To AAEON Technology Inc:

## **Introduction**

We have reviewed the accompanying consolidated balance sheets of AAEON Technology Inc. (hereinafter referred to as "AAEON") and its subsidiaries as of March 31, 2020 and 2019, and the related consolidated statements of comprehensive income, changes in equity and cash flows for the three-month periods ended March 31, 2020 and 2019, and notes to the consolidated financial statements, including the summary of significant accounting policies. It is the responsibility of the management to prepare and ensure fair presentation of consolidated financial statements in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers, international financial reporting standards approved by the Financial Supervisory Commission, and IAS 34 - "Interim Financial Reporting". Our responsibility as auditor is to form a conclusion based on our reviews.

## **Scope of Review**

Except as described in the "Basis for qualified conclusion" paragraph, we, the auditors, have performed the review in accordance with Statement on Auditing Standards No. 65 - "Financial Statement Review". The procedures executed in our review of consolidated financial statements include inquiry (mainly with employees responsible for financial and accounting affairs), analysis and other review-related processes. The scope of financial statement review is significantly smaller than a financial statement audit, therefore we may not be able to detect all material issues through the steps we have taken, and are unable to provide an opinion.

## **Basis for qualified conclusion**

As mentioned in Note 4. (3) of the consolidated financial statements, some non-significant subsidiaries were consolidated using non-auditor reviewed financial statements for the corresponding period, which the sum of assets represented by such subsidiaries totaled \$720,819 thousand and \$723,155 thousand as of March 31, 2020 and 2019, and accounted for 7.47% and 7.11% of consolidated total assets, respectively; they also represented \$121,769 thousand and \$129,000 thousand of total liabilities, which accounted for 8.73% and 8.27% of consolidated total liabilities, respectively. Comprehensive losses reported by the above subsidiaries amounted to \$(18,971) thousand and \$(2,428) thousand for the three-month periods ended March 31, 2020 and 2019, which accounted for 29.99% and (0.90%) of total comprehensive income for the respective periods.

## **Qualified conclusion**

Based on our reviews and the reports of other independent auditors (please refer to other matter), none of the material disclosures of the consolidated financial statements mentioned above exhibited any misstatement that did not conform with Regulations Governing the Preparation of

Financial Reports by Securities Issuers or the version of IAS 34 - "Interim Financial Reporting" approved by the Financial Supervisory Commission, or compromised the fair view of the consolidated financial position of AAEON as of March 31, 2020 and 2019, and consolidated business performance and consolidated cash flow for the three-month periods ended March 31, 2020 and 2019, except for the matters discussed in the "Basis for qualified conclusion" paragraph and potential adjustments to the consolidated financial statements if financial statements of non-significant subsidiaries were to be auditor-reviewed.

### **Other matter – Reference to the reviews of other independent auditors**

We did not review the financial statements of certain investments accounted for under equity method. Those financial statements were reviewed by other independent auditors whose reports thereon have been furnished to us and our conclusion expressed herein, insofar as it relates to the amounts included in the consolidated financial statements and information disclosed relative to these investments, is based solely on the reports of other independent auditors. These investments accounted for under equity method amounted to \$3,865,191 thousand and \$3,613,779 thousand as of March 31, 2020 and 2019, which accounted for 40.04% and 35.54% of consolidated total assets on the respective dates; comprehensive income recognized from the above companies amounted to \$(22,117) thousand and \$41,100 thousand for the three-month periods ended March 31, 2020 and 2019, which accounted for 34.96% and 15.28% of consolidated comprehensive income for the respective periods.

IV. Summary of Significant Accounting Policies

The following is a description of significant accounting policies in regards to statement of compliance, basis of preparation, basis of consolidation and addition. Unless otherwise stated, all other accounting policies shall remain unchanged from Note 4. of the 2019 consolidated financial statements and apply consistently across all reporting periods.

(I) Statement of compliance

1. This consolidated financial report has been prepared in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and IAS 34 - "Interim Financial Reporting".
2. This consolidated financial report shall be read in conjunction with the 2019 consolidated financial report.

(II) Basis of preparation

1. The consolidated financial statements have been prepared on a historical cost basis except for the following reasons:
  - (1) Financial assets and liabilities (including derivatives) that have been measured at fair value through profit or loss.
  - (2) Financial assets that have been measured at fair value through other comprehensive income.
2. For the preparation of financial statements in conformity with the IFRS, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission, it requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying AAEON's accounting policies. The areas involving higher degree of judgment or complexity, or areas where assumptions and estimations are significant to the consolidated financial statements are disclosed in Note 5.

(III) Basis of consolidation

(IV) Income tax

1. Income tax expense includes current and deferred tax. Income tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity respectively.

2. The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the reporting date in the countries where the Group operates and generate taxable income. Management regularly evaluates the status of income tax filings in accordance with applicable tax laws, and estimates income tax liabilities based on taxes expected to be paid to tax authorities where applicable. An additional tax out of unappropriated earnings is provided for as income tax in accordance with the Income Tax Act, and the approved distribution of earnings for the year after the profitable year by resolution of the shareholders' meeting is recognized as unappropriated earnings income tax expenses.
3. Deferred income tax is recognized, using the balance sheets liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Consolidated Balance Sheet. Initial recognition of deferred tax liabilities arising from goodwill not recognized, and the deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. Taxable temporary differences associated with investments in subsidiaries and affiliates are not recognized if the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax is based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates/laws that are expected to be applied.
4. Deferred tax assets recognized for all taxable temporary differences may be used to offset future income on future tax returns, Deferred income tax assets are recognized to the extent that temporary differences are likely to be used to offset future taxable income, and unrecognized and recognized deferred tax assets are re-evaluated at each balance sheet date.
5. Current tax assets and current tax liabilities can only be offset in the statement of financial position if the Company has the legal right and the intention to settle on a net basis. Deferred tax assets and deferred tax liabilities can only be offset in the statement of financial position if the entity has the legal right to settle current tax amounts on a net basis and the deferred tax amounts are levied by the same taxing authority on the same entity or different entities that intend to realize the asset and settle the liability at the same time.
6. If tax rate changes within a financial period, AAEON will recognize impact in the same period in one lump sum. For changes unrelated to income tax and profit or loss, impacts are recognized in other comprehensive income or under equity item. Changes concerning income tax or profit or loss items are recognized through profit or loss.

V. Significant Accounting Judgments, Estimations, and Major Sources of Assumption Uncertainty

No material changes had taken place in the current period; please refer to Note 5. of the 2019 consolidated financial report.

#### (XVI) Retained earnings

- Under the dividends policy as set forth in the amended Articles, where the Company made a profit in a fiscal year, the profit shall be first utilized for paying taxes, offsetting losses of previous years, setting aside as a legal reserve of 10% of the remaining profit, setting aside or reversing a special reserve in accordance with the laws and regulations, and then any remaining profit together with any undistributed retained earnings at the beginning of the period shall be used by the Company's board of directors as the basis for proposing a distribution plan, which should be resolved in the shareholders' meeting for the distribution of dividends and bonuses to shareholders.
- In the future, the Company may have the surplus profit distributable as dividends in part or in whole considering the financial, business and operational factors. The ratio of share dividend shall exceed 5% of distributable earnings. Surplus distribution can be in the form of cash or stock dividends. For the measurement of future capital requirements and capital structure, cash dividend shall not be less than 10% of the total amount of dividends in the

future, and the actual distribution amount shall be adopted by resolution of the shareholders' meeting.

3. Unless losses have been covered or where legal reserve is distributed by the issuance of new shares or by cash in proportion to the shareholders' existing shareholding, the Company shall not make distributions out of legal reserve, of which only the portion of legal reserve which exceeds 25 percent of the paid-in capital may be distributed.
4. (1) For surplus distribution, the Company shall appropriate special reserve to the debit balance of other equity on the end of the reporting period. When the debit balance of other equity is reversed, the reversal amount can be included in distributable surplus.  
 (2) The amounts previously set aside by the Company as special reserve on initial application of IFRSs in accordance with Jin-Guan-Zheng-Fa-Zi Letter No. 1010012865, dated April 6, 2012, shall be reversed proportionately when the relevant assets are used, disposed of or reclassified subsequently.

## 2. Risk management policy

The Group adopts a comprehensive risk management system for the management to clearly identify, measure and control all risks to achieve effective control and measurement.

The Group's Control and management strategies are as follows:

### (1) Interest rate risk:

The Group continuously keep track on the trend of interest rates and set up stop-loss points to control interest rate risks.

### (2) Exchange rate risk:

The Group uses derivative financial instruments such as forward foreign exchange transactions to hedge for foreign currency assets or liabilities or highly probable transactions to reduce the risks in cash flows and fair value from fluctuation in foreign exchange rates. In addition, the changes foreign exchange rate is closely monitored, with a stop loss point to mitigate exchange rate risks.

### (3) Credit risk:

The Group has a stringent credit evaluation policy and only trades with counterparties of good credit quality, with regular application of credit protection measures to mitigate credit risk.

## 3. The nature and level of material financial risks

### (1) Market risk

#### Exchange rate risk

- A. The Group's international operations have been subject to exchange rate risks arise from transactions denominated in a currency other than the functional currencies of the Company and its subsidiaries, which includes main currencies such as USD, SGD, EUR and RMB. Related exchange rate risks arise from future business transactions and recognized assets and liabilities.
- B. The Group's management formulated policies to manage exchange rate risks relative to the functional currency of the Company and its subsidiaries. The finance department is responsible for hedging the overall exchange rate risk. Exchange rate risk is measured through highly probable forecast transactions that involves expenditures denominated in USD and RMB. Accordingly, the Group uses foreign currency forward contracts to mitigate the impact of exchange rate fluctuations on the costs of purchasing inventories.
- C. The Group uses forward exchange and currency and interest rate swaps to hedge exchange rate risks without hedging accounting, which are recognized as financial assets or liabilities at fair value through profit or loss. Please refer to Note 6 (2) and (10) for more details.

D. Since the Group's businesses involves certain non-functional currencies (NTD is the functional currency of the Company and part of its subsidiaries, while the functional currencies of other subsidiaries include USD, SGD, and RMB), it may be affected by exchange rate fluctuations. The foreign currency assets and liabilities that may be significantly affected by exchange rate fluctuations are as follows:

#### Price risk

- A. The Group is exposed to equity instrument price risk because of investments classified as financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. To manage the price risk arising from investments in equity instruments, the Group has diversified its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group.
- B. The Group mainly invests in equity instruments and open-end funds issued by domestic companies, of which the price of equity instruments will be affected by uncertainty of future value of the investment target. Assuming all other factors remain unchanged, if prices of equity instruments rise or fall by 1%, net income for the three months periods ended March 31, 2020 and 2019, would rise or fall by \$4,168 and \$11,088, respectively, for equity instruments measured at fair value through profit or loss, whereas other comprehensive income for the three months periods ended March 31, 2020 and 2019, would rise or fall by \$24 and \$71, respectively, for financial assets measured at fair value through other comprehensive income.

#### Cash flow and fair value interest rate risk

- A. The Group's interest rate risk arises mainly from long-term and short-term borrowings at floating rates, which exposes the Group to cash flow interest rate risk, but part of the risk can be offset by cash and cash equivalents held at floating rates. For the three months periods ended March 31, 2020 and 2019, AAEON's floating rate borrowings were mainly denominated in USD.
- B. Assuming all other factors remain unchanged, if the USD borrowing rate rises or falls by 0.25%, net income for the three months period ended March 31, 2020 and 2019, will decrease or increase by \$111 and \$152, respectively mainly due to changes in interest expenses that arise from floating rate borrowings.

(2) Credit risk

- A. The Group's credit risk refers to the risk that the counterparty to a financial instrument will cause a financial loss for the Group by failing to discharge its obligation under the contract, which is mainly due to the inability of counterparties to meet the terms of their contracts for collecting the cash flows of the receivables.
- B. The Group establishes credit risk policies based on its own risk management perspective. In accordance with internal credit policies, credit risks are required to be managed and analyzed before each of the Group's operating entity set up the terms and conditions for payment and delivery for each new customer. The internal risk control system evaluates the customers' credit quality based on their financial conditions, past experience and other factors. Individual risk exposure limits are set by the board of directors based on internal or external risk ratings, and credit lines are monitored on a regular basis.
- C. The Group adopts IFRS 9 to provide a presumption that default has occurred when contractual payments are more than 90 days past due.
- D. The Group adopts IFRS 9 to provide the following presumption as basis for judging whether the credit risk on a financial instrument has increased significantly since the initial recognition:  
It is deemed that credit risk after the original recognition of financial assets has increased significantly when contractual payments are more than 30 days past due.
- E. The customers' accounts receivable are segmented based on customer type. A simplified loss rate approach is used for ECL measurement based on the provision matrix.
- F. The Group has written off the recoverable amount of financial assets that could not reasonably be estimated after recourse, but will continue to pursue recourse to preserve its rights. As of March 31, 2020, December 31, 2019 and March 31, 2019, AAEON had no recourse on claims that had been written off.
- G. (1) Expected loss rate for customers of the outstanding credit group is estimated at 0.2%. Total accounts receivable and loss provisions for this group of customers were reported at: \$465,069 and \$242 as of March 31, 2020, \$489,154 and \$300 as of December 31, 2019, and \$528,765 and \$377 as of March 31, 2019, respectively.
- (2) AAEON considers the world economic outlook and future prospects when adjusting the loss rate that is set up based on historical and current loss period information, in order to estimate the loss of notes receivables and allowance for doubtful accounts of customers with general credit quality. The provision matrix as of March 31, 2020, December 31, 2019 and March 31, 2019 is as follows:

	Not yet due	Past due within 30 days	Past due 30 days	Past due 60 days	Past due 90 days	Past due 120 days	Total
<u>2020/3/31</u>

Loss allowance	\$ 30	\$ 13	\$ 60	\$ 1,100	\$ 1,572	\$ 11,361	\$ 14,136

(3) The total book values of the accounts receivable-related parties as of March 31, 2020, December 31, 2019 and March 31, 2019 were \$4,364, \$3,387 and \$3,685, respectively. The expected credit loss is not significant thanks to low credit risk, which lead to a loss allowance of \$0.

H. The Group's simplified approach of notes receivable and changes in allowance for doubtful accounts are as follows:

	Notes and accounts receivable (including related parties)	
	2020	2019
January 1	\$ 24,144	\$ 3,777
Write off of impairment loss	1,071	10,724
Forex effect	( 248 )	12
March 31	\$ 24,967	\$ 14,513

From the loss recognized for the three months periods ended March 31, 2020 and 2019, the impairment losses for accounts receivable arising from customer contracts were \$1,071 and \$10,724, respectively.

(3) Liquidity risk

- A. Cash flow is forecasted by each of the Group's operating entity and summarized by the finance department. The Group's finance department monitors liquidity forecasting to ensure that it has sufficient funds to meet the operational requirements.
- B. AAEON had available borrowing limits of \$564,613, \$532,486 and \$469,957 as of March 31, 2020, December 31, 2019 and March 31, 2019, respectively.
- C. The table below analyzes the Group's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date, whereas derivative financial liabilities are analyzed based on the remaining period at the balance sheet date to the expected maturity date. The amounts disclosed in the table are contractual undiscounted cash flows.

Non-derivative financial liabilities:

D. The Group's cash flows are not expected to occur significantly earlier than the maturity date, or to be significantly different from the actual amount.

(3) Information on fair value

1. The various levels of fair value measurement of financial and non-financial instruments are defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for assets or liabilities identical to those being valued that the entity can obtain at the measurement date. Quoted price in an "active market" means that quoted prices represent market transactions related to assets and liabilities that are readily and regularly occurring. This includes fair values of TWSE listed shares and beneficiary securities invested by the Group.

Level 2: Inputs in this level are observable for assets and liabilities, either directly or indirectly, other than quoted prices described in level 1. This includes fair values of TPEX listed stocks and derivative financial instruments invested by the Group.

Level 3: Inputs in this level are unobservable for assets and liabilities being valued. This includes equity instruments of non-active markets invested by the Group.

2. Financial instruments not measured at fair value

The carrying amounts of the Group's cash and cash equivalents, notes receivable, accounts receivable, other receivables, limited time deposit (classified in the balance sheet as other current asset), guarantee deposits (classified in the balance sheet as other non-current asset), short-term borrowings, notes payable, accounts payable, other payables and lease liabilities are reasonable approximations of fair values.

3. The Group has classified financial and non-financial instruments measured at fair value based on the nature, characteristics and risks of assets and liabilities, as well as in accordance with the fair value hierarchy. The relevant information is as follows:

(1) The Group classifies its financial instrument based on the nature of assets and liabilities, with relevant information as follows:

- (2) The Group's approaches and assumptions for fair value measurement are as follows:
- A. The Group adopts quoted prices as inputs used to measure fair value (1st level), which are classified as follows based on the characteristics of the financial instruments:

	<u>Shares of listed companies</u>	<u>Open-end funds</u>
Quoted market price	Closing market prices	Net value

- B. Except for the aforementioned financial instruments in an active market, the fair values of other financial instruments are obtained by using valuation techniques, or by reference to the quoted prices of counterparties.
- C. The Group adopts valuation techniques widely used by market participants for evaluating non-standardized and less complex financial instruments. The

parameters used in the valuation models of such financial instruments are usually market observable information.

- D. The evaluation of derivatives is based on the valuation model generally accepted by market users, such as the discount method. Foreign currency forward contracts are usually evaluated based on the current forward exchange rates.
- E. The output of the evaluation model is an estimated value, and the valuation technique may not reflect all the relevant factors of the Company's financial and non-financial instruments. Therefore, the estimated value of the valuation model will be adjusted based on additional parameters, such as the model risk or liquidity risk. According to the Group's management policies of fair value valuation model and related control procedures, its management believes that valuation adjustments are appropriate and necessary for the fair values of financial and non-financial instruments to be presented fairly in the consolidated balance sheet. The price information and parameters used in the evaluation process are carefully evaluated, with appropriate adjustments according to current market conditions.
4. Transfers have not occurred between 1st and 2nd level inputs for the three months periods ended March 31, 2020 and 2019.
5. The following table shows changes in 3rd level inputs for the three months periods ended March 31, 2020 and 2019:

	<u>2020</u>	<u>2019</u>
	<u>Equity instrument</u>	<u>Equity instrument</u>
January 1	\$ 67,627	\$ 49,751
Gains (or losses) recognized through profit or loss (Note 1)	( 5,465 )	641
Changes in fair value recognized in other (Note 2)	-	( 3,211 )
March 31	<u>\$ 62,162</u>	<u>\$ 47,181</u>

Changes in unrealized gains or losses on assets and liabilities owned at the end of the period that are

( \$	<u>5,465</u> )	\$	<u>641</u>
------	----------------	----	------------

Note 1: Classified in the balance sheet as other gains and losses.

Note 2: Classified in the balance sheet as unrealized losses from equity instruments investments measured at fair value through other comprehensive income.

6. There had been no inward or outward transfer of level 3 input for the three months periods ended March 31, 2020 and 2019.
7. The Group's validation process for 3rd level fair value measurement on financial instruments is independently performed by the Finance Department. The independent data sources are used to bring the evaluation results closer to the market, while ensuring the reasonableness of evaluation results with consistent resources and executable representative prices.
- In addition, the Finance Department is responsible for formulated fair value valuation policies and evaluation procedures, and ensuring the Group's compliance with relevant IFRS regulations.

8. The quantitative analysis of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs as valuation models for 3rd level fair value measurements are as follows:

	2020/3/31 Fair value	Valuation technique	Significant and unobservable input	Range (weighted average)	Relationship between input and fair value
<u>Equity instruments:</u>					
Shares of unlisted companies	\$ 29,384	Net asset value approach	N/A	N/A	The higher the value of net assets, the higher the fair value of the stocks
Shares of unlisted companies	21,741	Discounted Cash Flow Approach	Note 1	N/A	Note 2
<u>Hybrid instrument:</u>					
Shares of unlisted companies	42,112	Discounted Cash Flow Approach	Note 1	N/A	Note 2
Embedded option (	31,075 )	Options pricing model	Price volatility	N/A	The higher the price volatility, the higher the fair value of the stocks
	2019/12/31 Fair value	Valuation technique	Significant and unobservable input	Range (weighted average)	Relationship between input and fair value
<u>Equity instruments:</u>					
Shares of unlisted companies	\$ 34,958	Net asset value approach	N/A	N/A	The higher the value of net assets, the higher the fair value of the stocks

Embedded option (	38,767 )	Options pricing model	Price volatility	N/A	The higher the price volatility, the higher the fair value of the stocks

	2019/3/31 Fair value	Valuation technique	Significant and unobservable input	Range (weighted average)	Relationship between input and fair value
<u>Equity instruments:</u>					
Shares of unlisted companies	\$ 1,089	Net asset value approach	N/A	N/A	The higher the value of net assets, the higher the fair value of the stocks
Shares of unlisted companies	35,152	Discounted Cash Flow Approach	Note 1	N/A	Note 2
<u>Hybrid instrument:</u>					
Shares of unlisted companies	11,027	Discounted Cash Flow Approach	Note 1	N/A	Note 2
Embedded option (	87)	Options pricing model	Price volatility	N/A	The higher the price volatility, the higher the fair value of the stocks

Note 1: Long term sales growth, weighted average cost of capital, long term net profit before tax, discount for lack of marketability, and discount for minority interest.

Note 2: The higher the discount for lack of marketability, the lower the fair value of the stocks; the higher the weighted average cost of capital discount for minority interest, the lower the fair value of the stocks; the higher the long-term sales growth and long-term net profit before tax, the higher the fair value of the stocks.

9. After careful assessment, the Group has selected valuation models and evaluation parameters, but the application of the various valuation models or evaluation parameters may lead to different evaluation results.
