Packing List

Before setting up your product, please make sure the following items have been shipped:

Item	Quantity
● CAN Bus Carrier Board	1
● Connection Cable	1
● CAN Connector	1
● Screw/Stud Pack	1

If any of these items are missing or damaged, please contact your distributor or sales representative immediately.

About this Document

This User's Manual contains all the essential information, such as detailed descriptions and explanations on the product's hardware and software features (if any), its specifications, dimensions, jumper/connector settings/definitions, and driver installation instructions (if any), to facilitate users in setting up their product.

Users may refer to the product page at AAEON.com for the latest version of this document.

Safety Precautions

Please read the following safety instructions carefully. It is advised that you keep this manual for future references

1. All cautions and warnings on the device should be noted.
2. Make sure the power source matches the power rating of the device.
3. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
4. Always completely disconnect the power before working on the system's hardware.
5. No connections should be made when the system is powered as a sudden rush of power may damage sensitive electronic components.
6. If the device is not to be used for a long time, disconnect it from the power supply to avoid damage by transient over-voltage.
7. Always disconnect this device from any AC supply before cleaning.
8. While cleaning, use a damp cloth instead of liquid or spray detergents.
9. Make sure the device is installed near a power outlet and is easily accessible.
10. Keep this device away from humidity.
11. Place the device on a solid surface during installation to prevent falls
12. Do not cover the openings on the device to ensure optimal heat dissipation.
13. Watch out for high temperatures when the system is running.
14. Do not touch the heat sink or heat spreader when the system is running
15. Never pour any liquid into the openings. This could cause fire or electric shock.
16. As most electronic components are sensitive to static electrical charge, be sure to ground yourself to prevent static charge when installing the internal components. Use a grounding wrist strap and contain all electronic components in any static-shielded containers.

17. If any of the following situations arises, please the contact our service personnel:
 - i. Damaged power cord or plug
 - ii. Liquid intrusion to the device
 - iii. Exposure to moisture
 - iv. Device is not working as expected or in a manner as described in this manual
 - v. The device is dropped or damaged
 - vi. Any obvious signs of damage displayed on the device
18. **DO NOT LEAVE THIS DEVICE IN AN UNCONTROLLED ENVIRONMENT WITH TEMPERATURES BEYOND THE DEVICE'S PERMITTED STORAGE TEMPERATURES (SEE CHAPTER 1) TO PREVENT DAMAGE.**

FCC Statement

Warning!

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

Caution:

There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions and your local government's recycling or disposal directives.

Attention:

Il y a un risque d'explosion si la batterie est remplacée de façon incorrecte. Ne la remplacer qu'avec le même modèle ou équivalent recommandé par le constructeur. Recycler les batteries usées en accord avec les instructions du fabricant et les directives gouvernementales de recyclage.

Chapter 3

Hardware & Software Installation

3.1 Hardware Installation

Step 1: Remove the four (4) screws from the outer edges of the board.

Step 2: Affix and lock the four (4) pillars to the board.

Step 3: Put CANBus Board on top of the pillars and affix and lock screws.

Board assembly direction reference photo:

Step 4: Plug in cable with the board.

3.2 Ubuntu OS Driver Settings

3.2.1 Installing Ubuntu

Ubuntu can be downloaded from the official website here:
<https://ubuntu.com/download/desktop> and navigating to the Downloads section.

3.3 CANBus User Guide

3.3.1 Installation Instructions

Step 1: In the folder, right-click to select Open in Terminal.

Step 2: Enter command:

```
sudo chmod 777
```

```
a@a-SYSTEM-PRODUCT-NAME:~/UPCanBus_release$ sudo chmod 777 *  
[sudo] password for a:  
a@a-SYSTEM-PRODUCT-NAME:~/UPCanBus_release$
```

Step 3: Ensure Ethernet is connected.

Step 4: Input command:

```
./Setup.sh install
```

```
a@a-SYSTEM-PRODUCT-NAME:~/UPCanBus_release$ ./Setup.sh install  
Host already install can-utils  
find canbus uart successfully  
replace uart_pid 0x9dc7 to 0x9dc7  
Setup file will copy to /opt/aaeon/canbus , if need,you could go there to use  
Created symlink /etc/systemd/system/multi-user.target.wants/UpCanUsb.service → /etc/systemd/system/UpCanUsb.service.  
Created symlink /etc/systemd/system/multi-user.target.wants/UpCanUart.service → /etc/systemd/system/UpCanUart.service.  
You need to reboot to active udev
```

Step 5: Following reboot, CANBus will be usable.

Optional: Check CANBus via command:

```
ip a
```

```
4: can1: <NOARP,UP,LOWER_UP> mtu 16 qdisc pfifo_fast state UP group default qlen 10000  
    link/can  
5: can0: <NOARP,UP,LOWER_UP> mtu 16 qdisc pfifo_fast state UP group default qlen 10000  
    link/can
```

3.3.2 Uninstalling CAN

Step 1: Open terminal and navigate to the appropriate folder using the following command:

```
cd /opt/aaeon/canbus/
```

Step 2: To uninstall, use following command:

```
./Setup.sh uninstall
```

```
a@a-SYSTEM-PRODUCT-NAME:/opt/aaeon/canbus$ ./Setup.sh uninstall
remove aaeon UP can rules
[sudo] password for a:
Removed /etc/systemd/system/multi-user.target.wants/UpCanUsb.service.
Removed /etc/systemd/system/multi-user.target.wants/UpCanUart.service.
a@a-SYSTEM-PRODUCT-NAME:/opt/aaeon/canbus$
```

3.3.3 Change Baud Rate and CAN Interface Name

To change the naming configuration of `uartcan.sh` or `usbcan.sh` you must first navigate to the below folder. Note that changing interface name(s) requires super user permissions.

```
Open [R]          usbcan.sh [Read-Only]
/opt/aaeon/canbus  Save [Menu] [Close] [Maximize]

Once file names have been changed, the following command is required to restart service.

If USB CANBus file name has been changed, enter command:

```
sudo systemctl stop UpCanUsb.service
```

```
sudo systemctl start UpCanUsb.service
```

If UART CANBus file name has been changed, enter command:

```
sudo systemctl stop UpCanUart.service
```

```
sudo systemctl start UpCanUart.service
```

3.3.4 Update Tool

Type the following command to run script:

```
sudo ./bootloader.sh
```

Click Configure and Select "3C" to Apply.

Open "Console".

Select bin file to record.

Click Program Device to record.
