for clearing WDT. Also, this function should be disabled if OS is going to update itself.		
Delayed POST (PEI phase)	Disabled	Optimal Default
	Enabled	
Robot holds BIOS from starting POST, right after power on. This allows BIOS POST to start with stable power or start after system is physically warmed-up.		
Delayed POST (DXE phase)	Disabled	Optimal Default
	Enabled	

Options Summary

Robot holds BIOS before POST completion. This allows BIOS POST to start with stable power or start after system is physically warmed-up.

Reset system once	Disabled	Optimal Default
	Enabled	

Robot resets system for one time on each boot. This will send a soft or hard reset to onboard devices, thus puts devices to more stable state.

Serial Port for Out-of-Band Management/ Windows Emergency Management Services (EMS) Console Redirection Enable or Disable.		

3.6 Setup Submenu: Security

Change User/Supervisor Password

You can install a Supervisor password, and if you install a supervisor password, you can then install a user password. A user password does not provide access to many of the features in the Setup utility.

If you highlight these items and press Enter, a dialog box appears which lets you enter a password. You can enter no more than six letters or numbers. Press Enter after you have typed in the password. A second dialog box asks you to retype the password for confirmation. Press Enter after you have retyped it correctly. The password is required at boot time, or when the user enters the Setup utility.

Removing the Password

Highlight this item and type in the current password. At the next dialog box press Enter to disable password protection.

Chapter 4

Driver Installation

4.1 Driver Download/Installation

Drivers for the de next-V2K8 can be downloaded from the product page on the AAEON website by following this link:

<https://www.aaeon.com/en/p/embedded-single-board-computers-denext-v2k8>

Download the driver(s) you need and follow the steps below to install them.

Step 1 – Install Chipset Driver

1. Open the **Chipset Driver** folder
2. Run the **AMD_Chipset_Software.exe** file in the folder
3. Follow the instructions
4. Drivers will be installed automatically

Step 2 – Install Graphics Driver

1. Open the **Graphics Driver** folder
2. Run the **Setup.exe** file in the folder
3. Follow the instructions
4. Drivers will be installed automatically

Step 3.1 – Install LAN Driver (Windows 10)

1. Open the **LAN Driver** folder and select **Install_Win10_10056_03222022.zip**
2. Run the **Install_Win10_10056_03222022.exe** file in the folder
3. Follow the instructions
4. Drivers will be installed automatically

Step 3.2 – Install LAN Driver (Intel®)

Note: You must install Intel Ethernet device drivers before you can install Intel® PROSet.

Step 3.2.1 Intel Ethernet Device Drivers

1. Open the **Intel LAN** folder
2. Run the **Wired_driver_26.3_x64.exe** file in the folder
3. Follow the instructions
4. Drivers will be installed automatically

Step 3.2.2 Intel® PROSet Drivers

1. Open the **Intel LAN** folder
2. Run the **Wired_PROSet_26.3_x64.exe** file in the folder
3. Follow the instructions
4. Drivers will be installed automatically

Step 4 – Install Linux Peripheral Drivers

1. Open the **Linux Driver-Peripheral** folder
2. Follow the instructions given for I2C, SMBus, and WMI Linux driver packages.
3. Follow the instructions to install the drivers manually.

Mating Connector & Cable List

B.1 List of Mating Connectors and Cables

Con. Label	Function	Mating Connector		Available Cable	Cable P/N
		Vendor	Model no		
JCOM1	Connector: USB2.0 x 4 DIO 8 bit COM x 2	Aces	50246-04001-001	Cable 40Pin, de next cable for USB2.0 x 4, COM Port x 2, DIO 8 bit	170X000512
JFP1	Front Panel Connector	CATCH	1204-700-10SMR	Power Button Cable	170X000603
JSATA1	SATA Connector	Molex	887505318	SATA Cable,180D.Length 20cm	1709070200
JSATAP1	SATA Power Connector	Molex	51021-0200	SATA Power Cable	170X000322

Appendix C

Peripheral Device Installation

C.1 PER-R41P (PER-R41P:PCle[x4] Adapter Kit) Installation

Note: Please follow these instructions and ensure the direction of adaptor kit corresponds to the below pictures prior to powering up de next-V2K8 board. Any installation error will cause critical damage to the de next-V2K8 board and/or adapter kit.

Step 1: Flip up the black plastic on the PER-R41P adapter card.

Step 2: Plug the FPC cable (GF1) into the connector, and flip down the black plastic.

Step 3: Flip up the black plastic on the de next-V2K8 board.

Plug the FPC cable (GF2) into the connector on the de next-V2K8 board and flip down the black plastic to affix the FPC cable.

Step 4: Check the FPC Installation again before powering up the board.
