Packing List

(Standard, not bulk pack)

Before you begin installing your card, please make sure that the following materials have been shipped:

- 1 9657666600 Jumper Cap
- 1 1709070500 Serial ATA Cable
- 1 1702151200 Onboard Serial ATA Power Cable
- 1 1700060152 Keyboard/Mouse Cable
- 1 Product DVD
- 1 EMB-QM67

If any of these items should be missing or damaged, please contact your distributor or sales representative immediately.

General Information

1.1 Introduction

The EMB-QM67 supports Intel® Socket G2 (rPGA998B) 2nd Generation Intel® Core™ i7/i5/Celeron® QC/DC processor which when paired with the Intel® QM67 chipset offers a high performance computing platform with low power consumption. This new product supports two 204-pin dual-channel DDR3 SODIMM at speeds of 1066/1333/1600 MHz, up to 8 GB.

One CompactFlash™, two SATA 6.0Gb/s and two SATA 3.0 Gb/s interfaces provide ample storages. With dual Gigabit Ethernet, six COM ports, and eight USB2.0, the EMB-QM67 meets the requirements of today's demanding applications.

Display requirements are met with an abundance of interfaces such as CRT, DVI, HDMI, and LVDS. The graphic engine adopts 2nd generation Intel® Core™i7/i5/Celeron® integrated Gfx Gen 5.75 graphics to offer high definition display function.

With all of its integrated features, the EMB-QM67 strikes a balance of performance and price. This versatile product targets Industrial Automation, Entertainment, Networking, KIOSK/POS, Transportation, Banking, Healthcare and Digital Signage applications that require high performance and high reliability.

1.2 Features

- Socket G2 (rPGA988B) 2nd Generation for Intel® Core™ i7/ i5/Celeron® QC/ DC Processor Up to 45W
- Intel® QM67
- 204-pin Dual-Channel DDR3 1066/1333/1600 MHz SODIMM x 2, Up to 8 GB
- Gigabit Ethernet x 2
- Intel® Integrated Graphics Engine Supports Dual View by VGA, DVI, HDMI, LVDS
- HD Audio
- SATA 3.0Gb/s x 2, Support RAID 0,1,5,10
- USB2.0 x 8, COM x 6
- PCI-Express [x4] x 1, Mini PCI-Express x 1, CFast™ x 1, TPM x 1 (Optional)

1.3 Specifications

System

● Form Factor	Mini-ITX
● Processor	Socket G2 (rPGA988B) 2nd Generation for Intel® Core™ i7 / i5 / Celeron® QC /DC processor, up to 45W
● System Memory	204-pin Dual Channel DDR3 1066/1333/1600 MHz SODIMM x 2, up to 8GB
● Chipset	Intel® Core i7/i5 QM67
● Ethernet	10/100/1000Base-TX, RJ-45 x 2
● BIOS	AMI BIOS 64Mbit SPI ROM
● Wake On LAN	Yes
● Watchdog Timer	Reset: 1 sec. ~ 255 min. and 1 sec. or 1 min./step
● H/W Status Monitoring	Monitoring system temperature, voltage, and cooling fan status
● Expansion Interface	PCI-E [x4] x 1, Mini PCIe socket x 1, CFast™ x 1, TPM Module x 1 (Optional)
● Battery	Lithium Battery
● Power Requirement	ATX
● Board Size	6.7" x 6.7" (170mm x 170mm)
● Gross Weight	1.32 lb (0.6Kg)
● Operating Temperature	32°F~140°F (0°C~60°C)
● Storage Temperature	-4°F~158°F (-20°C~70°C)
● Operating Humidity	5% ~ 95% relative humidity, non-condensing
● MTBF	70,000

Display: Supports CRT/LCD simultaneous / dual view displays

- Chipset Intel® Core i7/i5 + QM67
- Memory 2nd Generation Intel® Core™ i7 / i5 / Celeron® integrated Gfx Gen 5.75 graphics
- Resolution Up to 2048x1536 @ 60 Hz for CRT
Up to 1366 x 768 @ 60 Hz for LCD
- Output Interface DB-15 x 1, DVI-D x 1, HDMI x 1, LVDS x 1

I/O: ITE IT8728F+ Fintek F81216DG

- Storage SATA 6.0Gb/s x 2 , SATA 3.0Gb/s x 2, CompactFlash™ Type II x 1
- Serial Port RS-232 x 5 (box headers)
RS-232/422/485 x 1, supports 5/12V on the 9th (on I/O)
- USB USB2.0 x 8
- PS/2 Port Keyboard x 1, Mouse x 1
- Digital I/O 8-bit Programmable
- Audio HD Audio Realtek ALC 892 Codec with phone Jack

Chapter

2

**Quick
Installation
Guide**

2.1 Safety Precautions

Warning!

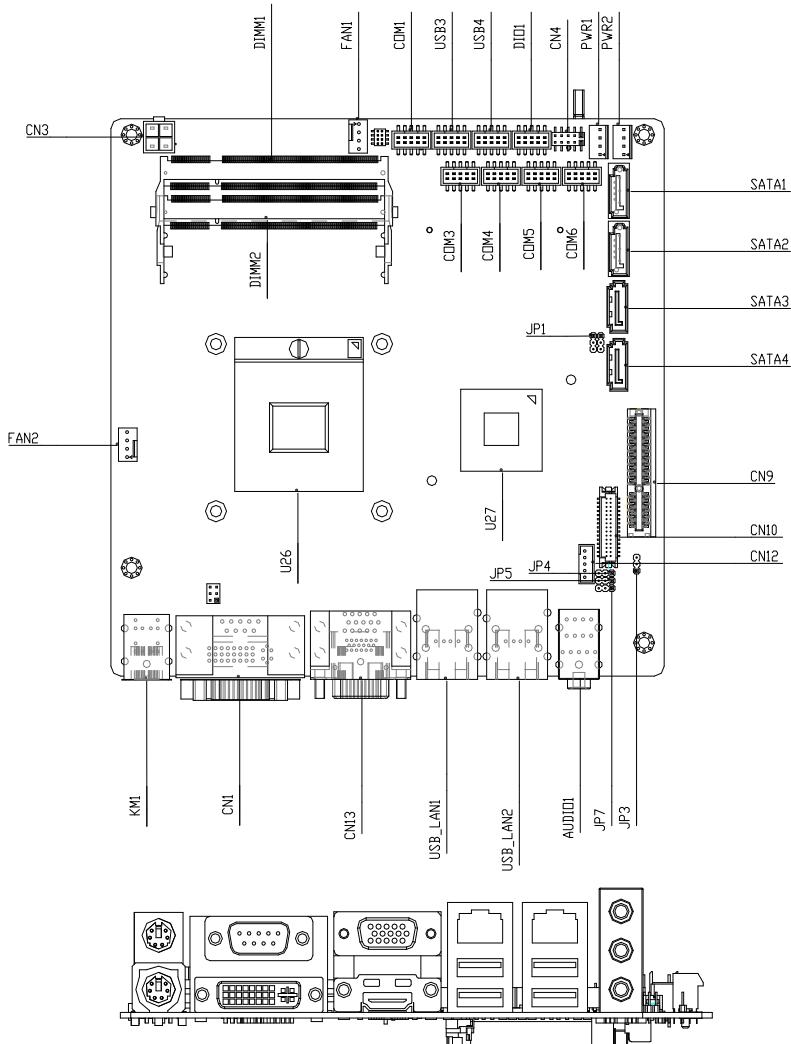

Always completely disconnect the power cord from your board whenever you are working on it. Do not make connections while the power is on, because a sudden rush of power can damage sensitive electronic components.

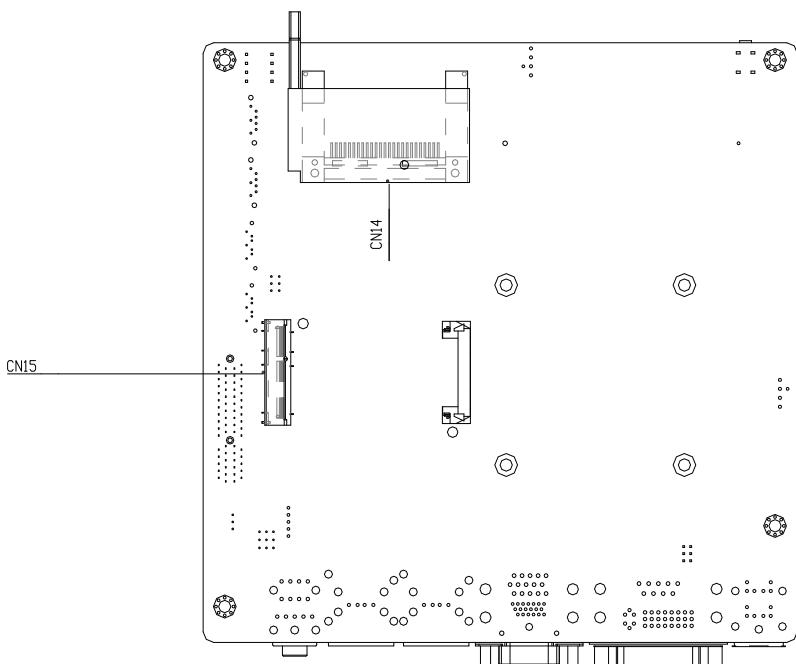

Caution!

Always ground yourself to remove any static charge before touching the board. Modern electronic devices are very sensitive to static electric charges. Use a grounding wrist strap at all times. Place all electronic components on a static-dissipative surface or in a static-shielded bag when they are not in the chassis

2.2 Location of Connectors and Jumpers

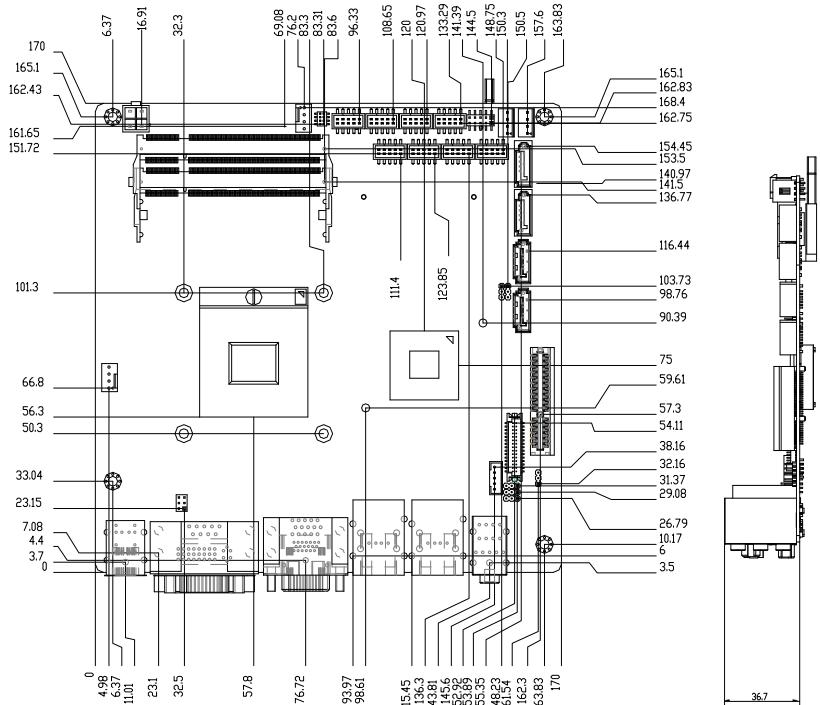

Component Side

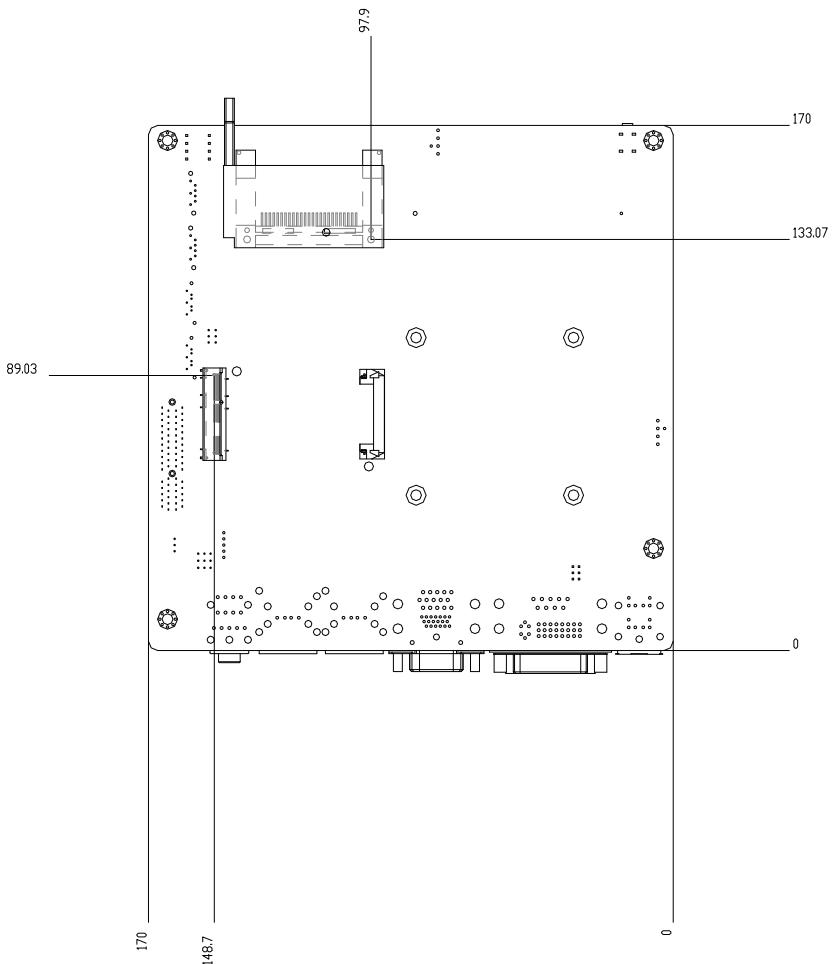

Solder Side

2.3 Mechanical Drawing

Component Side

Solder Side

2.4 List of Jumpers

The board has a number of jumpers that allow you to configure your system to suit your application.

The table below shows the function of each of the board's jumpers:

Label	Function
JP1	Clear CMOS
JP3	Auto Power Button
JP4	LVDS Voltage Selection
JP6	+12V/+5V/RING Selection
JP7	Inverter Power Selection

2.5 List of Connectors

The board has a number of connectors that allow you to configure your system to suit your application.

The table below shows the function of each of the board's connectors:

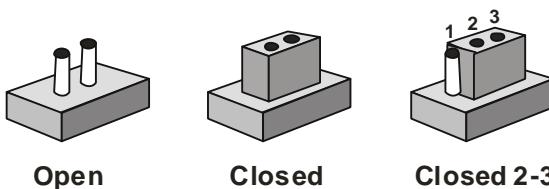

Label	Function
DIO1	Digital I/O
PWR1 ~ PWR2	SATA POWER
CN1	COM2 / DVI Connector
CN3	4-pin ATX Power +12V Connector
CN4	Front Panel Connector 1
CN9	PCIE*4 Connector
CN10	LVDS Connector
CN12	LVDS Inverter / Backlight Connector
CN13	VGA / HDMI Connector
CN14	CFast™ Connector

CN15	Mini Card Connector
KM1	Keyboard/Mouse Connector
COM1	RS-232 Box Header
COM2	RS-232/422/485 DB-9 Connector
COM3 ~ COM6	RS-232 Box Header
SATA1~SATA2	SATA 3.0 Connector
SATA3~SATA4	SATA Connector
USB_LAN1 ~ USB_LAN2	LAN / USB Connector
DIMM1,DIMM2	DDR3 DIMM Slot
USB3 ~ USB4	USB Box Header
FAN1~ FAN2	4 Pin Fan Connector
AUDIO1	AUDIO Connector

2.6 Setting Jumpers

You configure your card to match the needs of your application by setting jumpers. A jumper is the simplest kind of electric switch. It consists of two metal pins and a small metal clip (often protected by a plastic cover) that slides over the pins to connect them. To “close” a jumper you connect the pins with the clip.

To “open” a jumper you remove the clip. Sometimes a jumper will have three pins, labeled 1, 2 and 3. In this case you would connect either pins 1 and 2 or 2 and 3.

A pair of needle-nose pliers may be helpful when working with jumpers.

If you have any doubts about the best hardware configuration for your application, contact your local distributor or sales representative before you make any change.

Generally, you simply need a standard cable to make most connections.

2.7 Clear CMOS (JP1)

JP1	Function
1-2	Normal (Default)
2-3	Clear CMOS

2.8 Auto Power Button (JP3)

JP3	Function
1-2	ATX (Default)
2-3	AT

2.9 LCD Voltage Selection (JP4)

JP4	Function
1-2	+5V
2-3	+3.3V (Default)

2.10 +12V/+5V/Ring Selection (JP6)

JP6	Function
1-2	+12V
3-4	Ring (Default)
5-6	+5V

2.11 Inverter Power Selection (JP7)

JP7	Function
1-2	+12V (Default)
2-3	+5V

2.12 Digital I/O (DIO1)

This connector offers 4-pair of digital I/O functions and address is A00H. The pin definitions are illustrated below:

Pin	Signal	Pin	Signal
1	Digital- IN/OUT(Port1 Bit 1)	2	Digital- IN/OUT (Port1 Bit 2)

3	Digital- IN/OUT (Port1 Bit 4)	4	Digital- IN/OUT (Port3 Bit 4)
5	Digital- IN/OUT (Port3 Bit 5)	6	Digital- IN/OUT (Port3 Bit 6)
7	Digital- IN/OUT (Port3 Bit 7)	8	Digital- IN/OUT (Port6 Bit 3)
9	+3.3V	10	GND

The pin definitions and registers mapping are illustrated below:

Address: A00H

4 in / 4 out

Pin1	Pin2	Pin3	Pin4	Pin5	Pin6	Pin7	Pin8
GPI 11	GPI 12	GPI 14	GPI 34	GPO 35	GPO 36	GPO 37	GPO 63

8 in

Pin1	Pin2	Pin3	Pin4	Pin5	Pin6	Pin7	Pin8
GPI 11	GPI 12	GPI 14	GPI 34	GPO 35	GPO 36	GPO 37	GPO 63

8 out

Pin1	Pin2	Pin3	Pin4	Pin5	Pin6	Pin7	Pin8
GPI 11	GPI 12	GPI 14	GPI 34	GPO 35	GPO 36	GPO 37	GPO 63

2.13 SATA Power (PWR1~PWR2)

Pin	Signal
1	+12V
2	GND
3	GND
4	+5V

2.14 Front Panel Connector (CN4)

Pin	Signal	Pin	Signal
1	Power On Button (-)	2	Power On Button (+)

3	HDD LED (-)	4	HDD LED (+)
5	SPEAKER(-)	6	SPEAKER(+)
7	Power LED (-)	8	Power LED (+)
9	Reset Switch (-)	10	Reset Switch (+)

2.15 LAN1~LAN2 Active /Link/ Speed LED (CN6)

Pin	Signal	Pin	Signal
1	LAN1_LED_D2	2	LAN1_LED_LNK#_ACT
3	LAN1_LED_1000#	4	LAN1_LED_100#
5	LAN2_LED_D2	6	LAN2_LED_LNK#_ACT
7	LAN2_LED_1000#	8	LAN2_LED_100#

2.16 LVDS Connector (CN10)

Pin	Signal	Pin	Signal
1	BKL_EN	2	BKL_CTL
3	LVDSVCC	4	GND
5	LVDSA_CLK#	6	LVDSA_CLK
7	LVDSVCC	8	GND
9	LVDSA_DATA0#	10	LVDSA_DATA0
11	LVDSA_DATA1#	12	LVDSA_DATA1
13	LVDSA_DATA2#	14	LVDSA_DATA2
15	LVDSA_DATA3#	16	LVDSA_DATA3
17	LVDS_DDC_DATA	18	LVDS_DDC_CLK
19	LVDSB_DATA0#	20	LVDSB_DATA0
21	LVDSB_DATA1#	22	LVDSB_DATA1
23	LVDSB_DATA2#	24	LVDSB_DATA2
25	LVDSB_DATA3#	26	LVDSB_DATA3
27	LVDSVCC	28	GND
29	LVDSB_CLK#	30	LVDSB_CLK

2.17 LVDS Inverter/ Backlight Connector (CN12)

Pin	Signal	Pin	Signal
1	VDD	2	BKL_CTL
3	GND	4	GND
5	BKL_EN		

2.18 RS-232 Box Header (COM1)

Pin	Signal	Pin	Signal
1	DCD	2	RXD
3	TXD	4	DTR
5	GND	6	DSR
7	RTS	8	CTS
9	RI

产品中有毒有害物质或元素名称及含量

AAEON Main Board/ Daughter Board/ Backplane

部件名称	有毒有害物质或元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
印刷电路板 及其电子组件	○	○	○	○	○	○
外部信号 连接器及线材	○	○	○	○	○	○
O:	表示该有毒有害物质在该部件所有均质材料中的含量均在 SJ/T 11363-2006 标准规定的限量要求以下。					
X:	表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T 11363-2006 标准规定的限量要求。					
备注: 此产品所标示之环保使用期限, 系指在一般正常使用状况下。						

Chapter

3

**AMI
BIOS Setup**

3.1 System Test and Initialization

These routines test and initialize board hardware. If the routines encounter an error during the tests, you will either hear a few short beeps or see an error message on the screen. There are two kinds of errors: fatal and non-fatal. The system can usually continue the boot up sequence with non-fatal errors.

System configuration verification

These routines check the current system configuration against the values stored in the CMOS memory. If they do not match, the program outputs an error message. You will then need to run the BIOS setup program to set the configuration information in memory.

There are three situations in which you will need to change the CMOS settings:

1. You are starting your system for the first time
2. You have changed the hardware attached to your system
3. The CMOS memory has lost power and the configuration information has been erased.

The EMB-QM67 CMOS memory has an integral lithium battery backup for data retention. You have to replace the battery when it finally runs down.

3.2 AMI BIOS Setup

AMI BIOS ROM has a built-in Setup program that allows users to modify the basic system configuration. This type of information is stored in battery-backed CMOS RAM so that it retains the Setup information when the power is turned off.

Entering Setup

Power on the computer and press or <F2> immediately. This will allow you to enter Setup.

Main

Set the date, use tab to switch between date elements.

Advanced

Enable disable boot option for legacy network devices.

Chipset

host bridge parameters.

Boot

Enables/disable quiet boot option.

Security

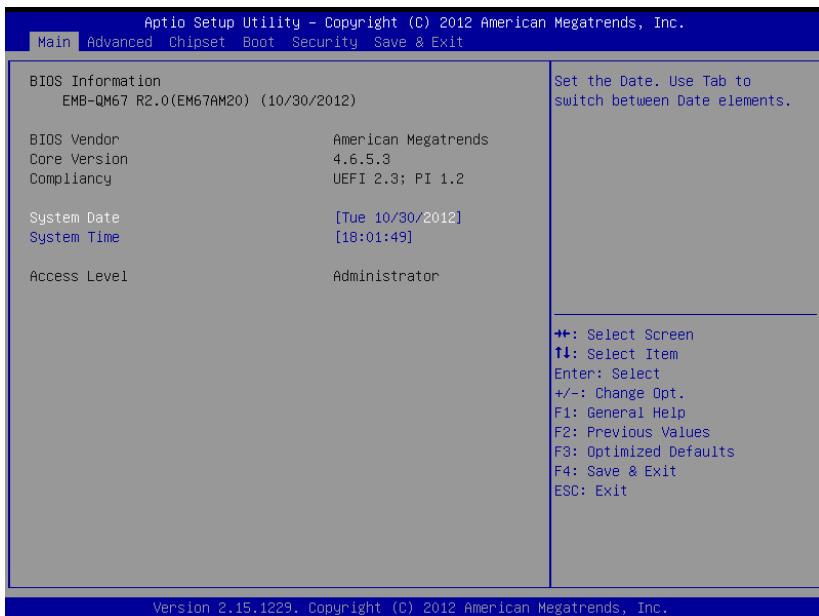

Set setup administrator password.

Save&Exit

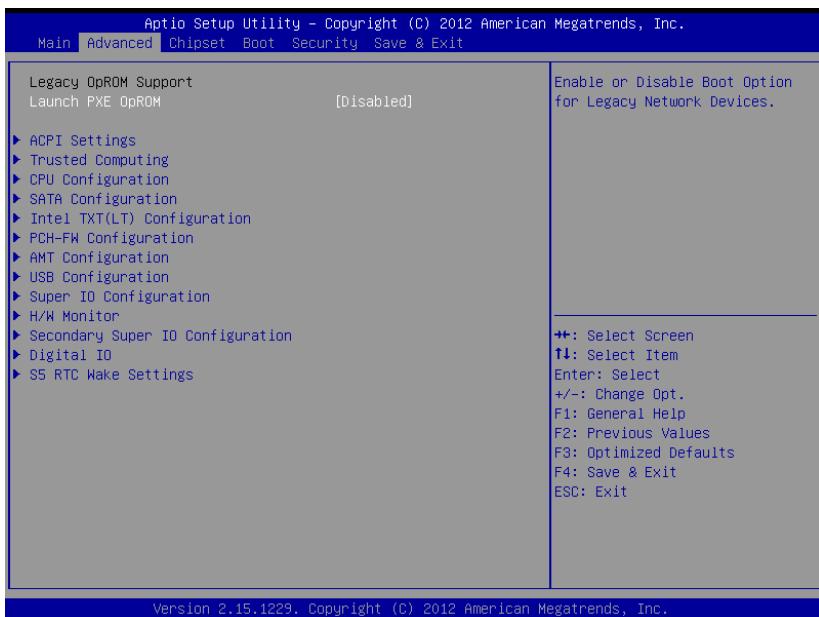

Exit system setup after saving the changes.

Setup Menu

Setup submenu: Main

Advanced

Security

Change User/Supervisor Password

You can install a Supervisor password, and if you install a supervisor password, you can then install a user password. A user password does not provide access to many of the features in the Setup utility.

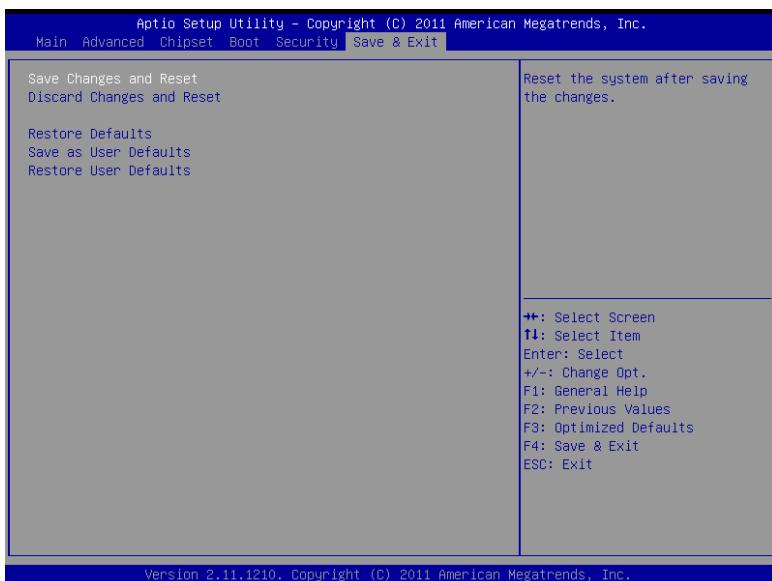

If you highlight these items and press Enter, a dialog box appears which lets you enter a password. You can enter no more than six letters or numbers. Press Enter after you have typed in the password. A second dialog box asks you to retype the password for confirmation. Press Enter after you have retyped it correctly. The password is required at boot time, or when the user enters the

Setup utility.

Removing the Password

Highlight this item and type in the current password. At the next dialog box press Enter to disable password protection.

Exit

Save Changes and Reset

Reset the system after saving the changes. This is the suggested method to exit BIOS setup menu that if you have modify any settings.

Discard Changes and Reset

Reset system setup without saving any changes. It will continue system booting without reset.

Restore Defaults

Restore/Load Default values for all the setup options.

Save as User Defaults

Save the changes done so far as User Defaults.

Restore User Defaults

Restore the User Defaults to all the setup options.

4

Driver Installation

The EMB-QM67 comes with an AutoRun DVD-ROM that contains all drivers and utilities that can help you to install the driver automatically.

Insert the driver DVD, the driver DVD-title will auto start and show the installation guide. If not, please follow the sequence below to install the drivers.

Follow the sequence below to install the drivers:

- Step 1 – Install Chipset Driver
- Step 2 – Install VGA Driver
- Step 3 – Install LAN Device
- Step 4 – Install Audio Driver
- Step 5 – Install ME Driver
- Step 6 – Install RAID Driver
- Step 7 – Install TPM Driver
- Step 8 – Install Serial Port Driver (Optional)

Note: If you got compatible issue for COM port, please find its driver under STEP 8 folder and then install it by administrative login permission.

Please read instructions below for further detailed installations.

4.1 Installation:

Insert the EMB-EM67 DVD-ROM into the DVD-ROM drive. And install the drivers from Step 1 to Step 8 in order.

Step 1 – Install Chipset Driver

1. Click on the **STEP 1-CHIPSET** folder and select the OS folder your system is
2. Double click on the **infinst_autol.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Step 2 – Install VGA Driver

1. Click on the **STEP2-VGA** folder and select the OS folder your system is
2. Double click on the **.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Note 1:

- This motherboard supports VGA and LVDS display devices. In Single Display mode, use the hot keys to switch between VGA to LVDS device or vice versa. By default, press **<Ctrl>+<Alt>+<F1>** to switch to VGA device and press **<Ctrl>+<Alt>+<F3>** to switch to LVDS device.
- Before removing the current display device, connect the display device that you want to use, and then press the hot keys to switch to that device.

Note 2: If the OS is Windows® XP, you have to install the driver of dotNet Framework first. Simply click on **dotnetfx35.exe** located in **dotNet Framework** folder.

Step 3 –Install LAN Device

1. Click on the **STEP3-LAN** folder and select the OS folder your system is
2. Double click on the **Setup.exe** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Step 4 –Install Audio Driver

1. Click on the **STEP4-AUDIO** folder and select the OS folder your system is
2. Double click on the **Setup.exe** located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Step 5 – Install ME Driver

1. Click on the **STEP5-ME** folder and select the folder of OS folder your system is
2. Double click on the **Setup.exe** located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Step 6 – Install RAID & AHDI Driver

Please refer to the ***Appendix D RAID & AHDI Settings***

Step 7 – Install TPM Driver

1. Click on the ***STEP7-TPM*** folder and select the folder of OS folder your system is
2. Double click on the ***Setup.exe*** located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Step 8 –Install Serial Port Driver (Optional)

1. Click on the ***STEP8-Serial Port Driver (Optional)*** folder and select the folder of OS folder your system is
2. Double click on the ***patch.bat*** located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Appendix

A

Programming the Watchdog Timer

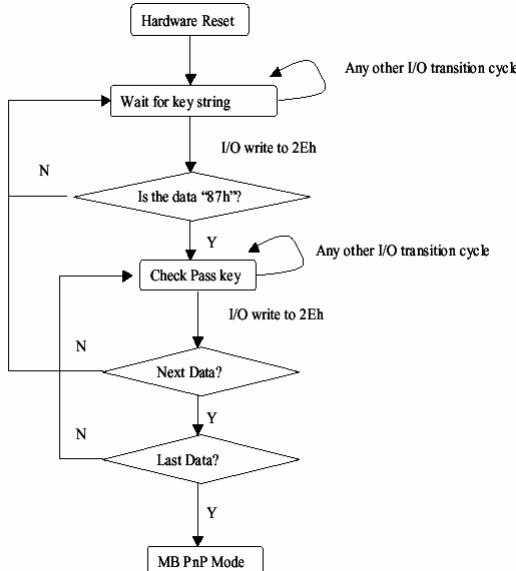

A.1 Programming

EMB-QM67 utilizes ITE IT8728 chipset as its watchdog timer controller.

Below are the procedures to complete its configuration and the AAEON intial watchdog timer program is also attached based on which you can develop customized program to fit your application.

Configuring Sequence Description

After the hardware reset or power-on reset, the ITE 8728 enters the normal mode with all logical devices disabled except KBC. The initial state (enable bit) of this logical device (KBC) is determined by the state of pin 121 (DTR1#) at the falling edge of the system reset during power-on reset.

There are three steps to complete the configuration setup: (1) Enter the MB PnP Mode; (2) Modify the data of configuration registers; (3) Exit the MB PnP Mode. Undesired result may occur if the MB PnP Mode is not exited normally.

(1) Enter the MB PnP Mode

To enter the MB PnP Mode, four special I/O write operations are to be performed during Wait for Key state. To ensure the initial state of the key-check logic, it is necessary to perform four write operations to the Special Address port (2EH). Two different enter keys are provided to select configuration ports (2Eh/2Fh) of the next step.

Address Port	Data Port
87h, 01h, 55h, 55h:	2Eh 2Fh

(2) Modify the Data of the Registers

All configuration registers can be accessed after entering the MB PnP Mode. Before accessing a selected register, the content of Index 07h must be changed to the LDN to which the register belongs, except some Global registers.

(3) Exit the MB PnP Mode

Set bit 1 of the configure control register (Index=02h) to 1 to exit the MB PnP Mode.

WatchDog Timer Configuration Registers

LDN Index R/W Reset Configuration Register or Action

All	02H	W	N/A	Configure Control
07H	71H	R/W	00H	WatchDog Timer Control Register
07H	72H	R/W	00H	WatchDog Timer Configuration Register
07H	73H	R/W	00H	WatchDog Timer Time-out Value Register

Configure Control (Index=02h)

This register is write only. Its values are not sticky; that is to say, a hardware reset will automatically clear the bits, and does not require the software to clear them.

Bit Description

7-2 Reserved

1 Returns to the Wait for Key state. This bit is used when the configuration sequence is completed

0 Resets all logical devices and restores configuration registers to their power-on states.

WatchDog Timer Control Register (Index=71h, Default=00h)

Bit	Description
7	WDT is reset upon a CIR interrupt
6	WDT is reset upon a KBC (mouse) interrupt
5	WDT is reset upon a KBC (keyboard) interrupt
4	WDT is reset upon a read or a write to the Game Port base address
3-2	Reserved
1	Force Time-out. This bit is self-clearing
0	WDT Status
	1: WDT value reaches 0.
	0: WDT value is not 0

WatchDog Timer Configuration Register (Index=72h, Default=00h)

Bit	Description
7	WDT Time-out value select
	1: Second
	0: Minute
6	WDT output through KRST (pulse) enable
5-4	Reserved
3-0	Select the interrupt level ^{Note} for WDT

WatchDog Timer Time-out Value Register (Index=73h, Default=00h)

Bit	Description
7-0	WDT Time-out value 7-0

Appendix

D

RAID & AHCI Settings

D.1 Setting RAID

OS installation to setup RAID Mode

Step 1: Copy the files below from “Driver CD -> Step 7-

RAID&AHCI\WinXP_32“ to Disk

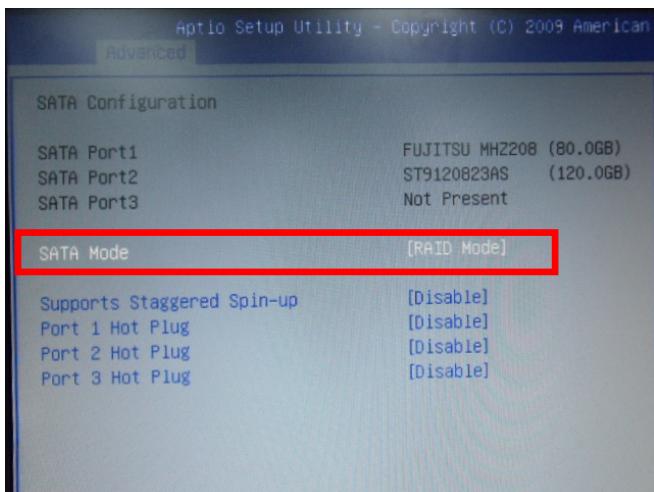

Step 2: Connect the USB Floppy (disk with RAID files) to the board

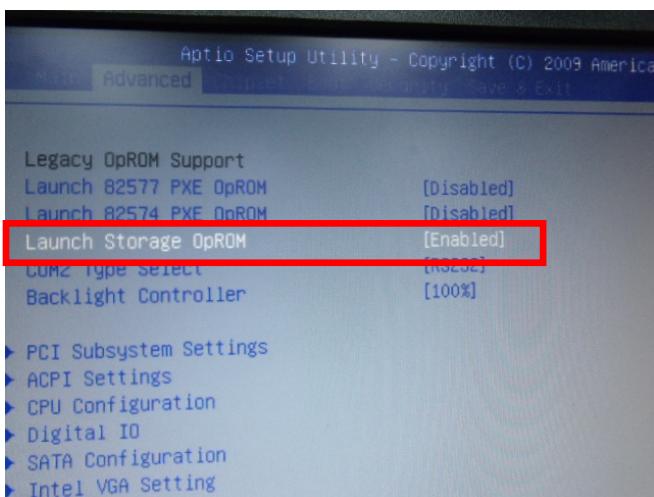

Step 3: The setting procedures “**In BIOS Setup Menu**”

A: Advanced -> SATA Configuration -> SATA Mode -> RAID Mode

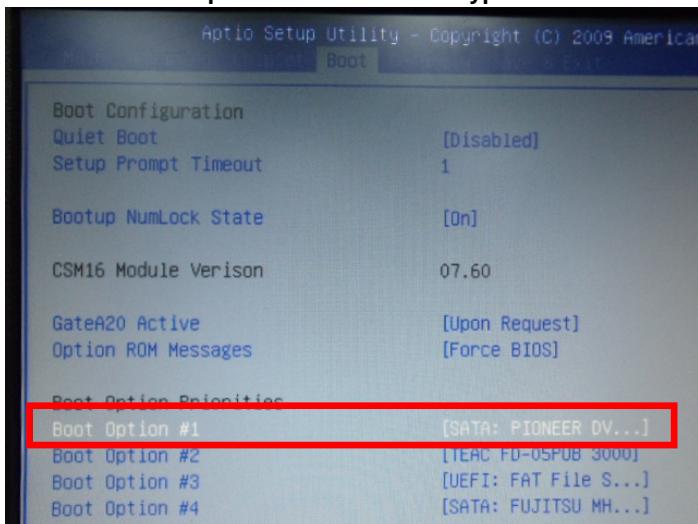

Step 4: The setting procedures “**In BIOS Setup Menu**”

B: Advanced -> Launch Storage OpROM -> Enabled

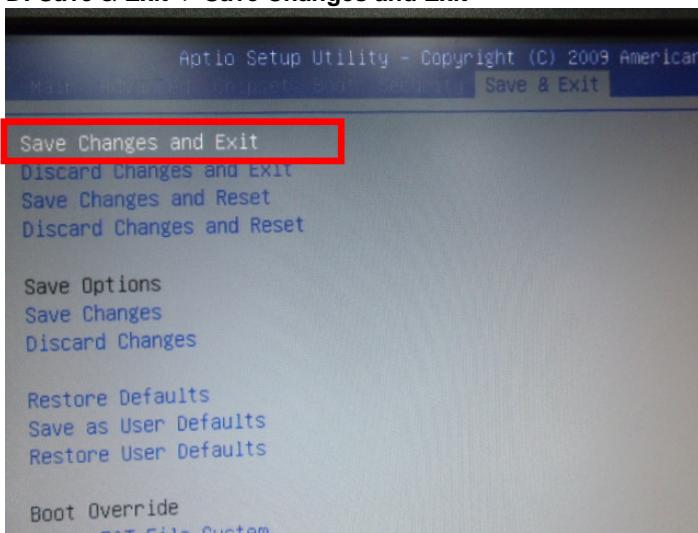

Step 5: The setting procedures “In BIOS Setup Menu”

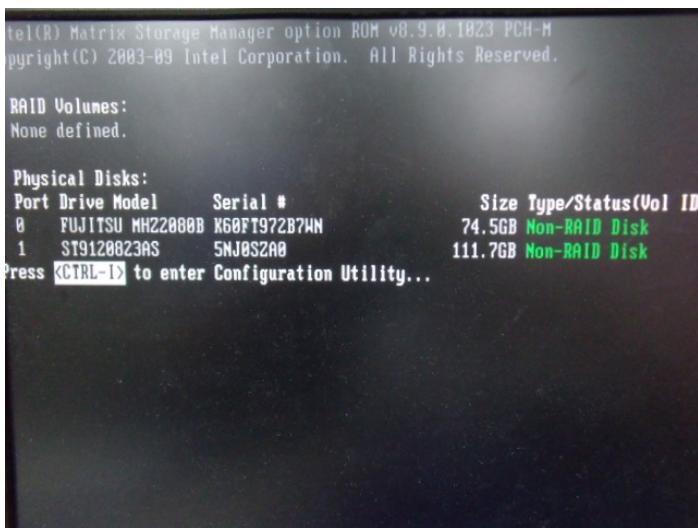

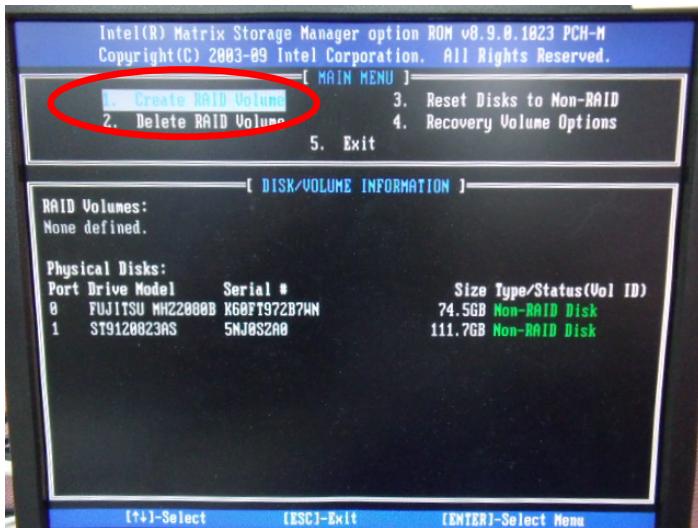

C: Boot -> Boot Option #1 -> DVD-ROM Type

Step 6: The setting procedures “In BIOS Setup Menu”

D: Save & Exit -> Save Changes and Exit

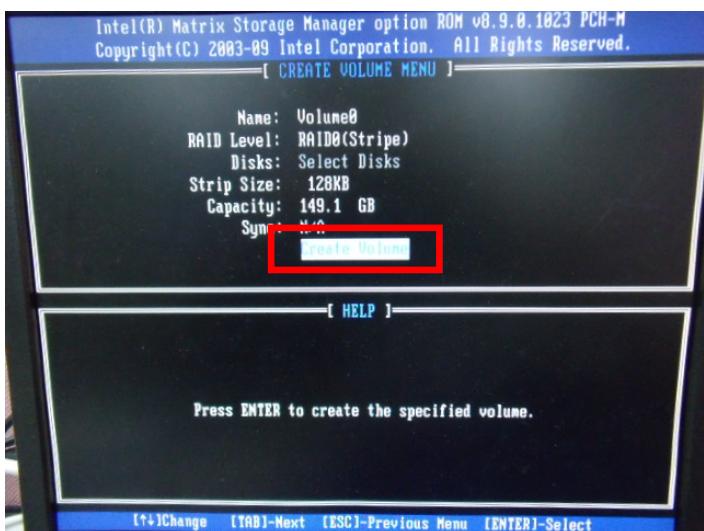

Step 7: Press Ctrl-I to enter MAIN MENU**Step 8: Choose “1.Create RAID Volume”**

Step 9: RAID Level -> RAID0(Stripe)

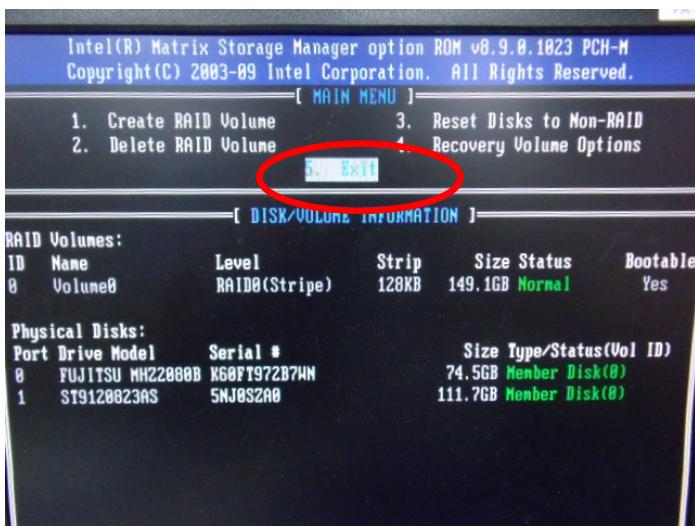

Step 10: Choose "Create Volume"

Step 11: Choose "Y"

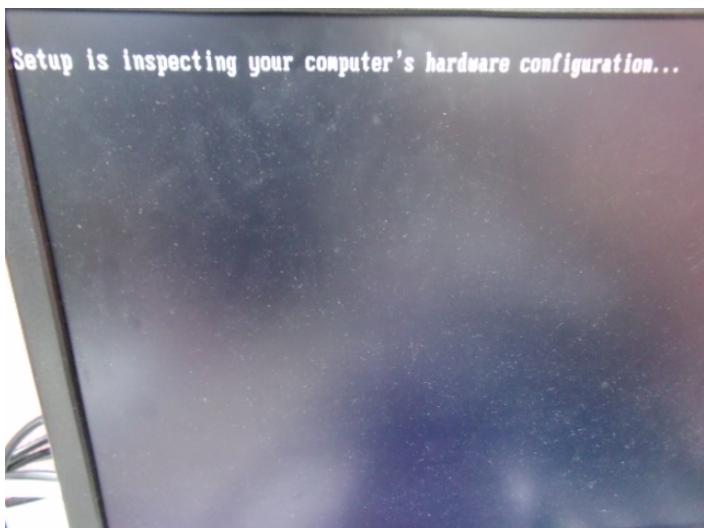

Step 12: Choose "5. Exit"

Step 13: Choose "Y"

Step 14: Setup OS

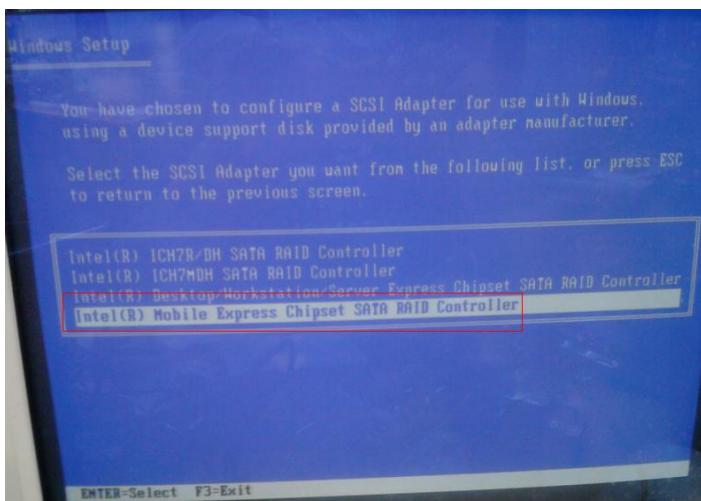

Step 15: Press “F6”

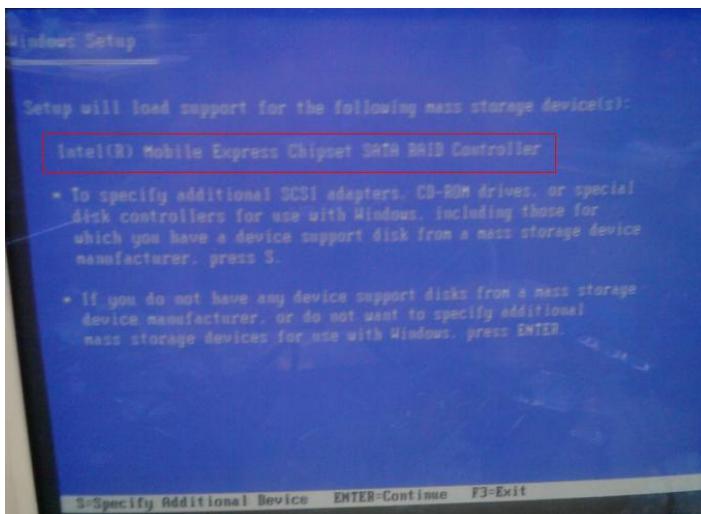

Step 16: Choose “S”

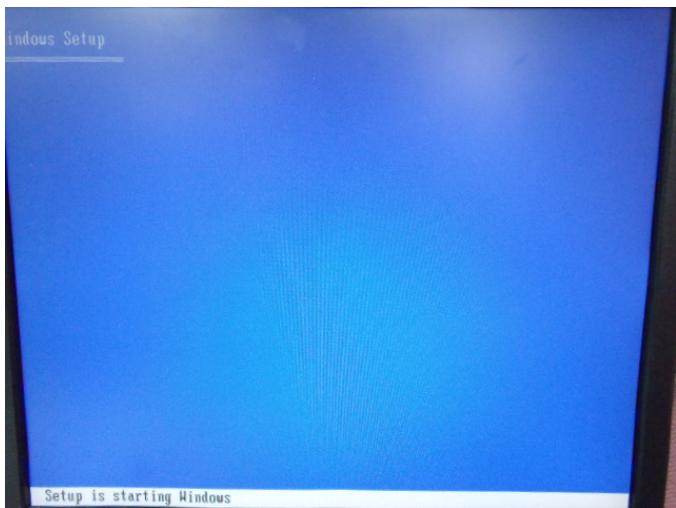

Step 17: Choose “Intel(R) Mobile Express Chipset SATA RAID Controller”

Step 18: It will show the model number you select and then press “ENTER”

Step 19: Setup is starting Windows

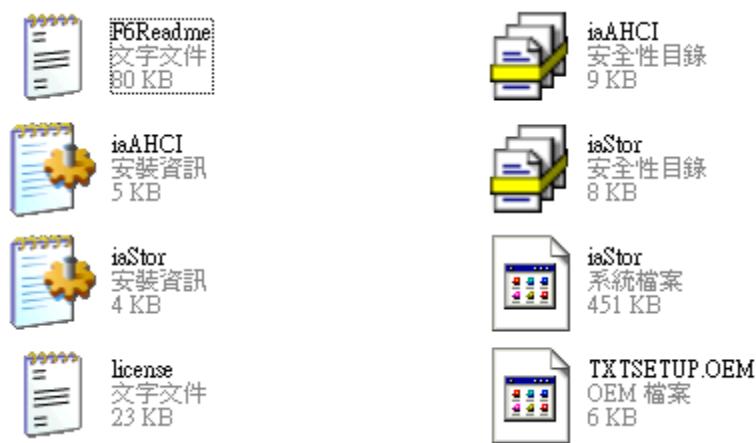

D.2 Setting AHCI

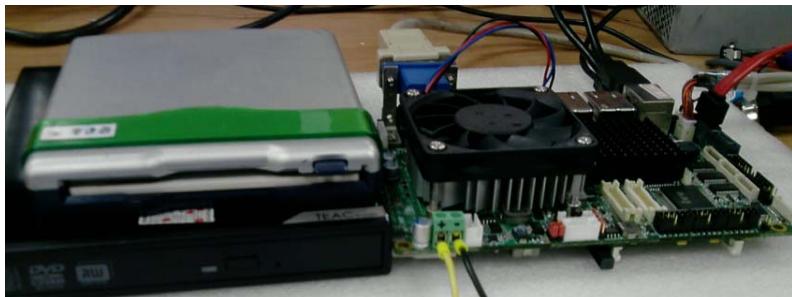

OS Installation to Setup AHCI mode

Step 1: Copy the files below from the **Driver CD**:

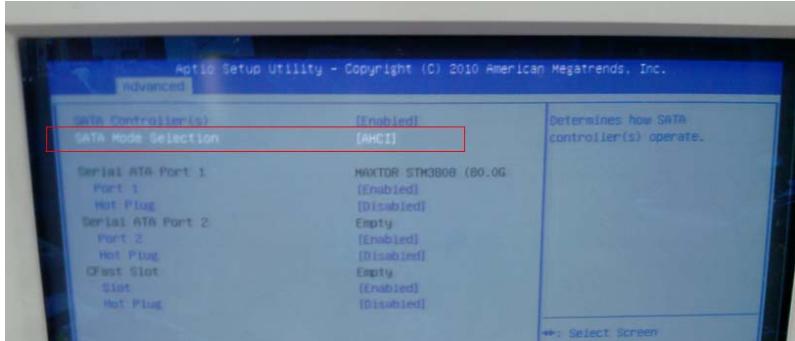

Step7-RAID&AHCI\WINXP_32 to Disk.

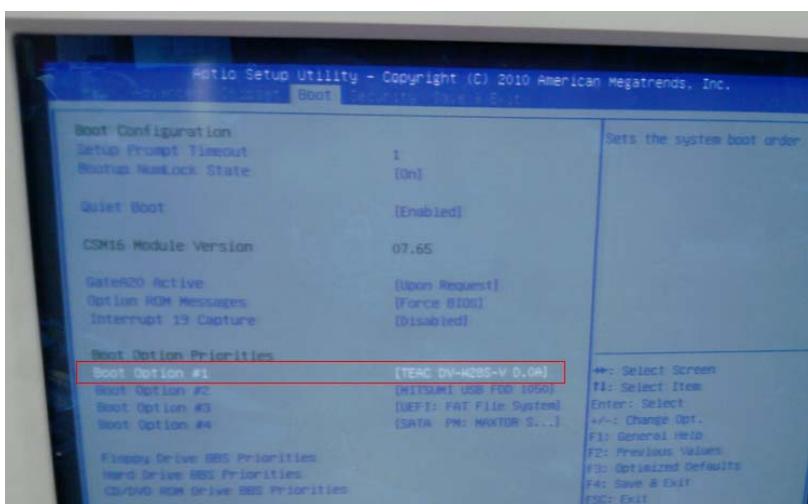

Step 2: Connect the USB Floppy Disk with the RAID&AHCI files to the board.

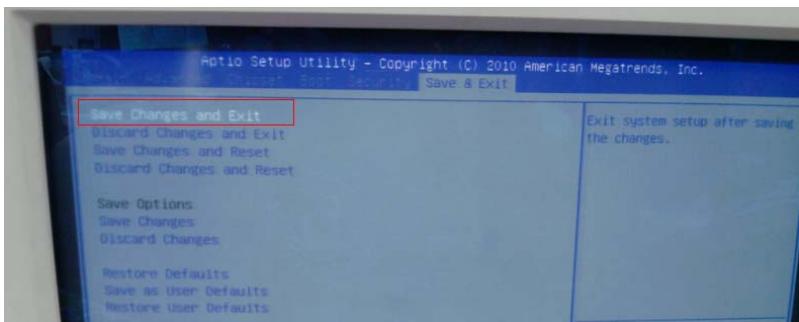

Step 3: To install “In BIOS Setup Menu”, select Advanced -> SATA Configuration -> SATA Mode Selection -> AHCI

Step 4: Next, select Boot -> Boot Option #1 -> DVD ROM Type

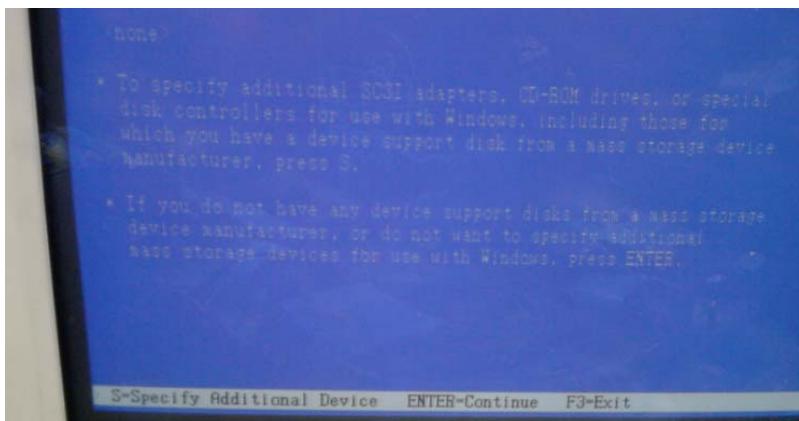

Step 5: To save, select **Save & Exit -> Save Changes and Exit**

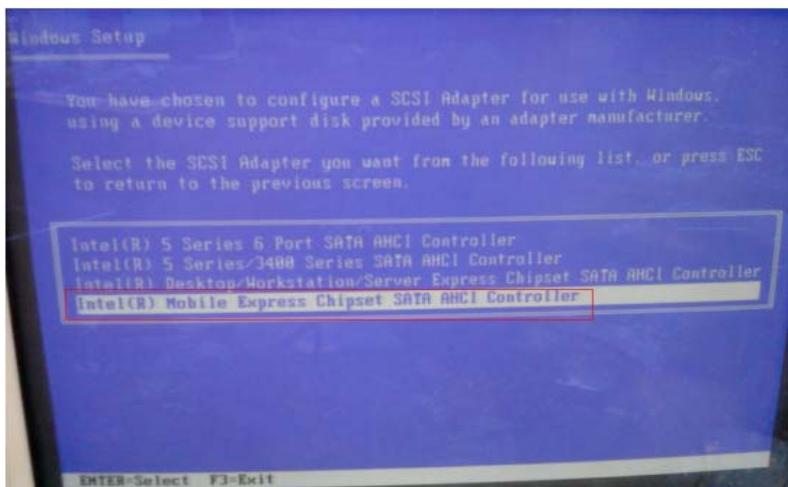

Step 6: Setup OS

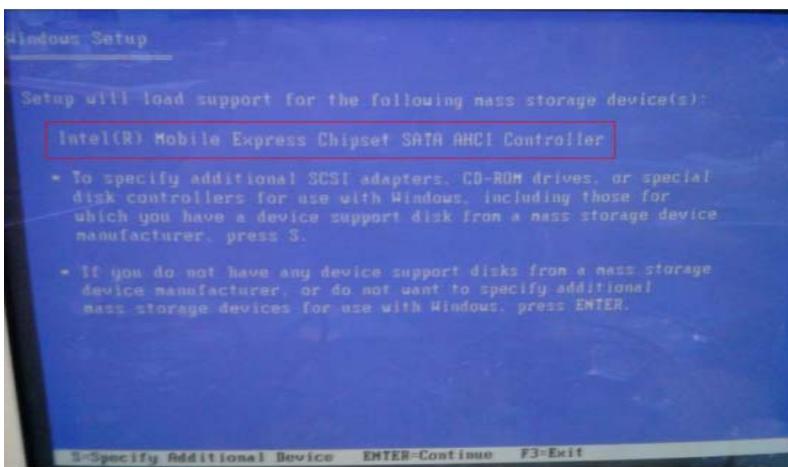

Step 7: Press “F6”**Step 8: Choose “S”**

Step 9: Choose “Intel® Mobile Express Chipset SATA AHCI Controller

Step 10: Select “ENTER” to choose the model number

Step 11: Setup is loading files
