## Packing List

Before you begin operating your PC, please make sure that the following materials are enclosed:

- 1 AEC-6402 Embedded Controller
- 1 Burn-Proof Bracket
- 3 RJ-45 to Dsub cable
- 1 CD-ROM for manual (in PDF format) and drivers
- 1 mini-HDMI to HDMI cable
- 1 Power Adapter

If any of these items should be missing or damaged, please contact your distributor or sales representative immediately.

## Safety & Warranty

1. Read these safety instructions carefully.
2. Keep this user's manual for later reference.
3. Disconnect this equipment from any AC outlet before cleaning. Do not use liquid or spray detergents for cleaning. Use a damp cloth.
4. For pluggable equipment, the power outlet must be installed near the equipment and must be easily accessible.
5. Keep this equipment away from humidity.
6. Put this equipment on a firm surface during installation. Dropping it or letting it fall could cause damage.
7. The openings on the enclosure are for air convection. Protect the equipment from overheating. **DO NOT COVER THE OPENINGS.**
8. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
9. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
10. All cautions and warnings on the equipment should be noted.
11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient over-voltage.
12. Never pour any liquid into an opening. This could cause fire or electrical shock.
13. Never open the equipment. For safety reasons, only qualified service personnel should open the equipment.
14. If any of the following situations arises, get the equipment checked by service personnel:
  - a. The power cord or plug is damaged.
  - b. Liquid has penetrated into the equipment.
  - c. The equipment has been exposed to moisture.

- d. The equipment does not work well, or you cannot get it to work according to the user's manual.
  - e. The equipment has been dropped and damaged.
  - f. The equipment has obvious signs of breakage.
15. DO NOT LEAVE THIS EQUIPMENT IN AN ENVIRONMENT WHERE THE STORAGE TEMPERATURE IS BELOW -20°C (-4°F) OR ABOVE 70°C (158°F). IT MAY DAMAGE THE EQUIPMENT.

## FCC

### **Warning!**

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

### **Caution:**

*There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions and your local government's recycling or disposal directives.*

## 1.1 Introduction

---

AAEON introduces the slimmest product in the Boxer series, AEC-6402, which utilizes the Intel® Atom™ N2600 processor: this embedded controller expands its graphics performance greatly with the newest generation of Atom™ processors.

So far, there is no other boxer PC can be so tiny and slim like AEC-6402, not even Pico-ITX system. With this tiny dimension form factor, customers can fit it almost everywhere, and it provides quite a lot of I/O ports for basic applications. AEC-6402 adopts fanless design for high reliability to fit in most rugged environment. It also provides wireless communication features and it's really convenient for customers to build up network connection at all locations and markets.

The AEC-6402 is a standalone high performance controller designed for long-life operation and with high reliability. It can replace traditional methods and become the mainstream controller for diversified markets.

## 1.2 Features

---

- Intel® Atom™ N2600 1.6 GHz Processor
- Intel® NM10 Express chipset
- Worldwide Slimmest fanless Boxer: Compact design: (system 125 x 77 x 20mm )
- Uniform I/O ports: USB & RJ-45, CANBus Connector
- mini-HDMI connector for HDMI output
- Anti-drop power connector design
- RJ45 for COM port
- Aluminum CNC enclosure
- Fanless System Design

### 1.3 Specifications

● CPU	Intel® Atom™ N2600 1.6 GHz	
● Chipset	Intel® NM10	
● System Memory	DDR3 SODIMM x 1, Max. 2 GB, support DDR3 800/1066	
● Display Interface	VGA	—

## 2.18 mSATA Storage Installation

---

Step 1: Remove the 4pcs M2\*4 screws in the bottom case.

Step 2: Install the mSATA module (screw in 2 pcs M2 x 3).

Step 3: Fasten the M4 x 4 screws in the bottom case.

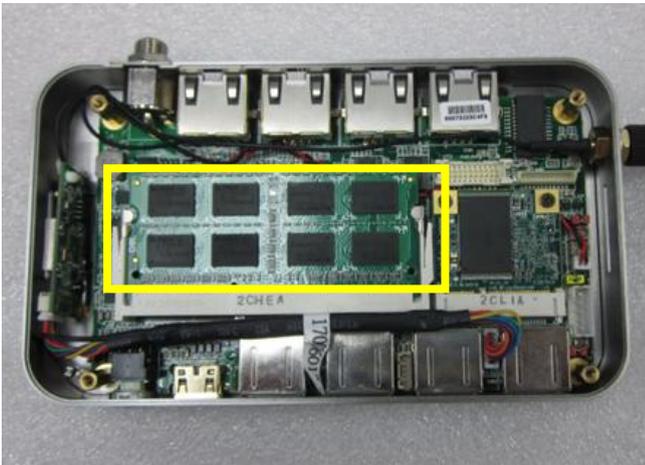

## 2.19 DRAM Installation

---

Step 1: Remove the 4pcs M2\*4 screws in the bottom case.

Step 2: Install the DRAM module.

Step 3: Fasten the M4 x 4 screws in the bottom case.

## 2.20 Mounting Bracket& burn-Proof bracket installation

---

- Mounting bracket is the middle device for DIN-RAIL & VESA-Mount.
- Burn-Proof bracket is crucial for protective use. It's recommended to install for safety.

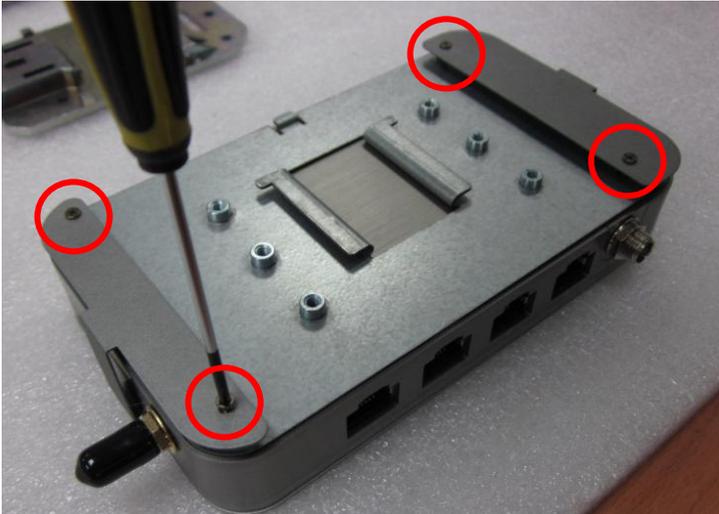

Step 1: Remove the 4pcs M2\*4 screws in the bottom case.

Step 2: Use the longer M2\*8 screws in the accessory pack to replace the M2\*4 screws.

Step 3: Then fasten the screws and install both the Mounting Bracket and Burn-Proof bracket as the following graphics show.

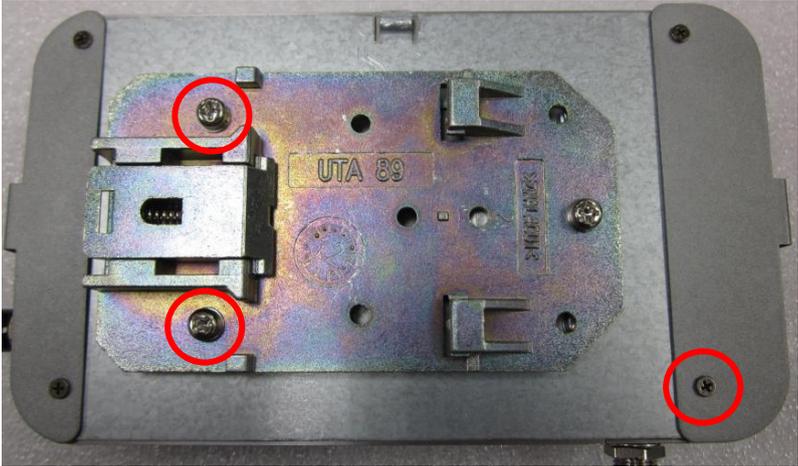

Step 4: The installation complete photo is shown below.

## 2.21 DIN-RAIL bracket Installation

Step 1: First, please install the Mounting Bracket and Burn-proof bracket as the above section 2.4 shows. Then fasten the 3 pcs M3\*6 screws to install DIN-RAIL bracket.

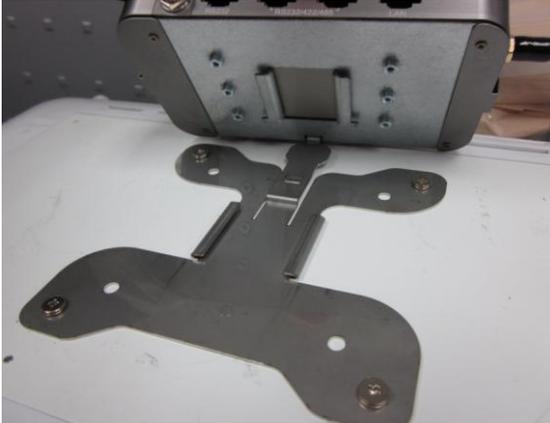

Step 2: The side-view of the installation complete photo is shown below.

## **2.22 VESA-Mount bracket Installation (for Display Panels)**

Step 1: First, please install the Mounting Bracket and Burn-proof bracket as the above section 2.4 shows. Then start to install the VESA-Mount bracket for Display Panels.

Step 2: Align the AEC-6402 with the VESA-Mount bracket through the rail. Then smoothly push the AEC-6402 to fit in the bracket.

Step 3: The installation complete photos are shown below.

**AMI**  
**BIOS Setup**

### 3.1 System Test and Initialization

---

These routines test and initialize board hardware. If the routines encounter an error during the tests, you will either hear a few short beeps or see an error message on the screen. There are two kinds of errors: fatal and non-fatal. The system can usually continue the boot up sequence with non-fatal errors.

#### System configuration verification

These routines check the current system configuration stored in the CMOS memory and BIOS NVRAM. If system configuration is not found or system configuration data error is detected, system will load optimized default and re-boot with this default system configuration automatically.

There are four situations in which you will need to setup system configuration:

1. You are starting your system for the first time
2. You have changed the hardware attached to your system
3. The system configuration is reset by Clear-CMOS jumper
4. The CMOS memory has lost power and the configuration information has been erased.

The AEC-6402 CMOS memory has an integral lithium battery backup for data retention. However, you will need to replace the

complete unit when it finally runs down.

## 3.2 AMI BIOS Setup

---

AMI BIOS ROM has a built-in Setup program that allows users to modify the basic system configuration. This type of information is stored in battery-backed CMOS RAM and BIOS NVRAM so that it retains the Setup information when the power is turned off.

### Entering Setup

Power on the computer and press <Del> or <F2> immediately. This will allow you to enter Setup.

### Main

Set the date, use tab to switch between date elements.

### Advanced

Enable/disable boot option for legacy network devices.

### Chipset

Host bridge parameters.

### Boot

Enables/disables quiet boot option.

### Security

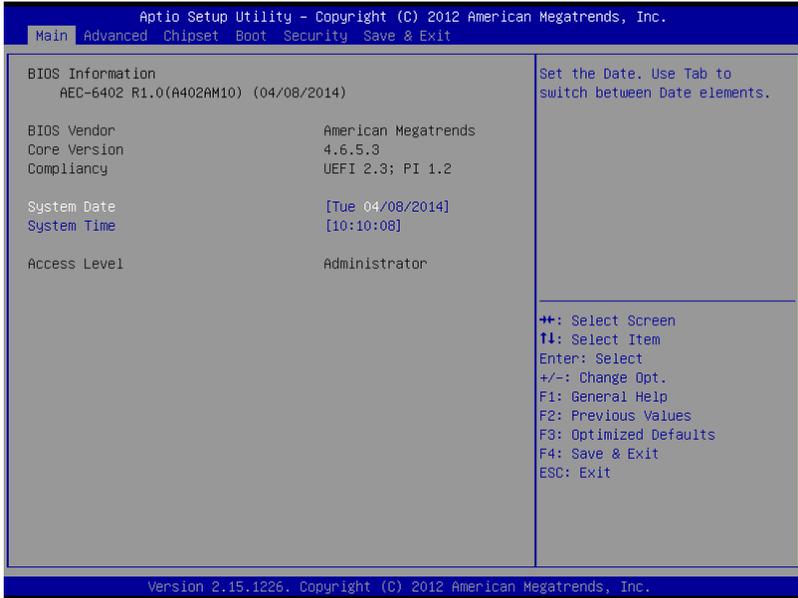

Set setup administrator password.

### Save & Exit

Exit system setup after saving the changes.

# Driver Installation

The AEC-6402 comes with an AutoRun CD-ROM that contains all drivers and utilities that can help you to install the driver automatically.

Insert the driver CD, the driver CD-title will auto start and show the installation guide. If not, please follow the sequence below to install the drivers.

***Follow the sequence below to install the drivers:***

Step 1 – Install Chipset Driver

Step 2 – Install VGA Driver

Step 3 – Install LAN Driver

Step 4 – Install AHCI Driver

Step 5 – Install Serial Port Driver (Optional)

Step 6 – Install Wireless Driver (Optional)

Step 7 – Install CAN Bus Driver (Optional)

Please read instructions below for further detailed installations.

## 4.1 Installation:

---

Insert the AEC-6402 CD-ROM into the CD-ROM drive. And install the drivers from Step 1 to Step 7 in order.

### Step 1 – Install Chipset Driver

1. Click on the **STEP1-Chipset** folder and select the OS folder your system is
2. Double click on the **infinst\_autol\_1034.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

### Step 2 – Install VGA Driver

#### For Windows® 7

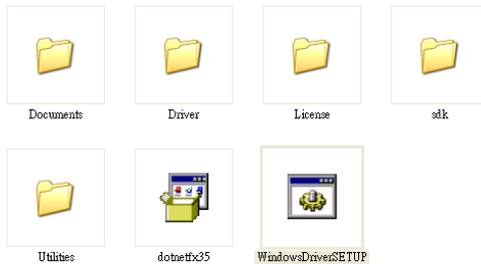

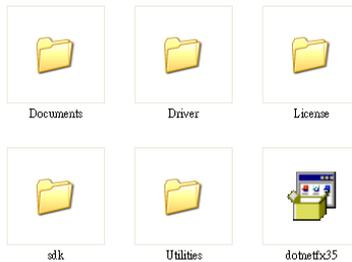

1. Click on the **STEP2-VGA** folder and select the folder of **WIN7\_32**
2. Double click on the **Setup.exe** file
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

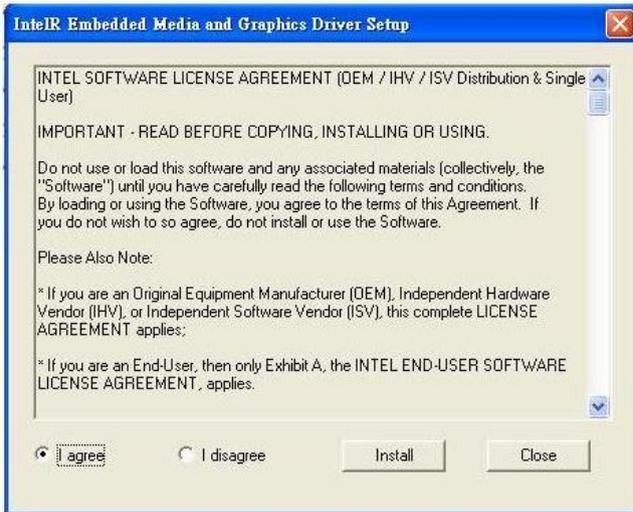

#### For Windows® XP

1. Install Framework 3.5
  - Double click on the **dotnetfx35.exe**
  - Follow the instructions that the window shows
  - The system will help you install the driver automatically

2. Install IEMGD

- Double click on the **WindowsDriverSETUP.exe**
- Select the configuration
- Follow the instructions that the window shows
- The system will help you install the driver automatically

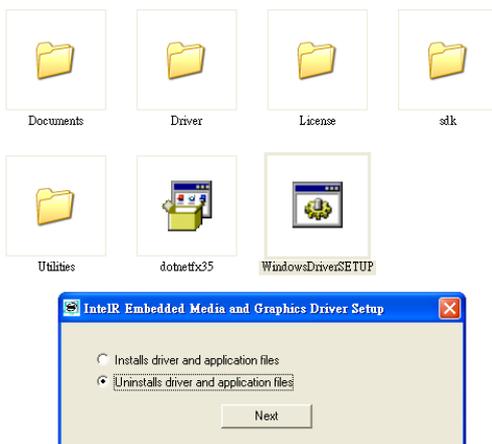

If you want to update driver, please uninstall driver first.

### Uninstall IEMGD

1. Double click on the **WindowsDriverSETUP.exe**
2. Follow the instructions that the window shows
3. The system will help you uninstall the driver automatically

### Step 3 – Install LAN Driver

1. Click on the **STEP3-LAN** folder and select the OS folder your system is
2. Double click on the **setup.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

### Step 4 – Install AHCI Driver

Please refer to the Appendix C AHCI Setting

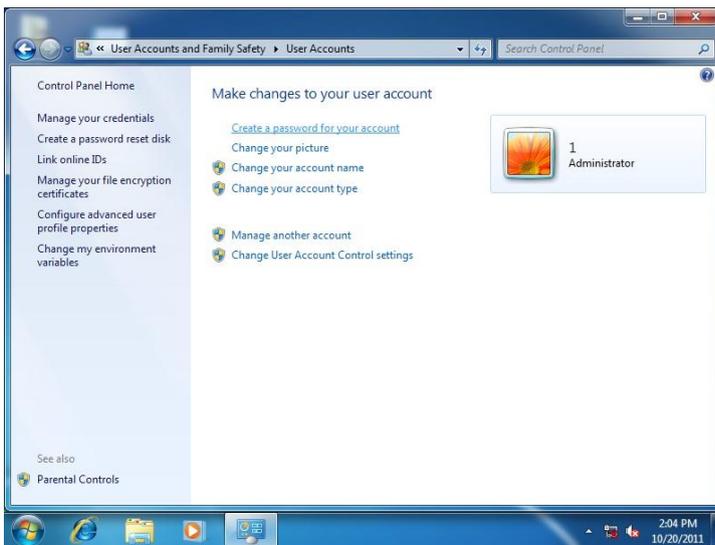

## Step 5 – Serial Port Driver (Optional)

**For Windows® XP:**

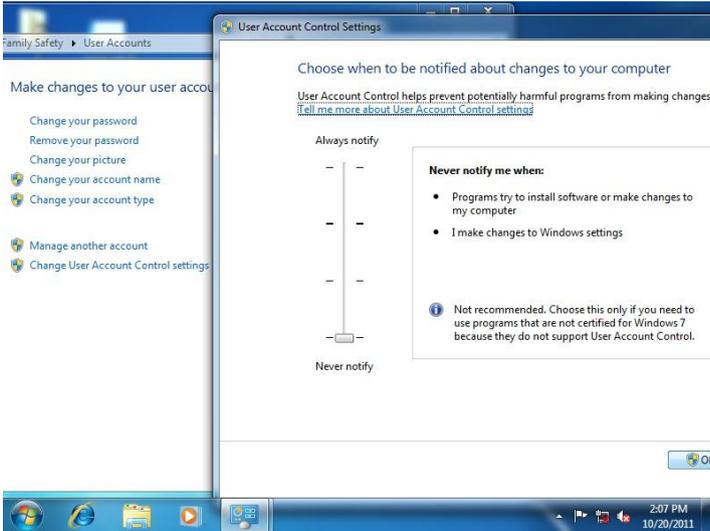

1. Click on the **STEP5-Serial Port Driver (Optional)** and select the folder of **WINXP\_32**
2. Double click on **patch.bat** file
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

**For Windows® 7:**

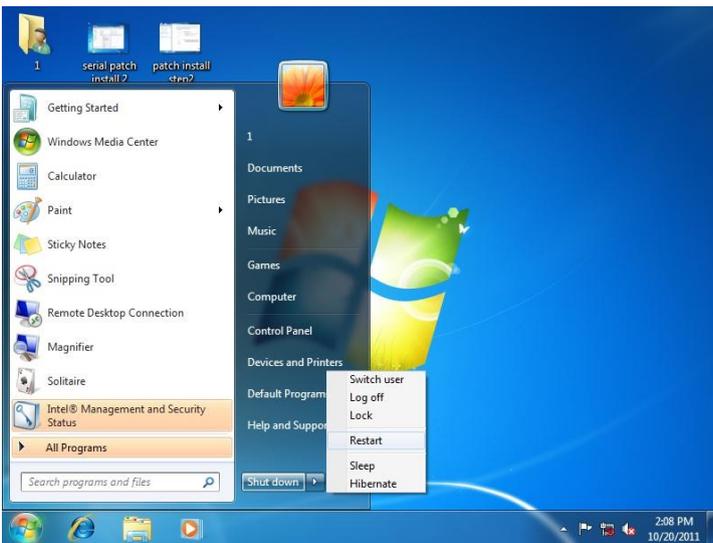

1. Create a password for Administrator account.

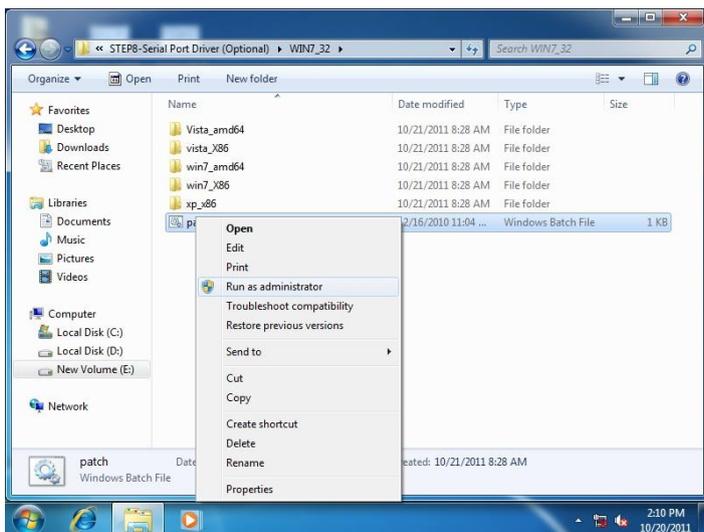

2. Change User Account Control Settings to [Never notify]

3. Reboot and Administrator login.

4. To run patch.bat with [Run as administrator].

#### Step 6 – Install Wireless Driver (Optional)

1. Click on the **STEP6-Wireless (Optional)** folder and select the OS folder your system is.
2. Double click on the **VN9271\_Windows\_V1.3.0.0\_x86** located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

#### Step 7 – Install CAN Bus Driver (Optional)

1. Click on the **STEP7-CAN Bus (Optional)** folder and select the OS folder your system is.
2. Double click on the **install.exe** located in each OS folder

3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

# Programming the Watchdog Timer

## A.1 Watchdog Timer Registers

Table 1 : Watch dog relative IO address		
	Default Value	Note
I/O Base Address	0xA00	I/O Base address for Watchdog operation. This address is assigned by SIO LDN7, register 0x60-0x61.

Table 2 : Watchdog relative register table				
Register	Offset	BitNum	Value	Note
Watchdog WDTRST# Enable	0x00	7	1	Enable/Disable time out output via WDTRST# 0: Disable 1: Enable
Pulse Width	0x05	0:1	01	Width of Pulse signal 00: 1ms (do not use) 01: 25ms 10: 125ms 11: 5s <b>Pulse width is must longer then 16ms.</b>
Signal Polarity	0x05	2	0	0: low active 1: high active <b>Must set this bit to 0</b>
Counting Unit	0x05	3	0	Select time unit. 0: second 1: minute
Output Signal Type	0x05	4	1	0: Level 1: Pulse <b>Must set this bit to 1</b>
Watchdog Timer Enable	0x05	5	1	0: Disable 1: Enable
Timeout Status	0x05	6	1	1: timeout occurred. Write a 1 to clear timeout status
Timer Counter	0x06			Time of watchdog timer (0~255)

## AHCI Setting

## C.1 Setting AHCI

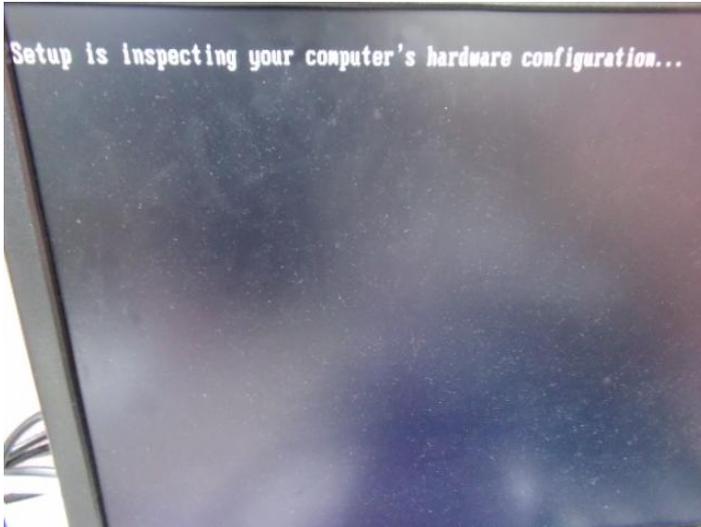

OS installation to setup AHCI Mode.

Step 1: Copy the files below from “Driver CD -> STEP5-AHCI\WIN7\_32\F6

Install Floppy Create for 32 and 64 bit Windows” to Disk

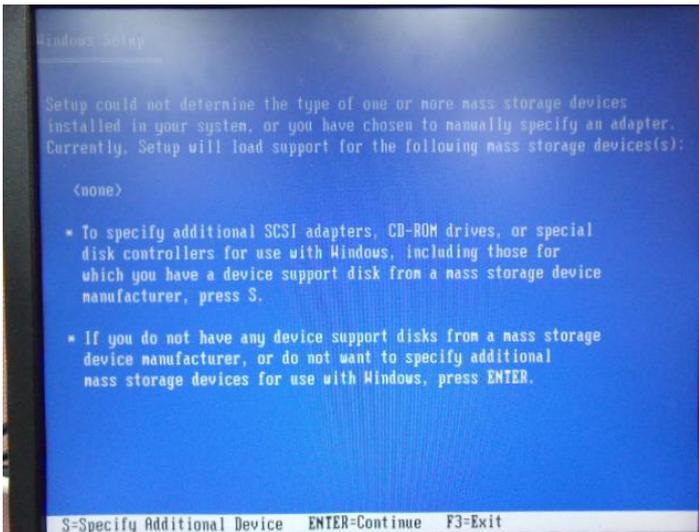

Step 2: Setup OS

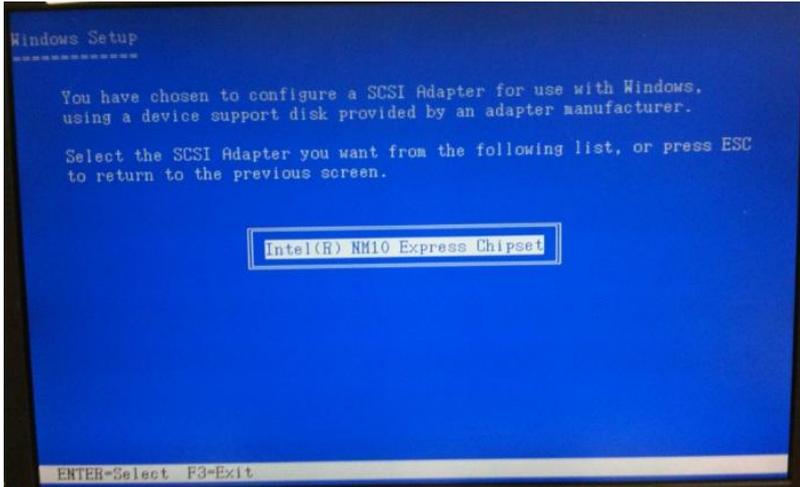

## Step 3: Press "F6"

## Step 4: Choose "S"

Step 5: Choose "Intel® NM10 Express Chipset"

Step 6: It will show the model number you select and then press "ENTER"

Step 7: Setup is loading files
