The Best HMI Hardware Solution
AMB-2021HT/AMB-2051HT Series Panel PCs

* Application Story *

The Swedish company, Goteneds, was founded in 1907. The company is one of the leading manufacturers of factory control systems, with sales all over the world.

The company uses the AAEON **AMB-2051HTT** Panel PC (offered by our Sweden distributor *Sensor Control*) as a **H**uman **M**achine **I**nterface (HMI) in their control system for plate working, industrial and structural sheeting.

The control system is based on a PC together with a PLC and a touch-sensitive screen. The AAEON Panel PC is very easy to use -- it suffices to press your finger on the screen in order to interface with the control system, then the programming can be transferred via diskette or Ethernet controllers. This automation package is simple, easy, and very popular for Factory Automation field.

The waterproof front panel meets application requirements with its IP65 specification. Four serial, one parallel, two PS/2 communication ports, dual USB and Ethernet controllers provide all the necessary tools for this industrial application type. Furthermore, depending on the needs, this station can support a drive space for CD-ROM, floppy and hard disks.

With such specifications, customers can be sure to obtain a system with good features, reduced size, easy servicing and strong technical support.
